Egypt Coal Mine.—We are pleased to learn that the work of reopening the Egypt coal mine has been begun. The old timbers in the shaft are being removed, and new timbers will be put in. It will be several weeks before they can get ready for pumping out the water, and, as there is an immense quantity of water in the mine, it will take several months to pump it out after they begin. So that it may be next summer before any coal is mined. The shaft is 160 feet deep and the tunnels running from it cover about four acres. When the mine is reopened it will be quite a "boom" to that portion of the county, as it will employ a large number of men and circulate a good deal of money.
