

THE re-election of Senator Pritchard will be the main object of the Republicans in the coming campaign. In order to accomplish that result they will strain every effort and resort to every species of political strategy and schemes.

As the Legislature is the body that will elect the Senator the Republicans will try to control that body. Of course in counties where they have an unopposed majority, they will nominate straight-out Republican candidates.

Of course every revenue "doer" and all other Federal office-holders—and all who are Federal office-seekers—will most actively and zealously strive and work for Senator Pritchard's re-election. The reason is plain. He is the chief "boss" of the Republican party in this State and is the dispenser of the Federal patronage.

The first volume of the census reports of 1900 has at last been issued, and for a copy we are indebted to Senator Simmons. It is quite a bulky book and contains much interesting information as to the population of the United States, from which we have taken the trouble to compile some statistics that may interest our readers.

The population of the United States, including Alaska and Hawaii, was 76,003,287 in June 1900. This is an increase of 15 per cent on the population of 1890. Nearly Carolina's population was 1,893,810, an increase of 17 per cent in ten years.

The price of silver is lower now than ever before. The market price of the silver in a silver dollar is only thirty-seven cents. And yet farm products are now much higher than they were a few years ago when silver was worth much more than it is worth now.

This must seem strange and unaccountable to the wise of statesmen (and the woods were full of them) who pretended to know all about finance, and so strongly insisted that the price of all farm products decreased with the price of silver.

For many years past the law of this State has required the county commissioners, in drawing jurors, to select the names of such persons only as have paid tax for the preceding year.

Now if this law is all right, and nobody complains of it, why should there be any complaint against the law requiring the payment of poll tax as a prerequisite for voting?

Had you thought of this? And it is all so simple to say the law discriminates against those who do not pay the tax.

The law requires a voter to pay his tax before he can vote. It is a simple matter to say the law discriminates against those who do not pay the tax.

Let us see what the law requires. It is a simple matter to say the law discriminates against those who do not pay the tax.

North Carolina At. Ship. Winston-Salem, N. C., May 2. Mr. J. H. Hill has just completed a model of his air-ship or dirigible, on which he has been working for two months or more.

Mr. Hill and others interested with him in the invention, hope to organize a stock company at once. A large machine will thereby be built for sailing purposes.

Mr. Hill proposes to go to the coast and have it ready for the proposed contest at the St. Louis Exposition.
