PRESIDENTIAL ELECTION. North-Carolina voted yesterday for Preside It was a beautiful day, and, no doubt, a large vote was polled. We are firm in the belief, that our State has adhered to her principles, and given a triumphant majority for CLAY and FREATSUREY. such precincts of the County as have come in comparing them with the vote for Governor in August.

IJ Now, that the all-absorbing question of the lay, which, like Aanon's rod, swallowed up all lse, is about to be settled, our columns will again ssume their wonted variety. The public mind as been so occupied with political speculations, that no other kind of mental aliment would have een tolerated. But now after the violent strugele through which the country has passed, misellaneous reading will be an acceptable to the eader, as green postures to the traveller through ne desert. The article in this paper headed EBEN ELSHENDER" will richly repay a perusal.

THE AMERICAN AUTUMN. We will call it by this name for once, though,

lovers of the genuine Anglo-Saxon, we greatprefer the honest, expressive, old English word FALL"-not merely for its beauty and fitness. but because it is the name by which the Autumn generally known among us. The Season, so ar as splendour goes, is peculiarly American, and ts appellation should be so likewise. If, as is ften said, we have no Spring, this makes up for its absence. The progress of our Seasons, in fact, resembles the mode in which the resources of our country are developed. There is nothing slow or gradual-their course is swift, fierce, irresistible. The icy chains of winter are broken at one bound, and every thing, which seemed torpid, bursts out in an instant, into life and vigor. But after the fleeting Spring, and burning Summer, there follows a period of repose, and the year seems to pause in its rapid flight, and lin-And how beautiful is this The Indian Summer is just upon us, in all its luxury of loveliness. The few early frosts have tinged the leaves with the colors of the Rainbow, and there have been no beating storms to scatter them "thick as Vallambrosa." It is, in fact, Summer softened. A warm haze hides the sharp outline of the distant hill, or lies liquid upon the surrounding valleye. The Sun soon rises, and easily pierces this transparent veil. We welcome him gladly, for his rays are now bright, yet not scorehing. Instead of " hiding from his garish eyes," we can look him boldy in the face. The breeze is bracing, yet not keen, and every thing invites to exercise.

COWAN'S FORD MEETING.

This great meeting on the Catawba, in Mecklenburg County, came off last Thursday and Friday, and almost equalled in numbers the Morganton meeting. Five thousand assembled in a beautiful grove at that eventful place where General Wm, Lee Davidson fell dead on the first day of February 1781, after being shot by the enemy in a bloody Battle, while at the head of his Brigade, animating his Whig troops and carnestly endeavoring to appear and repulse the British Army and Tories under the command of Lord Corn-

ARKANSAS ELECTION.

If we knew how this State had gone, we really would inform our readers. At first, it was condently proclaimed, that the Whige had elected their Governor, and for some days was believed on all sides. Afterwards, on the authority of a New Orleans paper, it was as confidently stated, that the Loco Foco Governor was elected. Who as been elected, we cannot therefore positively eay. Our latest intelligence is as follows, from "St. Louis Era," of October 23, 1844-prined in a State adjoining Arkansant

MILITARY SCHOOL

On Friday last, we paid a visit to the Parade ground of the Military Academy, and feel compalled to express our admiration of the appearance of the Cadets, in the warmest terms, as evincing in their movements in the drill, a certain, prompt, decisive, and well-timed step. with an erect bearing and self-possession uncompon in youths of their age, all of which characterize the properly trained soldier, and speaks strongly for the ability of the Teacher in this depar

as indispensable, in our humble opinion, to the left in the custody of the Judge, as above mentraining of the youthful mind, as the privation of them is absolutely ruinous to the powers of the body. Hence, almost, to every successful establishment of learning in the North lately, and in the old country for years past, a GYM-NASTUM, so constructed as to develop all the muscles, or grounds for Military exercise, have been attached, and made daily subservient to the raional enjoyment of the pupils.

If in the bracing climate of New York, and Pennsylvania, the popular judgment has deemed the establishment of Military Academies a public benefit, surely toe, in this warm region, where the Sun's rays have so enervating an effect on the constitution, cannot shut out eyes against the best interests of our children. Here, in North Carolina, we have never made any new effort or innovation on the old beaten course. whilst no less than six Academies of this nature are in operation, and flourish in our sister State of Virginia.

We find, already, that the experiment now being made by Messrs. GRAY and Buck, is producing very happy results, and palpable to every observer. The demeanor of the Cadets, their erect port, and polite salutation made to their Schoolinaster and friends, as they pass them in the street, so judiciously recommended by their Instructors, contribute to strengthen our belief day the 23d instant, and which caused the death that the Military system produces many beneficial results. It inspires the reckless boy with a self-respect and pride, which may preserve him from the commission of a mean act, and tends to sow principles of propriety in conduct. that may continue throughout life.

The solid duties of the Academy, too, receive from the energy, activity, and promptness, practised on parade, an additional impulse, and lose a share of their uninviting aspect-it being one of the laws of the Institution, to deprive the delinquents of the enjoyment of the drill which takes place at the close of the day's work, leaving the Classical, Mathematical, and other intellectual studies, distinct and uninterrupted, as in all other establishments, whose main object is to prepare youths for College, and commercial persuits of life. Of this fact we are assured, by evidence in our own son, a member of the School, and the authority of the Teachers who, we may " en pas sant" mention, are four in number, viz :

Mr. GRAY, who has spent some years amongst us, and takes charge of the Classical Department; Mr. Buck, late of the Military Academy, in Portsmouth Va., who comes to us highly recommended by Capt. PARTRIDGE, and others of the first respectability, and conducts the Mathematical Classes : Mr. Botsford, whose services have been engaged as Lecturer on Experimental Chemistry and Philosophy, and whose Apparatus is most varied, extensive, and capable of illustrating all the phenomena in his sphere of science; and Mons. MAILLEY, who has spent the greater portion of his life, in teaching his native tongue, and has in his possession testimonials of the highest order.

With such a force, such a field as Raleigh presents, and such moderate charges as the Academy makes, we have every hope that the enterprize must make rapid strides on the support of our Citizens and the people of the State generally .-We ligartily wish the gentlemen engaged, all

ALLEGED ROBBERY BY THE SON OF A SENATOR. The Pittsburgh "Spirit of the Age" of October 25th, states that Mr. Dill A. Mr. Smith was in the act of sealing a letter to his wife when he observed Tappan in his state room with his (Smith's) money in his possession. Mr. Smith attempted to recover the money, and in a struggle which ensued, Tappan threw it overboard and shot Mr. Smith in the shoulder. Tappan was arand committed to Steply

DREADFUL STEAM BOAT DISASTER.

Never since we have been connected with the Press, have we had a more painful duty to perform than that of laying before our readers the annexed account of an appalling Steamboat disaster, which occurred on the Ohio River on Wednesor injury of from sixty to eighty human beings .-In the list of "killed and missing" will be found the name of James W. Pegram!!

Endowed with talents of a high order-blessed with the affection of a devoted wife, and of children who looked up to him as " father, friend and guide"-the centre of a circle of as attached friends as man ever had-General Pegnam might justly have looked forward to long years of happiness and usefulness. But it was not so ordained. In the prime and vigor of his manhood-far away from friends and home, he has been cut off. But we do not sorrow for him "as those without hope." His pure and unsuited life fitted him for death, and his afflicted family and friends will, from that reflection, derive the only consolation which can sustain them in this, their hour of sore trial. TERRIBLE STEAMBOAT DISASTER! EXPLOSION OF THE LUCY WALKER. SIXTY TO EIGHTY PERSONS KILLED AND WOUNDED. It is with feelings the most acute and painful

that we record the following fearful disaster, and the loss of so many valuable lives. The steamer Lucy Walker, Capt. Vann, left this place for New Orleans yesterday crowded with passengers.— When about four or five miles below New Albany, and just before sunset, some part of her machinery go: out of order, and the engine was stopped in order to repair it. While engaged in making the necessary repairs, the water in the boilers got too low; and about five minutes after the engine had ceased working, her three boilers exploded with tremendous violence, and horrible and terrific effect. The explosion was upwards, and that part of the

boat above the boilers wan blown into thousands of pieces. The U. S. snagboat Ghopher, Capt. L. B. Dunham, was about 200 yards distant at the time of the explosion. Capt. Dunham was immediately on the spot, rescuing those in the water, and with his crew rendering all the aid in his power. To him we are indebted for most of our particulars. He informs us that the Lucy Walker was in the middle of the river, and such was the force of the explosion, that parts of the boilers and the boat were thrown on shore. Just after the explosion, the air was filled with human beings and fragments of human beings. One man was blown up fifty yards, and fell with such force as to go entirely through the deck of the boat -Another was cut entirely in two by a piece of the boiler. We have heard of many such heart rending

and sickening incidents.

Before Capt. Dunham reached the place where the Lucy Walker was, he saw a number of persons who had been thrown into the river, drown. He rowever saved the lives of a large number of persons by throwing them boards and ropes, and pulling them on his boat with hooks. Immediately

SCARLET FEVER.

As this dreadful scourage has lately broken out n Halifax, Va., we re publish the following prescriptive recipe for its cure. It is given by Mr. Edward Chaptin, of S. C., who declares that of thirty-four cases, which he treated not one remained in bed 12 hours. Every body should cut this recipe out and nail it to the wall :- And as we are admonished in "time of peace to prepare for war," so every family should keep on hand a supply of jalap and red peoper, so as to be ready for scourge at any moment.

DIRECTIONS .- Immediately on the first symptom, hich is sore throat, give a full dose of Jalap to an adult, 60, 70, or even 80 grains; at night give strong red pepper tea. from a tea cup full to a pint, according to age and violence of the symptoms; the next day give a small dose of Jalap, say hall the quantity given the day before, continue the pepper tea at night : on the third day, if there is any soreness remaining in the throat, give a dose of salts, which will generally effect a cure; the doses must of course be regulated according to the age of the patient .- Milton Chronicle.

CCURTSHIP OF A BASHFUL CLERGYMAN .- Th Rev. John Brown, of Haddington, the wellknown author of the Self-Interperting Bible, was a man of singular bashfulness. In token of the truth of this statement. I need only state that his courtship lasted seven years. Six years and a half passed away, and the reverend gentleman had got no further forward than he had been the first six days. This state of things became inolerable: a step in advance must be made, and Mr. Brown summoned all his courage for the deed. "Janet," said he, as they sat one night in solemn silence, "we've been acquainted now for six years an' mair, and I've ne'er gotten a kiss yet; d'ye think I might take one, my bonnie "Just as you like, John ; only be becomng and proper wi'it." "Surely, Janet; we'll

The blessing was asked, the kies was taken, and the worthy divine, perfectly overpowered with the blissful sensation, most rapturously exclaimed, " Ob, woman, but it is gude-we'll return thanks."

Six months made the pious couple man and wife, "and," added his decendant, who humorously told the tale, "a happier couple never spent long and useful life together"

THE COUNTENANCE. - Amenity of temper has great effect upon the countenance. It is a foe o wrinkles of all kinds. A woman lately died at Peroia, over seventy years of age, and it is said her face was as smooth, and her skin as soft as a young girl's. But she was a quiet, tranquilcreature. Care never troubled her, and she had never been known to frown. Verily.

After the consecration, inshop Henshaw read a letter of fatherly advice and counsel, addressed to the Bishop to

China, signed by all the Bishops present at the consecration. The holy communion was then administered first to the Bishops, then to the Clergy and the congregation by Bishop Chase, assisted by the other Bishops present. After this, the benediction was pronounced by the presiding Bishop, and then the assembly dispersed.

MYSTERIOUS AFFAIR.

We learn that the horse and sulkey which were used to transport the mail on that part of the route between this town and Fayetteville, extending from Taylor's, in Brunswick, to Elizabeth, in Bladen, were found a few days ago in Hammond's Creek, 5 miles below Elizabeth, a few yards above the bridge, the horse drowned. Neither the driver, whose name was Peter Skipper, nor the mail, have been discovered. It is supposed that murder and robbery were committed. The mail was the one which went out from here on Tuesday morning. There was nothing of much value in it. It would appear from the track that the horse and sulkey had crossed the bridge, proceeded on a short distance, and then struck off nearly at a right angle from the road towards the creek.

Since the above was in type, we have been informed that the ty of Mr. Skipper was found in the Creek without any marks if violence upon it, and near him the mail bag, unopened. is a very strange occurrence - Wil. Chron.
