

Duties at Capital Keeping Pou Busy

Washington, May 22—Congressman Pou gave to the press, the following statement today:

"I have been hoping that Congress would adjourn before June second, and that, therefore, opportunity would be afforded to visit the several counties of the Fourth District before the primary, but the prospect now is that Congress will continue in session until about June first. There are two or three measures in which I am deeply interested which have passed both the House and the Senate, but which have not yet been signed by the President. Believing I can best serve the interest of the people of the nation by remaining until final adjournment, much as I would like to make a tour of the district, I feel it my duty to remain in this city until the end of the session.

"Therefore I am compelled to rely upon those who are so generously supporting me to see that my candidacy is not neglected on June second.

"After adjournment, I will be at home until the election. I shall gladly go during the campaign wherever it is thought I can render the best service to the democratic cause. I shall be happy of the opportunity before the election to visit all the counties of the district."

MRS. ANNIE THOMAS PASSES

Mrs. Annie Thomas died Sunday night, May 20, at the home of her daughter, Mrs. T. A. Hartley, at Broadway. She had been a sufferer for quite a while but bore with patience and fortitude the inroads of the disease which took her away.

She was a most estimable lady and was the mother of a notably fine family of children, which includes

Mrs. Hartley, Mrs. J. M. Pendergrass, Mrs. J. E. Ison, Mrs. T. A. Kennedy, and Messrs. C. B., W. A. and J. A. Thomas, of Siler City.

The burial was at Lockville. The funeral services were conducted by Pastor Canipe, of the Siler City Baptist church. A large crowd of kindred and friends attended and paid their last respects to the fine and useful woman who has been taken to her reward.

LUTHER MANN DIES SUDDENLY

His friends were grieved to learn of the sudden death of Mr. Luther Mann, of Baldwin township, which occurred Wednesday night of last week. He was discovered dead in bed. Mr. Mann was a well known citizen.

How Much Water Should Baby Get?
A Famous Authority's Rule
By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty cent bottles contain thirty-five doses.

Clara Calvert, late of Chatham county, I hereby warn all persons having claims against the estate to present them duly proven on or before the 15th day of April, 1929, or this notice will be pleaded in bar of their recovery. All persons owing the estate are asked to make early settlement.

This 15th day of April 1928.

Fertilizer

We have on hand a good stock of all grades of fertilizers including Nitrate of Soda.

USE NITRATE OF SODA

All authorities are agreed that soda pays well when used about cotton chopping time. Let's make the cotton crop pay this year. The surest way is to use nitrate of soda, and the place to buy it is—

Years of Service in Model T Fords

Expenditure of few dollars may enable you to get thousands of miles from your old car

THE Model T Ford is still a great car. It led the motor industry for twenty years and it is used today by more people than any other automobile. More than eight million Model T Fords are in active service in city, town and country, and many of them can be driven for two, three and five years and even longer at very small up-keep expense.

The cost of Model T parts and of necessary labor is unusually low because of established Ford policies.

New fenders, for instance, cost from \$3.50 to \$5 each, with a labor charge of \$1 to \$2.50. Tuning up the motor and replacing commutator case, brush and vibrator points costs only \$1, with a small charge for material. Brake shoes can be installed and emergency brakes equalized for a labor charge of only \$1.25. A labor charge of \$4 to \$5 will cover the overhauling of the front axle, rebushing springs and spring perches, and straightening, aligning and adjusting wheels.

The labor charge for overhauling the average rear axle runs from \$5.75 to \$7. Grinding valves and cleaning carbon can be done for \$3 to \$4.

A set of four new pistons costs only \$7. For a labor charge of \$20 to \$25 you can have your motor and transmission completely overhauled. Parts are extra.

All of these prices are approximate, of course, because the cost of materials needed will depend on the condition of each car. They show, however, the low cost of putting the Model T Ford in shape for thousands of miles of additional service.

See the nearest Ford dealer, therefore, and have him estimate on the cost of re-conditioning your Model T Ford. He will tell you, in advance, exactly how much the complete job will cost.

"See that Coupon, Jim"

Seemed like Jim Staples couldn't save a cent

WORKED like a mule, too, Jim did. Tough luck always seemed to land on Jim. If the weevil didn't get his cotton, the drouth did. When he got a pretty good crop, prices went down, and Jim didn't clear enough to buy the Missus a new hat.

One day John Thrifty's wife stopped by to see Mrs. Staples. She was going to town to see some silk things that the big store was having a sale on. She wanted Mrs. Staples to come along. "All right," said Jim's wife, "but I can't buy a thing. Poor Jim's had terrible luck. Don't know how we're going to end up."

And so the women got to talking. That night Jim was reading his favorite paper. The page he was looking at had the "Soda" ad on it.

"See that coupon, Jim. Mary Thrifty told me John's good luck started the day he filled it out."

"You sound like the banker and that young county agent fellow," said Jim. "All they talk about is Soda."

Mrs. Jim said no more about it... but she sent in the coupon. Right away some booklets came by mail.

They didn't cost a cent, but they were full of interesting things. Jim read every one of them, and half-heartedly agreed to try a little Soda as a side-dressing for his crop. It was too late to put Soda under his cotton, but he used 150 lbs. of Soda per acre around it after chopping gut.

Say! Jim couldn't believe his eyes. His 80 acres gave him nearly 80 bales!

"Better luck this year, eh, Jim," said the buyer who took Jim's crop.

"Luck, nothing," said Jim; "It's Soda!"

Note: Jim Staples is one of the most prosperous farmers in his county today. He always uses Soda now, at planting, and as side-dressing.

You can do exactly what Jim Staples did. Ask your banker. Ask your County Agent. Look at the records of the 1927 Cotton Champions. Every one used Chilean Nitrate of Soda.

Just below is the famous coupon... the one Jim Staples used. Just tear it out, fill in your name and address, and mail it today.
