ABSTRACT OF TAXABLES.—The following is an abstract of the taxables of this county for 1893, as compiled from the returns of the list makers of the several townships:

THE STATE FAIR.—We spent last Thursday at the State Fair and many others did the same thing; indeed the crowd there on that day was very large, almost as large as we have ever before seen at any previous fair.

been desired, and the crowd would have been still larger if the railroad fare had not been so high. As it was not as many as usual travelled on the railroads, but travelled through the country in their own vehicles. As is usual with our North Carolina crowds there was no disorder or disturbance to mar the pleasure of the occasion, everybody being well behaved and intent on having a pleasant time.

The exhibits did not amount to much, and with a few exceptions, were not arranged or displayed with much taste. One of the most attractive and creditable was the exhibit of the products of Col. Julian S. Carr's Occochee farm, near Hillsboro, and yet this exhibit was not seen by many persons because of its location in an out-of-the-way place. There was an exhibit from this county that deserves special notice. We refer to the exhibit of Mrs. John W. Perry, in which were canned fruits and vegetables, preserves, evaporated fruit, and a lot of home-made household fabrics, such as blankets, bed quilts, &c.

The chief attractions of the fair were the side shows, horse racing and other outdoor amusements. Probably the greatest source of enjoyment was the so-called "Wild West Show", in which there was some wonderful horse back riding, which greatly amused the crowd. There was one rider who exhibited very remarkable feats of horsemanship, which were loudly applauded.

It is to be regretted that the managers of our State Fairs have to get all such attractions to draw visitors, and yet it seems necessary in order to have any sort of a crowd. It is a great pity that the farmers do not take more interest in our State Fairs and exhibit their products in greater number. The main object of the fair is to promote our agricultural interests, and yet those most deeply interested in agriculture seem to take very little interest in the fair.

Western Chatham Items.

SEVERN GROVE, N. C., Oct. 24, 93.

The farmers are busy gathering corn and sowing wheat.

Owing to so much rain they are behind.

Corn shuckings and possums have nearly played out in this neighborhood.

We have a right good mast. The hogs and boys are having a heap of running about.

We made good crops of sorghum, therefore we putlasses on both sides of our bread. I reckon I must tell you that Mr. — carried two loads of cane to mill and two 4 gallon jugs to put his part in; he borrowed one gallon from the miller till his was made and when he went after his cane had only made three quarts, so he was still due one quart. He says, he don't know "where his is at".

My wife divided cabbage seed with one of my old friends near Hillsboro last spring and now he wants to know if they are good to eat without meat.

One of my neighbors went to market with tobacco a few days since. He said it sold like wheat straw. A two horse load brought two dollars and a one horse load brought one dollar.

I have had the blues ever since the big freshet. The river was the highest it has been in a hundred years. It washed away one mile of fence for me, pumpkins and a foot leg. I have no communication with the other side of the river.

I sold thirty dollars worth of water-melons from half an acre, this season, and those that bought on time and were to pay on first sight I would be glad they would hunt me up.

I can always tell when I am a year older by the blue X on the Chatham Record.

Burning buildings in this neighborhood is so frequent that when we get up of a morning we look around to see what is left.

What shall I say about Congress? Only men to what has been said, and I think if they don't adjourn they will corrupt the morals of this generation.

I would be glad Chuck and Short Link would send me their pictures, and I will pay them a visit as soon as those crosses are removed from Richmond.

Richmond Dots.

RICHMOND, N. C., Oct. 24, 1893.

Health is distressingly good.

Corn huskings are now in full progress.

Good crops and over-production of rations are almost making our farmers forget that Congress is in extra session and times ever hard.

Corn crops are much better than for several years, the decrease in the average of cotton will make the crop somewhat light.

Sweet potatoes are extra fine, or at least we heard a gentleman say a few days ago that his were so large that he had to saw them up with a cross-cut saw, but did not think he was losing any thing by it as he was using the dust to make puddings with.

We learn from a reliable citizen who lives in the town of Goldston that the cow that was struck by the cars south of Richmond, that Short Link spoke of last week, was in sight of Goldston and that the quarter that was skinned was so poor that the person who did it had to buy bacon to cook the beef with.

North Carolina Game.

North Carolina has there (Chicago) ready the strongest kind of a bid for recognition as the oyster, wild fowl and fish producer of the Atlantic seaboard, and has even several diamond back terrapins walking around an upright post, inside of a wire cage, with a label near by explaining that they are the most expensive table luxury in the United States.

The North Carolina conference of the Methodist Episcopal Church South will convene in Wilmington December 6th.

Major John W. Graham's fine residence at Hillsboro was destroyed by fire on the night of the 19th. Loss placed at \$20,000.

California as a Sanitarium.

In an article written for the Californian, Lieutenant John P. Finley, of the United States Weather Bureau, makes the following statement: "Theoretically, California should furnish the best and the most varied health resorts and sanitariums in the United States. Within her borders almost every form of wasting disease should find the means of temporary, if not permanent relief."

This theoretical statement, from an unbiased, scientific standpoint, is fully and abundantly confirmed by actual experience. The cool and bracing coast climate, devoid of any trace of malaria, extends from the northern part of the State to the extreme south. There is the choice between this cool, humid atmosphere and the dry, warm atmosphere of the inland valleys.

In the matter of altitude there is a yet greater difference. From Palm Valley, 300 feet below sea level, to the upper Sierras, 7000 or 8000 above, any altitude can be selected, and comfortable homes be founded.

The peculiarity of an almost rainless summer, during which the injurious germs of animal and vegetable decay are destroyed by thorough desiccation, is one of the striking features of California climate.

During the rainy season it is usually too cool to facilitate fermentation, and the result is, except along some of the river valleys, an absolutely pure atmosphere. The ocean winds entering through the several coast openings, are tempered by the intermediate area passed over, and often receive desirable healing properties by taking up the resinous odors of the pines and redwoods on the Coast Range.

The skillful physician, acquainted with the climatic conditions, should find little difficulty in selecting a locality where climate and environment will do all that these agencies can ever do toward the restoration of health. There is enough of wildness to keep the mind constantly engaged, and enough of civilization to satisfy the most exacting.

Sufferers from pulmonary diseases, people whose systems are charged with malaria, or are "run down" by over work. End immediate and in many cases permanent relief in this invigorating climate, establishing anew the fact recognized by all intelligent persons, whether physicians or laymen, that "Nature is the best healer."

SATISFACTION'S MOORINGS.

Folks go a sight on dress now a days, and if you want to stand well, you must dress well.—The old adage does not run that way—but in this day and generation, the want of good clothes is very apt to "unmake the man"

Effort is the parent of success. We tried to perfect past perfections, and the several thousands fine finished fitting Overcoats and Suits are on our tables, the result of our ambitious endeavor. We've given shape to new and original designs, selected the very freshest and choicest weaves that a careful search of the famed mills could. The work is done strictly like tailors. Never relaxed our painstaking energy until every line was gracefully turned, every stitch securely taken, every quality honestly weighed: it's the perfection of the part that makes the perfect whole, and we've been vigilant from the very beginning.

When you come to review our stock you'll see new styles, styles that cannot be found anywhere else, styles that appeal to appreciation of the young, nobby dresses, styles that will suit the quieter tastes, and styles that will win favor with settled sedate clothes-wearers. In all our Suits and all our Overcoats, from the cheapest to the best are the virtues that belong to fine tailoring. We are showing a GREATER VARIETY, offering better values, asking lower prices than ever. If those are not trade bringers nothing can be.

All sizes in Suits and Overcoats. A chance on "Waverly Junior" Bicycle with every dollar's worth purchased in our Boy's and Children's outfitting department.
