ONLOOKER

With muscles weary and worn And a warning light in her eye She swung with vim and a vengeful grim And swatted a luckless fly. Swat! Swat! Swat!

Swat! Swat! Swat! Till the brain begins to swim. And swat—swat—swat— Ah! I landed him on the arm. Big, and little, and all. Fat, and skinny alike— I swat them up on the parlor wall Wherever I chance to strike.

What He Found Out. There was once a man who took all the axioms for their face value, and he went from drug store to drug store, asking: "Can you sell me an ounce of prevention?"

One Consolation. "Yes," acknowledged the mother of the child, "Willie has a hot temper; he inherits that from his father. And he has a way of telling things that people have said and which they would not like to have repeated; he inherits that from his father's grandfather. And he once in a while tells fibs; he inherits that from his father's Aunt Emily, who was not always as exact in her statements as she should have been."

Lacked Interest. "How did you succeed with the new shoe you invented for women?" we ask our friend, the inventor. "It didn't go at all after the first season," he replies, sadly. "Didn't? But it seemed to be artistic and comfortable." "Yes, but the doctors did not discover any new disease that it caused, and of course it didn't attain any popularity."

The Real Hardship. "I suppose," said the onlooker, when the steely climber came to the ground to get his dinner, "that your line of business has a great many trying episodes." "Yes," responded the steeplejack. "Would you mind telling me what you consider the worst?" "It's having to hear people get off that joke about me working overtime."
