Correspondence of the New York Times Washington, March 27 .- Col. Benton is about closing his long and eventful career. He is almost the last of the old veterans of the men who were in the height of their glory during the days of Jackson, and who then made the whole country ring with the echo of their contending blows. He has been confined to his room for the last few week. In the pleasant weather of February he was often to be seen riding slowly upon his spienclid black horse, along the avenue, keeping near enough to the sidewalk to enable him to return the courteous salutations of the many friends he was sure to meet. But he soon became too feeble for this, and was scarcely ever out of his chamber Now he is confined to his bed almost entirely suffering a great deal of pain, but bearing it with characteristic fortitude, and, in spite of it all, working incessantly at what he styles his magnun opus, the abridgement of the Congressional De-bates. He has completed the work nearly to 1850, and says he only hopes to live long enough to bring it down to the present time. His familiarity with the more recent discussions of Congress renders the labor comparatively easy, and three or four months of comparative health would enable him to bring it to a close. But it is very doubtful whether this will be vouchsafed to him. He suffers from an internal cancer, and it may end his life almost at any moment. He is cheer ful, resolute as ever, and especially glad to see his friends. His indomitable courage is conspicuous in the incessant vigor with which he continues to work. His review of the Dred Scott decision was written under intense suffering, and in spite of pain, he persisted in having every proof-sheet ready for the mail by which his publishers would

A VIRGINIA DIAMOND,-Mr. G. P. Matthews, of Virginia, has exhibited at the Cincinnati Times office what he claims as a diamond of the first water, and the largest in the world. It has an inch and a half of diameter, and nearly an inch or thickness. The Times says:

It is surpassingly brilliant, particularly when viewed by gas-light. Mr. Matthews says he has been offered for it £24,000. It was found by the father of its present possessor in the gold mines in Buckingham county, Virginia, about seventy years since. It has remained in the rough state ever since, until a few weeks ago, when Mr. M., being satisfied by every test that it was in reality a diamond, took it to New York and had it dressed. This precious gem weighs 141 carats. The Koh-i-noor, if we remember, weighs but 100 cain the gold regions of Virginia. Last year one found in said locality was sold at Richmond for \$4,500.

Orsini was on the other hand, as calm and tranquil as his tellow-convict was excited. He promised to be calm, and said he should chant a patriotic him; and it is said that he actually began to sing the well known " Mourie pour la Patrie." When he appeared on the platform it could be seen, from the movement of his body and of his head, though covered with a veil, that he was looking out for the crowd, and probably intended addressing them. But they were too far off. The greffler then directed the usher to read the sentence of the court condemning the prisoners to the death of parricides. The usher, who was an old man over sixty, was evidently much moved at having to perform this duty, and he trembled as much from emotion as he did from cold as he read the document.

After this formality was terminated, Orsini and pressed their lips on the crucifix offered them .-They gave themselves up to the headsman, Pierri was attached to the plank in an instant. Orsini was then taken in hand. His veil was raised, and his countenance still betrayed no emotion. Before he was fastened to the plank he turned in the direction of the distant crowd, and, it is said cried, " Vive le France!" It was but five minutes past seven when the second head fell into the basket. A cold shudder ran among those whose attention was fixed upon what was passing on the scaffold, and for an instant there was deep silence. It passed off, however, very soon .-When all was over men went to their work, and parties who had gone together to the spot from listant quarters of the town hastened home to breakfast. The morning was becoming clearer every moment. The troops began to move as if about to leave the ground. The guiliotine was lowered and taken off. The crowd gradually thinned some few groups till lingered about the spot; but the cold was bitter and the snow began to fall, and in a few hours the place was deserted.

"After all, the constituent of the Senator from Pennsylvania, that simple-minded, honest-hearted old Pennsylvanian-I dare say he was a Dutch man-was not so far mistaken. Why, sir, you do publish books for children? What are all your picture books, but books for children?— What is the use of books crammed full of pictures of birds, snakes, lizards, and all manner of things of that sort, printed in the most artist style, with pretty little stories about the habits of the birds, snakes, and reptiles, but as mere play books? They are not printed for men, because they contain no information that would be of any value to a man with a beard upon his face, or a woman who was fit to be the mother of children. They are mere playthings, got up at an enormous expense by the Government. Take your books about the exploring expedition and nstead of giving a history of the expedition you will find the queerest pictures, and most outlandish things meaning nothing; no historical statement that amounts to anything. There is one volume of this exploring expedition, the queerest book that ever was put inside of lids.— Take a box of common shoe-blacking, and a brush, and a little white paper, smear it all over, and then take a pepper-box of white sand, sprinkle it all about, and you will have as good a book as

"In this connection I desire to give a bit of unwritten history, for which I have the testimony of a gentleman present at the interview alluded to. It is well known to the political portion of our community that the late Moses Dawson was a warm personal friend of Andrew Jackson. They corresponded regularly, and Gen. As for ourselves, we have no doubt of the truth of the charge. That Gen. Jackson regarded Mr. Buchanan as a "reptile," is evident from his let-ter of 1845 to Maj. Wm. B. DEATH OF A NORTH CAROLINIAN AT MOBILE.

We learn from the Observer, of Wednesday the 24th inst., that a gentleman, apparently near forty years of age, died suddenly at the "Mansion House," in Tuscaloosa, Ala., early on the morning of the 23d inst. He arrived there on Wednesday just one week previous to his death. He regis-tered his name as "John Henning, N. C." He appeared to be suffering under great mental dis-tress—had all his meals in his room—shunned society—drank freely of liquor, and was often heard in his room bewailing his fate. Tuesday morning he bought some chloroform, of which he took a potrion, for the purpose, he said, of ma-king him sleep. It had the effect of vomiting him at diffe/ent times through the dy. Dr. Friend visited him soon after taking orm, and was satisfied that he had contents of the stomach. He was again called after midnight, but the vital spark has fled. It is supposed that the immediate cause of his death

the deceased man was an entire stranger to the ommunity, and from some remarks that fell from him, was connected with the fishing business in North Carolina. He was a large mascular man, weihing probably, two hundred pounds—said he said he had a mother living. He had in his possession \$224,00 in gold, two gold watches, and a pair of Colt's repeaters. No letters or papers were found on his person.
