The committee says it issued the statement "in order to clear up any misapprehension that may have arisen from recent newspaper comment, especially in the South, and to make clear the ends to which the committee has been working.

Durham .- Reports from the country districts tend to add to the size of the defeat of the farm-life school though the voters for the school outnumbered those who openly opposed it by voting against it.

It has been impossible to learn from all precincts the exact vote, but Carr Township, the Wake annexation, which had been counted to give a small majority for the school, turned against it. The country, which would have received all the benefit and paid \$500 as against the city's \$4,500 for the support of the school, slaughtered it, as the country always does here.
