Every panie that has occurred in this country since the war has been either during a Republican beginning with the failure of Jay Cooke nearly all the banks of the caused by Republican legislation as the first cause, being largely the work of Republican financiers and manipulators. The suggestion that the Wilson tariff of August, 1894, had anything to de with the panic of 1893 is mere was in full swing over a year before that law was enacted. As is a well known fact, the plates on which were issued the bonds President Cleveland, shortly after his second inauguration, had been engraved by Harrison preparatory to issuing the bonds before he went out of office. This should set at rest the oft-heard, though

Coming down to the present time, the panic of 1907 was clearly a Republican panic from every standpoint. But for the iniquitous Dingley tariff preventing the sale of our manufactures abroad, our prosperity would have been on a more solid basis. Had the delphia Bulletin. Republican banking laws been adequate, the panic would have been arrested at the outset. With a Republican president and large Republican majority in both branches of Congress, that party alone is responsible for conditions which made possible this, the most serious, panic this country has ever known and should be held accountable for it at the next election.

It has been officially announced that on and after next Thursday. October 1st, the rate for letter postage from any place in this country to any point in England Scotland, Ireland or Wales will be the same as that charged for local postage in the United States. The rate will then be two cents an ounce instead of five cents as it is at present. The fact that a person in San Francisco will soon be able to send a letter to London, out." six thousand miles away, for only two cents seems hardly possible and is only made so now by the great volume of business which is daily transacted by mail between this country and the "mother country."

This great reduction in postage for such a distance is in striking contrast to the rate charged in this country within the recollection of persons now living when it required 25 cents to carry a letter between some points in this State and 50 cents from here to New York.

When Congress convenes in December the two magnificent our next Governor, has been mak- use of the Members will have been ing an active campaign in the completed. The offices of the western part of the State and has Representatives were in fact used last Spring but the Senate offices begun a year later were not ready for occupancy, and the Senators will have their first experience in them this winter. The latter of fice building lies to the North of the Capitol and is connected with it by an underground passage. It is a beautiful white marble building which will cost the Government four millions of dollars. It will have every modern conven-

ience of an office building. The interior is finished in marble and mahogany and while the offices will be elegantly furnished. the general effect will be severe. rather than luxurious. For many years there has been much complaint about the crowded quarters allowed the Senators in the Capimarket had two little dark rooms

in the basement last winter. They were the ones vacated by Senator Clark of Montana who was the richest man who ever sat in the ed of defective material (which among these there are not a few gold trimmings (a single knob costwho are grumbling about leaving ing \$1,750) and lined with silk, in the Capitol. They protest an inch. that they will be farther from I've war department has given their work and more inaccessible to their constituents. Others who have been housed in an old brick building originally erected for a hotel, across the street from the Capitol are delighted at the prospect of a change. One Man Who Ordered Dishes That He Could Not Eat.

When people have more money than they know what to do with office buildings designed for the they sometimes develop a remarkable ingenuity in devising methods of squandering it, as in the ease of the French marquise who has her bed strewn with rare and exquisite orchids, at a cost of several thousand dollars a week.

Even more remarkable is the story told of a wealthy Frenchman who dines twice a week at a famous Parisian restaurant. His appetite is the poorest, but he always insists on having a tureen filled with a specially prepared soup placed before him. Next comes a huge joint of meat, from which he cuts one tiny slice. Then follow four quails or a large chicken, of which he eats one mouthful. His dessert consists of four grapes and a sup of coffee, while during the meal he just said notes, request being made up n moistens his lips from a bottle of me by the holders of said notes to expensive claret and another of the finest champagne.
