SAILORS' SUPERSTITIONS. They Have Lucky and Unlucky Ships, Days and Saluts.

The old superstition as to luck and annucky days has largely passed away. Foreign mails start and arrive on Fr day without any regard for the beliefs which were accepted at one time beyoud argument by most sailors. Some thought otherwise, as will appear later. erally speaking, all saints' days and church holidays were regarded as un lucky and certain days in each month was regarded distrustfully. In au old almanac of 1615 we find that July 19

20, 24, and 31 were noted as "no good anchorage." Sunday was always look ed upon as lucky, presumably in reli ance on the maxim, "The better the day the botter the deed," and the fact of our Lord's resurrection having taken place on that day. Monday had no particular reputation for good or evil; Tuesday was the same except among Spaniards, who said

"Don't marry or go to sea or leave your wife" on that day. Wednesday was the day of Odin, the Norse god, and lucky; Thursday was named after Thor, the Norse god of war, and was auspicious. Friday was the day dedicated to Freya. Norse goddess of love, and having ref erence to women was not liked on this ground. The true reason for avoiding Friday was, of course, the fact of the crucifizion having taken place on that

day, and sentiments of special veneration for the day converted into a feel ing of fear for the results which would follow its violation. The Spaniards, on the other hand, had a considerable veneration for Friday, and believed that some occult influence enabled Co-lumbus to successfully clear out of port and discover new land on that day. Enturday was gene ally considered aus pictous. The origin of the phrase, "a capful of

wind," can be traced to a h Erte VI, who died in 970 A. D. He was credited with the useful power of directing the wind to blow him where he wished by the simple method of turning his cap to that point of the compass. His powers were much appreciated and trusted, and resulted in preciated and trusted, and trusted, the term is no evidence as to whether he could

regulate the force of the wind as well as the direction; presumably he could, or his faithful believers would not have been so many. "A bagful of wind" is another confinon expression and indi-

A Mania for Snuff Boxes.

Edward Wortley Montague, the eccentric son of Lady Mary, is said to have possessed more shuff boxes than would suffice a Chinese with a hundred noses a collection which, perhaps, was never equaled, unless by that of King George IV., who was not less extravagant and recherche in souff and souff boxes than in other things.

ants are his tenants. He is justice of the peace, and is greatly interested in the welfare of his people. The town has several shops, stores, two churches and a school, and it would be hard to find a white town with a better record than this black town of Judson. The Modern Beauty Thrives on good foot and sunshine, with plenty of exercise in the open air. Her form glows with health and her face blooms with its leanty. If her system needs the cleansing action of a lax tive remedy, she uses the gent'e and pleasant Syrup of Figs. Made by the California Fig Syrup Company.

A Black Town. Not the town, but the people. The town is on an island in the Mississippi

River, just above Memphis. The island

is owned by a negro planter. Elmer Judson, this negro, the son of a

wealthy white planter, contested his father's will, and the courts duly al-

lowed him a part of the property. The

island is eleven miles long and eight wide. Judson, the town, has a popu-lation of about four hundred and fifty

inhabitants, all of whom are black, and no white person is allowed to come

there except as a visitor. The town

is well organized and governed, and Mr. Judson is an educated man with

progressive ideas. He owns everything

on the Island, and most of the inhabit
