

THE SESQUI FROM THE AIR

An idea of the size and scope of the Sesqui-Centennial International Exposition, which will be held in Philadelphia from June 1 to December 1, to commemorate the 150th anniversary of the Declaration of American Independence, is given in this photograph. In the foreground is the great Municipal Stadium, which seats 100,000 persons. North of the stadium can be seen two of the vast exhibition buildings. The first is the Palace of Agriculture and the second the Palace of Liberal Arts. Opposite the latter building is the big auditorium, which seats 20,000 persons on a single floor. To the left of the stadium can be seen the world famous Indian building, the Taj Mahal.

Postmaster General Out to "Teach" Addressing

Washington.—Lack of street and number addresses on letters has become such a drag on the postal service that Assistant Postmaster General Bartlett has begun a general campaign to educate the business public in the necessity of giving complete addresses on all letters. Postmasters have been requested to take up the subject with advertisers in their cities with a view to having a complete address appear in all advertisements in newspapers and magazines.

\$200 in Will for Cat; Relatives Get Rest

New York.—"I give and bequeath unto the New York Women's League for Animals \$200 for the sole purpose of taking care of my cat, Bunney," read a provision in the will filed for probate in the Surrogate's court of Miss Cecelia Romain Stinson, who died in Belleaire, L. I. Miss Stinson, whose estate is estimated to be worth more than \$11,000, made bequests to the American Society for the Prevention of Cruelty to Animals, the Bide-A-Wee Home for Poor Cats and Animals, and an additional legacy of \$500 for the Women's League for Animals. Caroline Virginia Moyle, "daughter of my dear friend Seth Moyle," receives \$1,000. The residue is divided among relatives.

ST. THOMAS FREED FROM ALL CRIME

Police Commissioner Applied New York Methods.

New York.—The only crime to be found today on St. Thomas, Virgin Islands, is the salary paid to the police commissioner. At least when he arrived here on the Colombian liner Haiti, he said "it was a crime to take the money."

The commissioner of police for St. Thomas is M. J. Nolan, former captain in the New York police department, in charge of the West Thirtieth street station. New York methods have put the damper on St. Thomas' intentions to support home industries and have its own little crime wave.

"There isn't a crook of any kind in St. Thomas," Commissioner Nolan said upon his arrival. "It has become so quiet down there that I'm ashamed to go around and collect my salary."

In order not to feel guilty of a holdup, Commissioner Nolan said he waits for them to send his salary to him.

On a visit to the Virgin Islands six years ago to see his son, Dr. Roger Nolan of St. Croix, he told St. Thomas officials of New York's methods of cleaning up the underworld. At the time pickpockets, thieves and holdup men had an open season all year round. The officials extended an invitation to Captain Nolan to apply these methods.

He came, he saw, he established a dead-line, bought new uniforms for the 40 members of the police force and in two weeks the crime wave disappeared like a marcel in hot weather. The only trouble left to the police, Commissioner Nolan said, "is that neither my force nor I have anything to do."

Crop Area Falls Off as Population Gains

Washington.—For the first time in history there has been a decrease in the crop area of the United States.

Despite a marked increase in population, there was a reduction in the last five years of 19,000,000 acres in the area of harvested crops, the Department of Agriculture has disclosed in an analysis of the agricultural census statistics. Notwithstanding the decrease, the crop area still is sufficient, in the opinion of department experts, to maintain a large volume of agricultural exports.

The 19,000,000 acres have reverted to pasture or have been allowed to lie idle, the cause being attributed chiefly to the agricultural depression of the last five years.

Largely as a result of the war-time prices, about 40,000,000 acres of pasture land were plowed up and put into crops between 1909 and 1919, and about 5,000,000 acres of forest land cleared for crops. Nearly half of this total, experts believe, was used to meet the increased European demand for foodstuffs. Owing to the extraordinary demands of the war period, the acreage of crop land in 1919 was nearly ten years ahead of what had been the previous rate of expansion relative to increase of population.

Plotted Path of the Hurricane by Radio

Washington.—The use of the radio compass in plotting the course of a storm has been revealed by an experiment made during the recent hurricane which swept the West Indies and the coast of Florida, according to a statement from the Navy department.

Lieut. E. H. Kincaid, navigator of the navy transport, Klittery, plotted the hurricane by taking bearings while the ship was on the way from Port Au Prince, Haiti, to St. Thomas, Virgin Islands. He took the bearings of the point of heaviest static and from this data computed the center of the sweeping storm. Checking this with later weather reports, he found he had accurately plotted the path of the hurricane.
