On the Bill to incorporate the Greensboroug and Danville Railroad.

Although the bill under consideration does not ask for a single dollar from the public chest, or the use in any form of the State's portant one. This bill, authorizing a connection by railroad between Danville and Greensborough, is fraught with perilous consequence to our system of internal improvement. Such a connection would injure seriously the N. C. Railroad, and would endanger the existence of the 130 miles of that road which he be tween Greensbaro' and Goldsboro'. Establish the preposed connection, which the Committee on Interna! A small Paris journal, called Lee Contemporains, has just published a most strange account, signed Henri Page," of an aerostatic excursion, which the article declares has solved the long canvassed problem of directing balloons. The persons who are stated to have made the excursion are the Count de Pleuvier, M. Gavarni, M. Migeon, Mr. Falconer, an English Seronaut, and M. Henri Page, the writer. The apparatus used is stated to have cost 300,000f, the greater portion of which was furnished by Count de Pleuvier. The machine is represented as consisting of two balloons united together, of a spherical form, able to contain each 100 cubes of pure hydrogen gas.
