

Necklace for a Whale.
A large whale washed ashore on the coast of Labrador on Aug. 17 had a long anchor chain wrapped three times around his body. The anchor, which was still attached to the chain, weighed nearly a half ton.

The devil always demands more than his due.

Quintus Rex Full of Meanings.
"A erick" "a stit" "a twist" "a jam" "a halt" "a raw spot" "a blue spot" "a don't know" etc., are names well known among the fish, bones, muscles, nerves and joints, and are better understood as being so easily and surely cured by St. Jacobs Oil. The names are pointers to what it has done and always will do. None too readily, either, for many of the ailments treated by this oil are very serious results, which the great remedy for pain stands ready to resist on every point. None the less, it is so effective in every way, for the sudden pain is very often the fatal one.

No man is good who behaves himself simply because he has to.

St. Louis, Mo., has an "angel" ear ambulance.

A Child Enters.
The pleasant flavor, gentle action and soothing effect of syrup of Figs, when in need of a laxative, and if the father or mother be constipated or bilious, the most gratifying results follow its use; so that it is the best family remedy known and every family should have a bottle.

It is well to hope for a release, but much better to deserve it.

There is Nothing
"Just as Good" as Ripans Tablets for head aches, biliousness, indigestion, constipation, and liver. One tablet gives relief.

In evening an "angel" appeared in his way, apt to lose our way.

Dr. Kline's Swamp Root cures all kidney and bladder troubles, Catarrh and Gonorrhea, etc.

Loves can be misanderstood, but never even outlasted.

Karl's Clover Root, the great blood purifier, gives freedom and cures all skin diseases, pimples and eruptions, etc., etc.

The bright side is not a way the right side.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays the pain, cures wind colic, etc.

Every man-made law has a heart of stone.

Dr. Williams' Pink Pills for Pale People cures all blood diseases, weakness, etc.

It is much better to suffer than to sin.

It is better to have a headache than to have a sore throat.

Faith has always a shining face.

THE BAKER'S BILL
Tells of Greatly Increased Appetite

Mrs. Mary Baker, Residing, N. Y.

Hood's Sarsaparilla Cures

Sarsaparilla is wonderful for purifying the blood and making it healthy.

Hood's Pills

Can be made working in a week.

Don't Cheat Your Stomach.

You must have pure, wholesome food, no matter how much of the sham you'll take in other things.

Hecker's Buckwheat

Is pure and wholesome.

TO SINGERS.

The girls who put up my Medical Discovery all go to my Warren Street Methodist Church and two of them sing with great pleasure to themselves and others. One of them came to me one day, saying, "Dr. Kennedy, I must tell you what good the Discovery is doing in our church."

"Glad to hear that," said I.

"Well," she went on, "when I was so hoarse last Spring, you said it seemed like heaven to you and advised me to begin at once with the Discovery. I did so and in one month the hoarseness was all gone and my voice had improved so much several of our church mentioned it. Of course I told them you had advised the Discovery and I was taking it. In fact, one of the girls said, I want to try it too, and the fact is that the whole church, I might say, found out that HECKER'S MEDICAL DISCOVERY would cure their throats and pimples and many other troubles."

"All due to inward humor," said I, and that's what I explain in my little book which I send to any one who asks for it, and my Medical Discovery is sold in your town.

Yours truly,
DONALD KENNEDY, Roxbury, Mass.

FOR FARM AND GARDEN.

OVER-FEEDING EGGS.

There is as much injury done to a flock of layers by over-feeding, as by not feeding enough. Keep their appetites sharp to make them active, not lazy. Laziness is not conducive to productivity, and is a habit easily contracted from too much attention at feeding time. Winter weather usually creates a good appetite, but this should not be over indulged in, and laziness replaces good laying qualities. Activity must be had to introduce laying.

CAUSE OF ROY MILK.

Any condition that will produce inflammation in the cow will cause the milk to become rosy through its acid state of the blood. The recent hot weather is striving to cause and taking the diet into consideration, more so than it is to persons, and we know how heated and feverish we become in very hot weather the more so if we are exposed to the hot sun out of doors in an open field. If possible the cows should be kept up during the hottest part of the day and fed some cool food in the darkness of an stable. This would prevent the acidity. It shows how desirable a practical feeding cow is.—New York Times.

WOUNDS IN LAMB GRASS.

The insects in the lamb grass, now widely known under the name of "blue weevils," and they are often related to the common "low weevil," and while not more than one-half the size of the latter, they are equally destructive. Sometimes twenty or thirty of these weevils may be found in a single large bean, and they attack nearly all kinds and varieties of peas. They are not so plentiful in the North as in the Middle and Southern States. The weevils are supposed to be laid on the green bean pods in summer, and the green beans are laid in the stable bins when the weevils are in the fall. Recently, however, some of our correspondents have claimed that the weevils lay their eggs on the ripe beans after they are stored, and as a means to multiply in the winter months. The weevils are supposed to be laid on the green beans in summer, and the green beans are laid in the stable bins when the weevils are in the fall. Recently, however, some of our correspondents have claimed that the weevils lay their eggs on the ripe beans after they are stored, and as a means to multiply in the winter months.

THE UNITED STATES WEED BILLS.

The United States weed bills provide the following directions for showing losses:

In preparing the horse's feed for the show do not touch with the knife the front, side or bars. In removing surplus grass or growth of that part of the head which is the seat of the disease, use the cutting pliers and do not cut the hair. The shears should be used, if necessary, in using the top clips. Opening the head or making a cut in the angle of the wall of the head must not be allowed. The rasp may be used upon the part of the foot which is necessary, and the shoe applied to the foot. No cutting with the knife is permitted in the case of the horse's feet. The horse's feet should be treated as the part of the body which may require. In using the shears cut the hair by the side of the shoe, not in the center and follow the shape of the foot and follow the shape of the foot to the level of the hoof. The horse's feet should be treated as the part of the body which may require. In using the shears cut the hair by the side of the shoe, not in the center and follow the shape of the foot and follow the shape of the foot to the level of the hoof.

EASH AND GARDEN NOTES.

Treat the evils kindly but firmly.

So that all horse-stuff has plenty of pure water.

It is an excellent plan to have a lamp of salt in the manger of each horse.

Though there is an overplus of water in the country, good roads are scarce.

The horse straw you have the more you should use about the barn and stable. Don't burn any.

It is very conducive to health, if the horse is fed with it. It is a good plan to let the horse get time in the field.

Give the sprayers a dressing of the manure as removed from the stable and take all the horse material when the line will stay on an act as a fertilizer.

Marching, dead leaves, overgrown trimmings make good mulching for the strawberry bed. If you have a lot of them, run some corn stalks in the center and try the result.

A part of the poultry crop may be stored as suggested for roots that are gathered in the fall. They will give a variety for the table when it could not be had if the chickens were frozen in the ground.

In stall lives it is little trouble to prepare for winter, as they are prepared at once, and if they have a good horse supply to preparations are needed except to contract the entrance, which is done from the outside and not out of the weather.

In storing hay for winter the soot should be taken from the super and remove the impurities from the bottom of the sections. Grade and place in an erator, keeping the light and dark hay separate. Now, clean up always at the horse's entrance and help to sell the hay.

Combs should not be allowed to freeze, as the freezing cracks the comb, causing the honey to run, and making a disagreeable mess, to say nothing of the loss of honey. Extracted honey should be put in glass or earthen jars or tin pans, and kept the same as comb honey, in a warm, dry place, and never in the cellar.

When the pigs are kept without shelter, corn must of necessity be the principal ration, as it is one of the best materials that can be used for maintaining animal heat; but for growing animals and especially when well sheltered, it falls considerably below the best ration for growth, while it is not the most economical ration when the results and the cost are considered.

QUAINT AND CURIOUS.

Flying frogs are numerous in Mexico.

A person may walk through seven German states in seven hours.

It is said that mules fed on corn that has the smut will lose their hoofs.

The tusks of the largest Siberian mammoth ever dug up weighed 869 pounds.

It is held to be a gastronomic heresy to eat any but current jelly with a roast saddle of venison.

Every Japanese soldier taking part in the Korean campaign was vaccinated before being sent to the front.

It is well to remember that young partridges have black legs and "show bills. White bills and blue legs indicate antiquity.

A book has been published in London giving seven hundred and one different ways of cooking and serving the humble potato.

Umbrellas were introduced in America in the latter part of the eighteenth century, but their use at first was confined almost exclusively to women.

The Carrara marble quarries in Italy are practically inexhaustible. About 160,000 tons of marble are annually exported, most of which comes to America.

A tree that smokes has been discovered in the Japanese village of Ono. It is sixty feet high, and after sunset, every evening, the smoke issues from the top of the trunk.

In temperature New Zealand resembles France and North Italy, but the humidity is considerably greater. Rapid changes are a notable feature of the weather.

The Cairo museum has seven brooms used by ancient Egyptian women. They are made of straw and closely resemble the same articles in use today, save that the handles are not long enough for purposes of domestic discipline.

Many hundreds of manuscripts have been recovered at Pompeii. They were charred by falls, but by the exercise of patience and ingenuity some have been unrolled and read. Notice of importance has been discovered in their contents.

A dog standing thirty-nine inches high and weighing 135 pounds, as big as a good-sized calf, is owned by L. T. Wilson, of Catlettsburg, Ky. It is a German Shepherd, of the same species as Bonaparte's two favorites, and is only twelve months old.

In almost every country of Europe maize is given a distinctive and erroneous name. In Germany and Austria it is called Turkish wheat; in Lorraine it is designated Roman corn; in Tuscany it is Stellan corn; in Provence it is Barbary corn, and in Egypt it is known as Syrian durra.

Some mammoths and some other marine creatures of low degree increase their species by hibernating. A small knot or wart appears on the body of the animal, and by and by develops into a perfect, though minute, animal of the same species, separate from its parent and sets to in business for itself.

A nine-penny stamp, bearing date of April, 1775, a specimen of probably the oldest United States money in existence, was found beneath the layers of an old history a few days ago by J. N. Hooker, of Bartow, Fla. The bill was printed by John Danahy, of Philadelphia, and had printed on it the warning "To counterfeit is death."

Room for a Prophet.

The new minister had arrived at Deacon Clover's house and was to remain a few days. When the evening was far spent the deacon was escorted to his bedroom by the deacon, who said he had opened the door to the father's small apartment.

"This, Dr. Fourthly, is the prophetic chamber."

"Ah," replied the clergyman, as he surveyed his circumstantial dimensions, "it must have been one of the minor prophets.—Omaha Bee.

Suggesting a Postponement.

"One moment, Mr. Sampson," she exclaimed with a distressed look as he dropped on his knees. "I have already had twelve proposals this season, and yours will be the thirteenth—an unlikely number."

"True," he answered as he rose to his feet, his face pale; "but O! what an act to do?"

"Wait for a week, Mr. Sampson," she answered shyly; "then come again."—Philadelphia Life.

Unanimous.

A gentleman had been up in a balloon and had taken his little girl with him.

"How do you feel?" asked a friend.

"Why," said he, "when we were up but a short distance my little girl looked over the edge of the basket, and cried, 'Mamma! and I felt that way too.'"

Wouldn't Keep Quiet.

"Say, mother, will you speak to brother Sammy?"

"What's he doin' now?"

"Well, every time I hit him on the head with this hammer, he rollers."—Life.

FOR THE HOUSEWIFE.

GOOD SOFT GINGERBREAD.

A good, soft gingerbread may be made as follows: Two cups of half-finished, very black molasses, half cup of butter or dripping, one tablespoonful of ground ginger, one teaspoonful of ground cinnamon, some of allspice, half the quantity of ground cloves and salt, half teaspoonful of saleratus. Melt the fat and beat it into the molasses with the spices, add enough sifted flour to make a very stiff batter, and last add the saleratus in a tablespoonful of boiling water. Put in a well-greased pan and let it stand for twenty minutes. Bake in a slow oven, and do not cut until cold.—New York World.

FISH CROQUETTES.

For the fish croquettes buy a few fish, fry at breakfast time and then put in the refrigerator until near the hour of dinner. It is not safe to eat fish now that is kept raw until late in the day unless packed in ice. To make the croquettes: To every cup of cold cooked fish allow one large tablespoonful of butter, one-half cup of cream or milk, one tablespoonful of chopped parsley and the yolk of one egg. Season the fish with one-half of a teaspoonful of salt, a very little red pepper and the parsley. Scald the milk, rub the butter and flour together until smooth; add the scalded milk and stir until thick and smooth. Add the beaten yolk, mix well and take from the fire, add the ground fish and put aside to cool. When cool form into croquettes, cover with an egg and bread crumbs and fry in smoking hot fat.—New York Times.

Mrs. Borden's Rice Pudding.

There is, said Mrs. Borden, but one sort of rice pudding, to my mind, that can be made perfectly, and if those directions are followed, you will have a creamy, delicious pudding as a result. Put one quart of milk into a pudding pan, add about a quarter teaspoonful of grated nutmeg, quarter of a cupful of layer raisins, unsteamed, two tablespoonfuls of sugar, and two tablespoonfuls of butter. Do not heat the raisins. Stir until sugar is dissolved, and then stand the pan in a moderate oven. As soon as the milk is hot, stir a little scum from the top, stir it down and stir the rice from the bottom of the pan. Do this as fast as an earnest form. The crust should be papery, and light in color. When the milk begins to thicken, and the rice seems to come to the surface, stop stirring and allow a thin brown crust to form. Stand away in a cool place, to quickly chill. Now, if this is too thick, you have cooked it too slowly and too long. If it is too thin and milky, you have not cooked it long enough.

SCIENTIFIC SCRAPS.

Glascow, Scotland, has an underground railway in operation and two more under construction.

The Atlantic, by far the best-sounded ocean, has an area of 31,000,000 square miles, with a mean depth of 2,200 fathoms.

It would take an express train running continuously at the rate of 3,000 feet a minute 283 years to reach the sun from this planet.

The drone bee hatches from the egg in twenty-four days from the date of deposit, the worker in twenty-one and the queen in sixteen.

The largest screwdrill in the world is on Echo Mountain, near Los Angeles, Cal. It is of 300,000,000 candle-power and can be seen for 200 miles.

An ice locomotive was some years ago constructed for use in Russia. The front part rests on a sledge, and the driving wheels are studded with spikes.

Mushrooms, when once cooked, should never be rewarmed, to serve a second time at the table. After becoming cold, they are apt to develop injurious properties.

The pest is reported to have disappeared simultaneously in Hong Kong and Canton, China. The mortality rate was seventy-five per cent of all cases, and a native estimate puts the deaths at 250,000.

A man in Bremen, Germany, has invented a kind of "oil bombs" for cutting the waves, which can be fired a short distance. There are small holes in them, allowing the oil to run out in about an hour.

In the public schools of France 21.2 per cent of the scholars are short-sighted, in those of Germany 35 per cent and in those of the United Kingdom 29 per cent. The percentage of myopia is highest in the classes of rhetoric and philosophy.

Meteorologists say the heat of the air is due to six sources: 1. That from the interior of the earth; 2. That from the stars; 3. That from the moon; 4. That from the friction of the winds and tides; 5. That from the meteors; 6. That from the sun.

A thunder storm in Trimble, Tenn., injured Spencer Mills and Billy Goldy to hit under a tree. Lightning struck the tree and rendered the men unconscious. When they recovered some hours later, Mills' skin was as black as that of an African, and it has continued so ever since.

No Substitutes

For Royal Baking Powder. The "Royal" is shown by all tests, official, scientific, and practical, stronger, purer, and better in every way than all other Baking Powders. Its superiority is privately acknowledged by other manufacturers, and well known by all dealers.

If some grocers try to sell another baking powder in place of the "Royal," it is because of the greater profit. This of itself is good evidence of the superiority of the "Royal." To give greater profit the other must be a lower cost powder, and to cost less it must be made with cheaper and inferior materials, and thus, though selling for the same, give less value to the consumer.

LOOK with suspicion upon every attempt to palm off upon you any baking powder in place of the "Royal." There is no substitute for the "Royal."

CORNER IN ELK TEETH.

A Montana Man Who Has More Than 80,000 of Them.

John B. Luskamp of Billings, Mont., practically has the elk tooth stock of the entire country, says Forest and Stream and to his already enormous supply he is constantly adding. The Indians and hunters bring teeth to him from all over the country. Not everyone knows that the elk teeth, or rather the tusks, of which only two are found in the mouth of the adult elk, have a practical commercial value. The teeth are used as jewelry, mostly as pendants on watch guards or as insignia of the secret society known as the Elks. The value of a tooth ranges from 50 cents to \$2.50, according to its size, color, and marking. Mr. Luskamp has now over 8,000 elk teeth deposited in safety vaults. Many of the old Indian dresses were highly ornamented with elk teeth, some of them being fairly covered with the teeth. Mr. Luskamp has lived on the frontier all his mature life and understands Indian trading perfectly, and he has sometimes paid over \$100 for a single ornament thus ornamented, caring of course for a thimble but the teeth. The Indians drill the teeth to fasten them on their dresses and this does not injure the value of the teeth, but they have a much worse habit of sometimes staining the teeth a bright red. This dye cannot be extracted, and depreciates the value of the elk teeth for a white customer. The Indians do not dye the teeth so much now, since they have learned they can sell them for more in their natural state.

Why It Goes Zigzag.

Lightning travels in a zigzag course because it passes through different strata of air, and, being restrained in its passage, turns from side to side to find the easiest path.

In Our Great Grandfather's Time,

big bulky pills were in general use. Like the "chickens" of that decade they were big and clumsy, but ineffective. In this century of enlightenment, we have Dr. Pierce's "Little Pills," which cure all liver, stomach and bowel derangements in the most effective way.

Assist Nature a little now and then, with a gentle, cleansing laxative, thereby removing of fending matter from the stomach and bowels, toning up and invigorating the liver and quickening its tardy action, and you will remove the cause of a multitude of distressing diseases, such as headaches, indigestion, or dyspepsia, biliousness, pimples, blotches, eruptions, boils, constipation, piles, fistulas and maladies too numerous to mention.

If people would pay more attention to properly regulating the action of their bowels, they would have less frequent occasion to call for their doctor's services to subdue attacks of dangerous diseases.

That of all known agents to accomplish this purpose, Dr. Pierce's Pleasant Pills are unquestionably the best, by the fact that one pill, they are always in favor. Their secondary effect is to keep the bowels open and regular, not to force constipation, as is the case with other pills. Hence, their great popularity, with sufferers from habitual constipation, piles and all the ailments resulting therefrom. A free sample of the "Pilllets," (1 to 7 doses) on trial, is mailed to any address, post-paid, on receipt of name and address on postal card.

Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

A Name to Conjure By.

"Thomas Fransligterkyskyfundernickelkelpensky" was written on a card which an anarchist-looking individual handed to Justice Kane. "Looks like an alphabetical riot," ventured his Honor uncertainly. "Nein, nein, das ist mein name; I have you some business mit," was the reply. Judge Kane warmly assured his visitor that the clerk would attend his slightest wish, and hastily left the room.

Disgruntled Germans.

Great discontent is shown in Germany at the large number of pensioned officers in the army. Since the present emperor ascended the throne in 1888, 4,000 have been forced to resign.

A pretty man is seldom good for anything else.
