School Teachers' Pay.

The compensation of salary paid to the public school teachers of this state is entirely too little. An ordinary day laborer without any education is paid more than the average teacher, to whom is entrusted the education and training of the public school children of this state. This condition of affairs is simply disgraceful and ought to be remedied as soon as possible. Our state superintendent, Dr. Joyner, has recently published a statement from which we copy the following extract: "A serious situation confronts

the public schools of the state. Teachers' salaries are utterly in-THE State Journal is one of adequate to meet the greatly in slightly during the present year, papils in school. JESSE COLE. Greenville, N. C., Jan 1, 1918.

Contagious Diseases. Editor of The Record:

Nothing so destroys the efficiency of work at school as contagious diseases among the pupils. It is no wonder that teachers refer to ou breaks of measles, whooping cough, diphtheria and other diseases in their schools as 'abominations," for nothing else so cripples their work, handicaps their pupils and makes teaching a burden as the continued presence of illness in school

ened bod and a lessened vital ity. It is under just such condi tions that little bodies often break down and an education bethe class suffers. Oftentines it is held back or turned back to iccommodate those kept away on ac ount of sick tess Teacher and oupil are both handicapped. The teacher is now regarded

n the light of the new state quarantine law as a necessar gent in the centrol of contagious diseas s. While she i- required by the law to comply with several rules in the event of a case of a contagious disease in her school, there requirements are no more than the precautions she would therwise want to take for the good of her school and the health of her pupils. By taking these precautions, suggested in the av, it is often possible for her to stop an epid mic at its source and save the school and the com munity much sickness in 1 maleaths. It is furthermore possi ble by ke p ng the children under strict rules and observation. o keep the school open whe several weeks would be lost for all the pupils

In case of an outhreak of some in a few day was over his rold " ontagious disease in school, the teacher can in the first place, report the case to the county quar antine officer; she can teach th children as to the ways and methand give them the free health SALE OF VA UABLE ods of preventing the disease. literature treating that particu- rior cours of ha ham e u v. lar disease which is supplied by cause entitled "Chas A.
