From the "Charlotte Whig." MR. BRAGG'S AND GEN'L DOCKERY'S LETTERS.

We invite the attention of our readers to the following letters of Mr. Bragg and Gen. Dock ery, addressed to the late Railroad Convention, which assembled at this place.

We ask each reader to forget his party ties, and to determine for himself, which letter, Mr. Bragg's or Gen. Dockery's, exhibits the true | W. They were not asked, nor was it expected that they should advocate the claims of the enterprise which the Convention was called to consider. It was known, that as Governor of North Carolina. which one or the other of them must be, they the professed friends of Internal Improvements,

It was the best opportunity in Coast Survey. the world for him to have given the Internal Improvement cause one word of approbationto have given its friends one word of encouragement. He does neither. He consumes his whole letter in framing an excuse to get away from Charlotte, and seems much more anxious where Internal Improvements are notoriously un popular, than to express a single well wish for the great cause which has done and will do so

much for North Carolina. Now, what says the Old Farmer of Pee Dee, Heaven that the cause has such a friend in North Carolina. Every sentence has the ring

of the genuine metal. His vigorous intellect, unlettered though it he, seems to comprehend at a glance the whole length and breadth, the height and depth of the important object. He sketches with a bold and masterly hand the benefits, which are to result from these improvements to all parts of the State, and he says substantially to the Convention, as he would have said to any similar body convened elsewhere, "You are engaged in a good work I bid you God speed.'

He handles the matter, in short, like an hon est, learless friend to the cause of internal im-

The letters of Mr. Ashe, Mr. Baxter. Mr. Fremont, Gen. Dockery, Gen. Thus feeling, Gentlemen, I can but hope that your Convention may be harmonious in its de liberations and fruitful in the results for which it has been called. I regret that the urgent duties of the position in which I have been placed by my friends, will not allow me to remain over and consult with you upon plans

for the good of the Old North State. Asking you, Gentlemen, to convey for me these sentiments to the Convention, I am, very truly, your obedient servant,

ALFRED DOCKERY. CHARLOTTE, July 3rd, 1854.

GENTLEMEN :- Your letter, inviting me to at tend the Rail Road Convention, to assemble in Charlotte the 4th instant, (to-morrow,) was re erved some few days since, and it would give from Wilmington to Jonesboro'.

Some of my political friends have made an appointment for me to address the people of ham. Gaston, at Dallas, on the 4th, and that will be the only opportunity I shall have, prior to the ensuing election, to meet the people of that County. My competitor has made an appointment to address the people of Lincoln on the

COMMANDER INGRAHAM.

Mr. Gwin. Mr. President, for the last five or six months, there has been lying on the ta ble a House joint resolution "of thanks of Conto meet his political friends in Gaston county, | gress, and the presentation of a medal to Captain Duncan N. Ingraham."

The object is to bestow some testimonial on which I believe there is now no objection on the part of the Committee on Naval Affairs.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

FOR THE REGISTER. STATE INTERNAL IMPROVEMENT CON VENTION.

Mr. Gales: - Many persons are discussing the proposition of holding a "State Internal Improvement Convention," sometime during the fall. I think every friend of "Internal Improvement" must be entirely favorable to such Convention. A general system for the whole State, wisely projected and vigorously carried out, is becoming daily more popular. It would be well for the friends of the various local schemes, which have been proposed, to meet in Convention and unite, as I doubt not they can unite, on some general plan, which will preserve the main features of each, and command the upport of all sections. But my purpose, now, is to say, that if a State Convention is to be held, Raleigh is the place to hold it. That city has ad vantages, in all respects, for such a Convention over other localities. I suggest, however, now, but one and a weighty one, I think. If the Convention meets any where else, there will be a feeling, I do not say justly, but naturally, that some undue favor is to be shown to that particular locality. This, will assuredly distract the harmony of the Convention and weaken the moral force of its action. On the other hand, towards Raleigh the whole State stands indifferent. She is the State city. She is central in position, and is pointed out, I am persuaded, by every consideration of policy and propriety, as the place where "the State Internal Improvement Convention" should be held. CONCORD.

FOR THE REGISTER. MR. GALES: I have for some time thought that we should have a railroad from Milton, through Roxborough, Oxford, Louisburg and Nashville, to intersect with the Wilmington road. The proposed road would not conflict him for his gallant conduct in the rescue of with any existing improvement, but, on the con-Koszta at Smyrna. It was reported from the trary, it would be tributary to them all. It Committee on Naval Affairs several months would bring all the intervening country from so rude in speech? NEW and singularly successful remedy for the A cure of all Bilious diseases — Costiveness, Indi-gestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflamma-tions, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c., &c. Indeed, cine is not more or less required, and much sick-ness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the hearses all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cure have been effected beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth. Among the many eminent gentlemen who have testified in favor of these Pills, we may mention:

DR. A. A. HAYES, Analytical Chemist, of Boston, and State Assayer of Massachusetts, whose high professional character is endorsed by the HON. EDWARD EVERETT, Senator of the U. S. ROBERT C. WINTHROP, Ex-Speaker of the House f Representatives.

ABBOTT LAWRENCE, Minister Plen. to England.

† JOHN B. FITZPATRICK, Cath. Bishop of Boston.

Also, Dr. J. R. CHILTON, Practical Chemist, of New York City, endorsed by Hon. W. L. Marcy, Secretary of State. WM. B. ASTOR, the richest man in America

S. LELAND & Co., Propr's of the Metropolitan Hotel, and others. Did space permit, we could give many hundred certificates, from all parts where the Pills have been used, but evidence even more convincing than

the experience of eminent public men is found in their effects upon trial.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemica process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in the Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been ob tained by any process. The reason is perfectly obery medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retain self-evident the effects should prove as they have proved more purely remedial, and the Pills a surer, more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made to the whole body of Practitioners in the United States and British American Provinces. If however there should be any one who has not received them, they will be Of all the Patent Medicines that are offered, how few would be taken if their composition was known!

Their life consists in their mystery. I have no The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are will-ing to certify that their anticipations were more

than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action - remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derange-ments as are the first origin of disease. Being sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.
