H. A. LONDON, Editor.

Congress will convene next Monday, but it will be the second session of the old Congress (the 61st) and not the first session of the newly elected Congress. As heretofore stated by THE REC-ORD the newly elected Representatives will not take their seats until the first Monday in next December, more than a year from their election. The ensuing session of Congress is known as the short session, expiring on the 4th of next March, and no important legislation will be enacted.

This will be the last session of many Congressmen, both Senators and Representatives, the late election having retired to private having them properly drained. life an unusually large number. Those Republicans who survived the late landslide will find a very great change when they return next December to the 62nd Congress. Instead of their being in a large majority, as they have been for eighteen years, they will be in a large minority, the official returns showing that the Democrats will have a majority of 64 in the next House. Especially striking will the change be to those Republican Congressmen who have been chairmen o committees. There are thirtysix committees of which Republicans are chairmen now, and all of them will be supplanted by Democratic chairmen in the next address and excursion trains will House of Representatives. The chairmen of every one of these committees has a "soft berth" with many desirable perquisites, which the present occupants will sadly miss and which will be correspondingly enjoyed by their struction will be of great benefit for years."
