In case a draft should be necessary. And it is said that some of our colored citizens are much alarmed at the idea of having to go to Cuba. It is suggested that the colored soldiers could stand the climate of Cuba better than the whites could and would be less liable to yellow fever, which would kill many more men than the Spaniards would shoot. And, as so large a proportion of the Cuban insurgents are colored people, the colored people of this country ought to be the more ready to help them.

The country was highly favorable to them, having but little difficulty in finding food and water. The horses were well fed and the men were well clothed.
