Hints are becoming more frequent and positive, says the Petersburg Intelligencer, that Mr. Buchanan, in spite of his declaration to the contrary, will again be a candidate for the Presidency. We doubt it. His party are too sagacious to risk success by putting a president on trial before the country. They were afraid to do it with Polk, Tyler, or Pierce. They will hardly risk it with a man who possesses so little personal popularity as the present incumbent. Nevertheless we are ready o believe that the office-holders and personal retainers of the President will aftempt such a move. The following is taken from the Washington corespondence of the Philadelphia Evening Bulletin :

From his singular manner, and from the few words that he uttered, his wife became apprehensive that he intended to destroy himself, and reuested their daughter, a girl of 17 years, to watch ier father's movements. He started for a barn about half a mile from his residence, the girl following him at a distance, to prevent his observing her. He entered the barn-she came up and entered also, when the horrifying spectacle of her father suspended by the neck met her gaze. She immediately ran to him and tried to raise him up, but finding him too heavy, she thrust her hand into his pocket, drew therefrom his knife, and cut him down. She then laid him on the barn floor, took his cap from his head and ran to a spring, filled it with water, returned and commenced bathing him with it. After a while he began to breathe. She then left him, and called for assistance. He was taken home, and is now in a fair

A SECRET WORTH KNOWING .- I tried a curious experiment with new potatoes this season .-Twelve months since I saw a letter from a farmer, stating the great success that had attended an experiment the writer had made in the previous season. It consisted in inserting a pea in each potato set, and planting the potato set in the usual way. The result, he stated, was a large yield of peas, and a splendid crop of potatoes, but the most mportant result was the entire freedom of the potatoes so treated from any disease, while all those planted in the usual way in 'the same field were extensively deteriorated. I was led by this stateact of Utah should not be repealed, and the terri- ment to try the experiment on a small scale in tory attached to an adjoining United States terri- my own garden this season. I planted not quite half a peck, only fifty sets, in six ranks, cutting a piece out of each, and putting a pea firmly in.— The peas grew up, and flourished well, and last week I dug the potatoes. They were perfectly free from all taint or speck of disease, and very fine and large, while in the same bed close to them was another lot planted in the old style, nearly half of which were rotten. > A TROUBLESOME PRIZE .- Everybody remembers the predicament the man was in who drew an elephant for a lottery prize. He did not know what to do with him, when he had him. The Administration would seem to be in a like strait,-They have "drawn" Fillibuster Walker,-they have even had him "dumped" down at the door of the White House, -but what is to be done with him? It is settled that there is no law to keep the elephant boxed up,-in jail,-and to have him running at large again, after the farce of trying him at New Orleans is over, will never do .-What is to be done with him then? Other indebtedness swelling the aggregate to \$150,000, has also been proved against him; so, but for this defalcation the the bank would have been fully able to pay every dollar it owed and had a handsome surplus in its coffers. - Baltimore Clipper.
