

THE UNCHANGING.

For fleet the hours slip by
With fast unvarying.
The sun is lost the sky,
Our shadows are cast;
The noon comes Author's bread
With preages of death.

Yet, though the red rose fade,
And the green leaf is wane,
Death is not dismaying;
Though comely we have
To our dust return,
Down the gray paths of age.

There is something that Time,
The great unconqueror,
May not blot with his rime—
The fond, true heart of her,
Girt with Love's aspodels,
These Youth preserv'd.
—Harper's Bazaar.

LOVE Levels All.

"Is this the ferry?"
The speaker was a tall, fair girl, whose pale countenance beauty was accentuated by her morning dress and black hat, and her inquiry was addressed to a handsome broadshouldered young fellow in flannels who was tacking a boat up to the steps.

As the young man did not reply, the girl repeated her question.

"Can you tell me, please, if this is the ferry?"

Then he looked hasty around, and as there was nobody else in sight, he seemed to come to the conclusion that he was the one to whom the lady was speaking.

"I beg your pardon," he said, "I did not know that you were addressing me. This is Twickenham ferry."

"Thank you," responded the girl. "And will you be good enough to tell me where?"

"With pleasure," was the reply, and stepping forward, he assisted her into the boat, shoved off, and commenced sailing across the river.

When they arrived at the opposite bank, and as the young lady was being assisted out, she asked:

"How much do I owe you, please?"

The boy assumed his herald and remained in it a few moments before he replied:

"The fare is a penny, but you had better pay what you come back."

"I am afraid I shall have to," retorted the girl, looking him in the eye.

"For I have nothing less than a shilling."

"Shall I expect you down this afternoon for a row?" inquired the young man.

"Very probably—I think so, and by thee, what's a name? What's about shall I call for?"

"My name is John, but my friends usually call me 'John'."

"Very well, John, I am at the landing place about half past 2." And she bade him with that grace and vigor which is inseparable from a girl who has been brought up in the fresh air and athletic surroundings of a country life.

The bold boy had barely struck when the young lady made her appearance at the ferry, Jack was waiting for her, and without any loss of time they got aboard and started up the river.

This was a memorable day with Geraldine, for it was her first introduction to the "Silvery Thames," and as she leaned back on the cushions in the stern shore, the ripple of the water and the songs of the birds combined with the rhythmic sound of the boatman's oars to make sweet music, which she enjoyed in silence until they passed opposite Tapet's Villa, which had only pointed out.

"A grand place!" exclaimed Geraldine, with enthusiasm.

"Much overrated," answered Jack. "His brain was all crooked as his figure."

"You have been misinformed," observed Geraldine. "Of course, you have not read his 'Iliad'—it is not a book that would appeal to you, but—"

"Of course, I have," interrupted Jack. "And his 'Odyssey,' too. But I would rather hear one chapter from 'Child Harold' than the whole of Pope's works."

This led to a disputatious argument, in which Geraldine lost her temper, and was able enough to say:

"You are evidently an exemplification of the old saying that 'a little learning is a dangerous thing'."

"Well, I'm bothed!" exclaimed Jack, with a satisfied smile, "if that isn't a little too bad. For, if there was one thing that I was supposed to be good at, next to rowing, it was Greek."

"You seem to be very well educated for your position in life," remarked Geraldine.

"Oh, I don't know," answered Jack, and he added quickly, "the free Rover is no convenient you know. But I might return the compliment, and say that you seem very well read for a young 'lady'."

When they returned to the ferry Geraldine exacted her purse; but, as she was taking out the money, Jack said, pointing to Hammetton, the ferrymen:

"That is the person to pay, please. I am not allowed to take any money."

After she had gone Jack said to the ferrymen:

"Don't forget, Dick, if she should happen to make any inquiries, that I am only one of your assistants."

"All right, sir," answered Dick, with a knowing look, "I won't forget."

For the next month Geraldine went on the river every Tuesday, sometimes in the morning, sometimes in the afternoon; and those boating expeditions were extended on many occasions up the river to Kingston, Moseley, and Smethwick, and a tennis tournament that she taught tennis and art—for, as a rule, their opinions on these sub-

GREAT YERKES GLASS

ENORMOUS TELESCOPE WHICH HAS BEEN COMPLETED.

New Observatory at Lake Geneva.
Via Object Glass and Their Manufacture.—The Galactic Operations Involved in Grasping a Large Glass.

Some Big Telescopes.

The opening of the Yerkes Observatory was one of the most notable events in the history of astronomy, and for the telescope that put it in operation is the most powerful instrument that has ever been turned to the heavens. The telescope at the American Museum is a fine, round instrument, and is intended for general observations, while the Yerkes is a large, powerful instrument, intended for astronomical purposes, and is 40 inches in diameter. The glass of the Yerkes telescope is a large, clear, and strong specimen of glass, and is intended for the purpose of grasping a large glass.

The glass of the Yerkes telescope is a large, clear, and strong specimen of glass, and is intended for the purpose of grasping a large glass.
