H. A. LONDON, Editor.

THE tariff law, passed by the last Congress, is seldom spoken of new

force only a few months-consider ways made quictly and silently, stn- pure silver monometalism as dicted that it would shut down and any purpose. A striking illustration of this characteristic of his we once industries, that were dependent on their held at Raleigh, one night, for the maintenance. But none of these purpose of organizing the company more all nations, we favor the retention of the purpose of organizing the company more all nations, we favor the retention of the second organization to the minimum radio persons out of employment and cause immeasurable persons out of employment and cause immeasurable persons out of employment and cause immeasurable persons out of employment indicates that in the paralyze inclusions and proposed to the second organization to the employment and cause immeasurable persons out of employment and cause immeasurable pers predictions have been realized. On to hold the State Exposition of that tion of the gold dellar as the ultimate standard of value. But we also the contrary all manufacturing extablishments are now as prosperous made and a considerable sum of silver as can be maintained without 'as they have ever been. Indeed a money subscribed as stock and the impairing the credit of the Gavern

being thrown out of employment. new industries are being established giving employment to more work men. And instead of their warrebeing reduced, as predicted, their 'wages are netually being increase Nearly every day the papers annonnee that the wages of the operatives in some factory or mitte have been increased. As an illustration of the teath of this statement and as one of many studiar instances, we cite and copy the following:

"Curexon, June 20 .- The present steel industries throughout the cour try has shaken the high protection theories of General Manager Walker of the Illinois Steel Company. When the Wilson bill was weath

ering the legislative storms of the House and Senate, Mr. Walker is clared that if the bull became a inthe schedules then in force woll close most of the iron and stee plants in the country, drive the workmen out of employment an send wages down to the starvation

point.
The recent reaction from the lop. period of business depression has completely upset Mr. Walker's tariff views, and it is said he is becoming sconvinced that the country's indus trial interests had never a mor prostising outlook than now.

The company is operating its plants in North Chicago, South Chi-cago, Joliet and Milwaukee night and day. Today notice was poster-taising the wages of 7,000 men by

Such a practical and forcibia objeclesson as is taught in the above tele gram speaks much louder than any gram speaks much louder than any people, in common with all the nation words or arguments could. This is of the earth, have been suffering, we one of many similar instances of the wages of workmen being voluntarily Increased by their employers, and all this under the democratic tariff sive how the crit can be summarily law which, it was predicted, would removed by siver legislation; there reduce workmen to beggary!

BECAUSE democrats may differ and disagree on the "free silver" question is no reason or excuse for their dis rupting their party. And it is folly if not political suicide, for the fresilvorites to attempt to drive out of the party those democrats whom they call "gold bugs"; and in like manner it is supreme folly for the opponents of free silver to attempt to drive out of the party, or stigras tize as populists, those democratwho advocate free silver.

There has rarely, if ever, been any time in the history of the democracic party when there was not a disagreement and difference of opinion among its strongest members upon some one question. Even when the dem stratic party so strongly advocated tariff reform and the great bulk of its members were bitterly opposed to a protective tariff, many staunch and able democrats differed and disagreed with their party, and nobody thought of driving them out. It is well known that the Hon. Samuel J. Randall, of Pennsylvania, was one of the ablest, treest and most distinguished democrats in America, and yet he differed widely with his party

on the great tariff question. And we must respectfully insist now that democrats may differ on this financial question without im-

most carnestly deprecate any attempt | merchants, a rush to force collections | Weekly | Weather | Crop Bulletin. to drive any democrat out of his of all debts, a bank panic and count party because of this difference of less failures of business men, corporopinion. We all surely ought to which the whole country, including have enough else in common to al-low each other to differ on at least Fourth. We assert that universal one question!

RALEIGH mourns the loss of her now and fresh impetes has been given to all manufacturing industries, and new ones are being estabs. Sished all over the United States.

It was also contended by the eptember of our new democratic architectures and the formal states are sentenced of the company met in the lands of the people, thereby some feet of directors of the company met in the lands of the people, thereby some permanents of the company met in the lands of the people, thereby some feet of directors of the company met in the lands of the people, thereby some feet of the footing power of the mentor diminishing the proclassing ment or diminishing the proclassing or debt-paving power of the mentor diminishing the proclassing or debt-paving power o beneats of our new democracle rarely assess of the appeared in the of silver erroneous years the unselves new that it would demoish and dewe that it would diminish that deerease the wages of all laborers and
wage enturers. Indeed it was last to

> hill, was passed by the Legislature d New York, a few weeks ago, that s now eventing considerable trouble in that State. By the terms of this till a colored person must be ad mitted just the same as a white peron to any hotel, restaurant, barber shop, theatre to other place of public ac communication or amusement. And be proprietor of any such place

This is one of the reforms given to people of New York by their re publish begishome, but it is one incis very dististeful to a majority of the white citizens of that State. or wall all their boasted love for the negro our Northern brethren have as little use for him socially as we of the South.

THE Soriesville Landmorth, no estisfied with being the best Weekly to the State, is now being published ora semi-weekly, and ere long will no doubt become the best Daily in the State.

Democratic Sound Money Club. A number of the leading democrats d Wilmington held a meeting, a few bys ago, and organized a "Demo ratic Sound Money Club" and adopt d a series of resolutions entitled a Declaration of Principles", which he limona is requested to publish as follows:

"While fully appreciating the grea suchess depression from which our cat it is caused by an insufficiency of money either in this or in any other country; and we do not per are we declare our adherence to the ollowing principles, which we confi-

lently assert are in accordance with settled Democratic dostrine: First. We hold it self evident that the powers of the legislature should be limited to the enactment of such aws as shall interfere as little as pos-able with the personal liberties of the couple and shall allow the freest and fallest scope to the independent de-selopment of each individual; that alg vernmental protection, whether given to the manufacturer or to the person owner or to any other class of persons is of ions and unjust, that no everement can by mero legislative at create the prosperity, wealth, or ontentinent of all of its citizens, and hat all schemes of legislative action that are offered as panaceas for human-ils are founded on a misconception of the functions of government, are laise in theory and are fraught with

lauger to the common weal.

Second. We believe that the pres ent free silver agitation is especially querful in its results to our section of the country, in that it tends to create appreheusion in the minds of capital ists and prevents them from engag-ng in industrial enterprises and giv og cuployment to labor. The South andeveloped resources, needing only capital operating with confidence.

Third. We believe that the mere amouncement upon the morrow of an election that the "Free Stiver accement was triumphant would has a scarable among holders of therican securities to sell out; that ti is who lesale selling would cause an unmediate and heavy decline in all

experience teaches that it is beyond the power of any Government to make gold and aliver circulate as money in colimited quantities at a adays and yet its good effects are greatest benefactor in the death of ratio that does not correspond with daily being experienced and becom- Mr. R. S. Pullen, who died in that the market value of the two metals. ing more apparent. While it was eity on last Sunday, in the 73rd year not such a revision and reduction of all his age. While contributing the former tariff law as was generally greatly to the material upbuilding.

Heired by democrats, yet it was so of that city, he will be gratefully regarded in make the passage of an act by the United States alone providing for the free and unlimited coinage of silver at a ratio of 16 to 1, when the market ratio is 32 to 1, in great an improvement on the odious members in the generous and published. and oppressive McKinley bill that I c spirited denor of the site for the salmost eliminated tariff diseased in final piece as commonly believed, would, in the first instance, immediately drive out of the same tariff law has been in local and benefactions were also force only a few months—consider ways made quictly and silently, starting the current of the site for the sate of the same of all pieces as commonly believed, would, in the first instance, immediately drive out of circulation six bindred and the site for the sate of th ably less than a year—and its full dissess that a year—and its full effects have not had time to be thorsoughly selt, but even thus far the country has been greatly benefited. ts opponents and ominously pro cash whatever he wished to give for contracts; and in fact paralyze inclus-

ed that thousands of workmen worms be thrown out of all employment and their families be reduct to be garry. But this also proved to be a false prophecy, and the result has been just the reverse of what was predicted. Instead of workmen
