

The Itching and Sting of Blazing, Fiery Eczema

Seems Like the Skin Is on Fire. The source of Eczema is in the blood, the disease being caused by an infection which breaks out through the skin. That is why the most satisfactory treatment for all so-called skin diseases is S. S. S., for this remedy so thoroughly cleanses the blood that no impurities can remain. Get a bottle today, and you will see results from the right treatment. Write for advice. Address Medical Director, 110 Swift Laboratory, Atlanta, Ga.

Harmless, purely vegetable infants' and children's regulator, formula on every label. Guaranteed non-narcotic, non-alcoholic.

"Bless Its Heart—It's Happy Now" because its healthy stomach digests food properly, and bowels act as they should, after using

MRS. WINSLOW'S SYRUP

The Infants' and Children's Regulator

It is a real pleasure to give this invaluable preparation—and babies and young children like to take it. Mrs. Winslow's Syrup never fails to overcome constipation and brings remarkably quick and gratifying relief in wind colic, diarrhoea, flatulency and the many other similar troubles. Add a few drops, depending on age, to each feeding. It keeps baby's bowels regular.

It is the best remedy that medical skill has ever devised and endorsed for feeding babies, as may be quickly proven by reading the complete formula below which appears on every label.

MEANT FORM OF CRITICISM

Original Expression, "Getting the Dickens," Was Not, as Many Think, Something Profane.

Sometimes, somewhere, from somebody we all get "the Dickens." And those of us who become prominent get it more than the others.

Among those of us ordinary mortals who occasionally find relief in letting off steam in the form of something more expressive than slang, there seems to be a common misconception that "getting the Dickens" is a modification or abbreviation of (Heaven help us!) "getting the devil." It is not. It is a harmless, legitimate and respectable expression that may be used with impunity in the best of company. It is simply an allusion to our old friend, Charles Dickens.

Though immortal as a novelist, Dickens was well known in his own time as a newspaper man. So vitriolic is he said to have been in his attacks on faulty public officials or other prominent men that gradually it came to be said, when anyone was criticised by him, that he got "the Dickens."

Peace and Quiet.
Vicar (to parishioner who has recently lost his wife)—You must feel very lonely now, I'm afraid, Mr. Judkins?
Mr. Judkins—Yes, sir; it is lonesome—but it is quiet!—Passing Show, London.

Some men waste a lot of time trying to convince others that they are truthful.

SKIN ERUPTIONS ON THE FACE

are unsightly and mar the appearance of many a woman whose face would be otherwise attractive. There is no need for this. Just get a box of Tetterine and use it regularly and you will be surprised how quickly pimples, blotches, itchy patches, etc., disappear and how soft and clear the skin becomes. Nothing better for eczema and other skin troubles than Tetterine. Sold by druggists or mailed for 50c. by Shuptrine Co., Savannah, Ga.—Adv.

REASON IN LOWER ANIMALS

That They Possess More Than Mere Instinct Seems to Have Been Abundantly Proved.

In the woods when male deer get to fighting the rattle of their clashing antlers may be heard a long way off, and sometimes other males hearing the sound make toward it and ture away the female over which the other two are fighting.

Hunters frequently employ this knowledge of deer habits to decoy bucks into range of their rifles by rattling together a couple of sets of old antlers.

Take it all in all, it is hardly fair to the animals to say they merely possess instinct, when we have so many instances of their reasoning powers. If monkeys were able to preserve the best thoughts of each generation of their species as humans do, with the printing press—well, anyway, it is too bad that Garner didn't live to establish on the Florida coast his monkey colony. Had he done this, who knows what startling discoveries he might have made concerning their intellect!—Exchange.

India Silk.
There are 1,000,000 persons in India engaged in the production of silk. Caterpillars and moths of the mulberry silk industry of India are entirely domesticated creatures.

TANK UNITS FOR NATIONAL GUARD

EIGHT BATTALIONS INCLUDED IN SCHEME FOR MILITARY ORGANIZATIONS.

PLANS FOR SERVICE SCHOOL

Officers and Men From Each State to Be Sent to Camp Meade, Md., for Six Weeks' Intensive Training Course.

By JAMES P. HORNADAY.

Washington. — The new national guard which is being rapidly organized will take on some features that were unknown to the guard before the world war. It will be a modern military organization in every particular. Tank units will occupy a conspicuous place in it. Four light tank battalions are included in the plans for the reorganization, on the basis of one battalion to each corps of four divisions; battalion to consist of three companies of 25 tanks each and the strength of each battalion to be 32 officers and 456 enlisted men according to a decision of the secretary of war under date of October 4, 1919.

The chief of the militia bureau is directed to apportion tank units so that they may be utilized to the best advantage in training with the infantry, and so that when united the companies will form complete battalions at the rate of one battalion per corps of four divisions. Under existing law, the appointment of officers of the national guard of a state is vested in the governor thereof, and when not in federal service no officer can exercise command over individuals or units pertaining to another state. Since it would be impracticable to assign an entire battalion to one state, there can be no battalion organization at this time; the companies are so allotted, however, that when called or drafted into federal service, each corps will have one tank battalion.

How Apportioned.

Tank units are apportioned as follows: Company A, New York, Company B, Pennsylvania, Company C, Massachusetts, Company D, Texas, Company E, Tennessee, Company F, South Carolina, Company G, Illinois, Company H, Ohio, Company I, Wisconsin, Company K, California, Company L, Washington, and Company M, Minnesota. The development of the company will be gradual starting with the organization of one platoon in each company. After the organization of company headquarters and one platoon, it will be possible to organize detached platoons for training purposes; the platoon has not the personnel for independent operations and under no circumstances should the platoon be subdivided. It is required that detached platoons, if any, be so located as to allow of frequent inspection by the company commander and to facilitate training of the company as a whole.

In addition to the general moral, educational and military qualifications required for all officers, those belonging to tank units must be possessed of "superior physical and mental activity, with a practical knowledge of gas engines and operation and emergency repairs of motor cars." Enlisted men in addition to being of good character and physique must "possess self-reliance and resourcefulness to a high degree and have had some experience as chauffeurs, tractor drivers and auto mechanics." Pay and allowances for enlisted grades are the same as for like grades in the corps of engineers. For the present, only the training equipment will be issued—three MG tanks and one 37 mm. gun tank. When the three platoons of the company have been organized and instructed, the remaining two training and reserve tanks, the company commander's tank, signal tank and 15 combat tanks will be issued, with the distinct understanding and requirement that the 15 battle tanks will be kept in readiness and that the training tanks only, will be used.

Locations of Platoons.

Locations of tank platoons in the 12 states will not be authorized without detailed indorsement of a designated inspector-instructor, showing ample and suitable storage facilities for tanks, equipment, gasoline, oil and ammunition, and available terrain for training and operation with written agreement for its utilization; ordinary rough pasture land is preferable, and not less than five acres should be available. Exclusive use of this land is not necessary. A suitable garage or other safe storage place having a floor space approximately 20 by 10 should be provided for each tank issued.

Plans have been formulated for the establishment of a special service school, tank corps at Camp Meade, Md. One officer and three noncommissioned officers from each state will be sent to this school for a course of intensive training of about six weeks' duration at a date to be announced later.

A tank company will consist of nine commissioned officers, one captain, two first lieutenants, six second lieutenants and 132 enlisted men; 19 sergeants, 31 corporals, two cooks and 80 privates. Each company will be assigned 24 light fighting tanks and one light signal tank, one rolling kitchen, two motorcycles and 32 tractor trucks. Five of the corporals will act as tank drivers. Each company will have 10 37-mm. and 14 machine guns.

PRICES OF COTTON, SEED, AND COTTON SEED MEAL.

The price of last week cotton moved over a range of 135-155 points on the most active months, and closed at net gains for the week of 35 to 55 points, except on March, which felt liquidation on the close and wound up at a net loss of 42 points. The cause of the advance was due mainly to the unsatisfactory condition of new crop preparations, which are now considered about three weeks late.

Charlotte.
Middling cotton 40c; cotton seed, \$1.20 bu; cotton seed meal, \$76 ton.

Tarboro.
Middling cotton, 39c.

Married in Germany.
Wilmington.—Called to his ship before his bride of a week could obtain passports for America, B. Greenison, chief engineer of the American steamer Catoti, smuggled her on board the ship at Hamburg for America.

Once on the high seas he made his wife's presence known to the officers of the ship, and in order to assure himself that she would not be held up by immigration authorities, he induced the captain to perform a second marriage ceremony under the American flag.

New Methodist Church
Chapel Hill.—If plans outlined at a recent meeting in Chapel Hill between representatives of the two Methodist conferences and the local churches become realities, the Methodists of North Carolina are going to build a \$150,000 church at Chapel Hill, especially designed for social purposes in connection with work among the students of the University of North Carolina. Plans for the new church are being prepared now, according to the Rev. E. H. McWhorter of the local church.

Another Big Mill
Rutherfordton—Spindale is to have another new cotton mill. It will be known as the Stonecutter Mills Company, being named after Stonecutter creek which flows nearby. The authorized capitalization is \$2,000,000 with \$1,250,000 capital stock subscribed to begin with. The new corporation will have about 20,000 spindles with 500 looms on fine fancy colored goods with full equipment of dyeing and finishing machinery.

A complete modern village will be built for the new mill.
