HIGHLY IMPORTANT NEWS FROM EUROPE--ISSUE OF SMALL NOTES BY THE BANK OF ENGLAND.

The news from Europe in to-day's paper is of the most important character and will produce an immediate rise in cotton and other articles. The suspension of the charter of the Bank of England, so as to authorize an issue of notes under the denomination of £5, will, with the high rate of discount, prevent the exportation of specie to the contitinent and to this country. RALEIGH, WEDNESDAY MORNING, DECEMBER 2, 1857.

The steamer North Star arrived out on the 13th. The English ship Dunbar, bound to Australia, was wrecked off Sydney, and 140 passengers and the entire crew were lost. The British Parliament meets immediately.

The latest advices from Delhi say that the Brit- striking the stern of the steamer Atlantic, which ish loss is believed to be less than 1200. The mutineers of the Gwalier contingent had

been subdued by cutting off their supplies. It was reported that Lucknow was relieved on

the 25th of September, but was again besieged by Nena Sahib with fifty thousand rebels. All the city people found in Delhi were bayo-neted by the British troops. Many Europeans, it is said, were found in the city fighting in the ranks of the rebels.

FINANCIAL.

The despondent condition of monetary matters on the departure of the steamship Atlantic, on the afternoon of the 11th inst., resulted on the following day in a fearful panic throughout the whole country. All the banks utterly refused to discount for their patrons, which naturally added to the wild excitement, until the afternoon of Thursday, when a treasury letter appeared in London, and was instantly transmitted by telegraph to all the chiet cities and towns, suspending the bank char-ter act and authorizing the issue of notes to any

amount on approved securities. The effect at every point was instantaneous, and the panic ceased as if by magic. At Liverpool, Manchester, Glasgow and other

important cities, the news was received with the most extravagant acclamations of joy. The suspension of the City Bank of Glasgow on

Wednesday, the day the Atlantic sailed, is con-

firmed. The London money market was steadier on Friday, the 13th inst., and bank stock sold at 2094 a 212. Exchequer bills were firm, and the feel-ing in business circles in all the principal cities and manufacturing towns became decidedly more cheerful as soon as it became known that government had authorized the bank to extend its issues without incurring the penalty of the bank charter act.

Consols had fluctuated considerably but closed with increased steadiness on Friday at 891 to 891 for money

The Bank of France had raised its rate of discounty on 90 days' bills to 10 per cent. The greatest anxiety was felt in England t

THE FORTHCOMING MESSAGE .- The special SAILING OF THE ADRIATIC. Washington correspondent of Col. When these tugs were engaged it was not known that the Webb would return from below in time to render the required assistance; she, however, did, arrive by helf-past 11 o'clock, but the small boats were per-mitted to take the hawser. At precisely 12 o'clock, the fasts were east off, and the tugs at-tempted to swing her head clear of the dock.-The tide and wind were so strong, however, they made but little impression, and it was evident they would have to call in the assistance of the Webb, which was lying at the pier above. Capt. Hazard was then hailed and requested to take the hawser. The next instant the Webb was in mopires. tion, and had passed half her length ahead of the steamer, when the order was suddenly countermanded, and the Adriatic started out of the dock before the Webb could reverse her motion the Adriatic's stern struck the Webb upon the port bow, making a slight indentation, also chipping a small piece out of the Adriatic's stem. In swinging clear the. Webb's flag-staff caught the end of the Adriatic's outrigger, and broke it off. The mistake of attempting to clear the dock, with so little sheer was instantly apparent. As the tide

took her bows, the tugs were atterly powerless, and she was swung heavily against the end of the ier, carrying away some of the piles, and crashng in the side of one of her Francis' Life boats against the projecting stern of the Atlantic -Three or four shats of the wheelhouse were also broken in, and the corners of several floats of her wheels were broken off. This was the prin-

cipal damage done. With some slight scratching of her paint, she floated clear of the dock, and in en or fifteen minutes more she was headed for the Narrows. Cheer on cheer arose from the multitudes, as the yuns of the Adriatic announced her fairly under way upon her first voyage across the Atlantic. As she passed down she was saluted by everal guns from each of the following steamers Atlantic, English steamer City of Glasgow, Hermann. Ericsson, City of Washington, (Br.) SCHIEDAM AROMATIC SCHNAPPS. A Medical Diet Drink, of eminently salutary qualities, manufactured by himself exclusively, at his factory at Schiedam, in Holland,

It is made from the best Barley that can be selected in Europe, with the essence of aromatic Italian berry of acknowledged and extraordinary medicinal properties. It has long since acquired a higher reputation, both in Europe and America, than any other diurectic beverage.

In Gravel, Gout and Rheumatism, in Obstructions of the Bladder and Kidneys, and in general Debility, sion, have been also secured. its effects are prompt, decided, and invariably reliable. And it is not only a remedy for these maindies, but, in all cases in which they are produced by drinking bad water, which is almost universally the cause of them, it operates as a sure preventire.

The distressing effect upon the stomach, bowels and bladder, of traveliers, or new residents, and all persons anaccustemed to them, produced by the waters of nearly all our great inland rivers, like the Ohio, Mississippi, and Alabama, from the large quantity of decayed vegetable matter contained in them, in a state of solution, is well known, as also that of the waters of limestone regions in producing Gravel, Calculi, and Stone in the Bladder. The AROMATIC SCHIEDAM SCHNAPPS is an absolute corrective of these injurious properties of bad water, and consequently prevents the diseases which they occasion. It is also found to be a cure and preventive of Fever and Ague, a complaint caused by the conjoint effect of vegetable malaria in the at-mosphere, and vegetable protescences in the waters of large number of eattle ; black smith's tools, farming those districts in which it principally prevails. The AROMATIC SCHIEDAM SCHNAPPS is conse-TERRIBLE STEAMSHIP COLLISION AND quently in great demand by persons traveling, or about to settle in those parts of the country, especially, as well as by many in every community where it has be-

come known, on account of its various other remedial properties. In many cases of Dropsical tendency, it is generally

the only remedy required, when adopted in the early stages of the disease. In Dyspepsia maladics, when taken in proper quantities, as a dist drink, and especially at dinner, it is found by uniform experience, to be eminently efficacious in the most obstinate cases, when even the best of the usual remedies have failed to afford more than temporary relief. In cases of Flatulency, it is an immediate and invariable specific; and it may be administered in diluted and proportionate quantities, even to young infants, in all these parer- ling on us they can purchase the stock and rent the cassengers Id save themselves, as there were two ife-preservers in each state-room. Its judicious adoption in connection with the principal meals, or when a sense of exhaustion dictates its use, never fails to relieve the debility attendant upon protracted chronic maladies, low temperament, and exhausted vital energy, by whatever cause induced .-These are facts to which many of the most eminent medical men both in Europe and the United States, have borne testimony, and which are corroborated by their highest written authorities.
