

The Times has been designated as the printer and publisher of the United States Laws, by authority.

Messrs. Griffin & Hoffman, Newspaper Advertising Agents, No. 3 South St., Baltimore, Md., are duly authorized to contract for advertisements at our lowest rates. Advertisers in that city are requested to leave their favors with this house.

THE SENTINEL.

It is with some surprise that we observe that this paper of all others should pay a compliment to the Era by speaking of its editors as gentlemen. This concession on the part of Turner who has heretofore found scarcely enough of a billing character in the language to apply to political opponents leads us to entertain some hope that in the course of time the Sentinel may become half way decent. The notice that is taken of the attacks made upon the redoubtable Ja. indicates that he has some feeling left. We will let him speak for himself through in this wise.

As if to make up for the past lack of editors, the Era appeared on Tuesday with two. Col. Mark Erwin comes in, introducing Mr. Hanes, of the late Old North State. Two money rogues who have vilified abused us will no doubt be ruled out, as these two gentlemen will not want their assistance. We can say to the stockholders and office holders of the concern, that our position with the people of North Carolina has been strengthened rather than weakened by their vile assaults upon us. We have silently borne the calumnies of the Era without even replying to them. Such abuse did not, and will not, prevent the Sentinel's showing to the people the short comings, bribery and corruption of the republican party, which has plundered the treasury and destroyed the credit and character of North Carolina.

In another matter, we will let one John W. Thompson, a witness in the Biggs-staff case, speak for him, as copied from the Sentinel.

"WITNESS. Egerton said the object of the order was to put down oppressive laws to prohibit the blacks and whites from mixing, to put down the revenue laws, and to have a white man's government. Was at another meeting in Ruthersford, near Egerton's store, in a still house on the branch, 10 to 15 were present. Witness named them. At this meeting Elliot and Egerton spoke of the objects of the order as that meeting Egerton was made chief by Elliot; Elliot said he got his authority from Mr. Moore, and that he got it from Joe Turner, editor of the Sentinel paper; object of the order was said at this meeting to be to establish the conservative party and put down the radical party, and that they were going to have a white man's party; this thing of having the negroes voting and going on juries, they said, was ridiculous and must be stopped, by force of arms if not otherwise; would have a white man's government at all hazards; Elliot was present; this was in February; both of these meetings were held in three days of each other; have been to five meetings here on a raid; was sworn to aid a brother in distress; Egerton and Elliot said if any brother got in jail we were to get him out; if we had to tear down the jail; Here the oath was often referred to in these reports was read to witness; the oath he had taken had something different in it; He repeated his oath in which he swore to obey all laws and regulations of the order.

The question now naturally arises whether this be truth or falsehood. We must confess that it looks very much like truth. We can say that Thompson could have no object in stating a falsehood; Elliot should be brought forward and made to tell all he knows about the matter. We have Turner's positive denial that he ever belonged to any secret society, and Major Years' assertion through the Wilmington Herald, that a leading Whig editor should be brought forward and made to tell all he knows about the matter. We have Turner's positive denial that he ever belonged to any secret society, and Major Years' assertion through the Wilmington Herald, that a leading Whig editor should be brought forward and made to tell all he knows about the matter.

The commission appointed under the twelfth article of the treaty of Washington for the examination of claims of American citizens against Great Britain and of British subjects against the United States, other than the Alabama claims, assembled at the national capital on the 26th. The commission is composed as follows: the Right Hon. Russel Gurney, Q. C. M. P., Recorder of London, commissioner on the part of Great Britain, with Henry Howard, Esq., attache of the British legation at New-Bern, as agent, and James M.

Carlisle, Esq., formerly advisory counsel to the legation, as counsel for the British claimants; the Hon. James G. Frazer of Indiana, commissioner on the part of the United States with the Hon. Robert S. Hale of New York, as agent and counsel for the American claimants, and the Count Luigi Corti, the Italian Minister at Washington, commissioner chosen by the two governments jointly. The commission is empowered to investigate and decide upon all the claims brought before it, and to award such sums of money as may be found due, and all sums so awarded are to be paid by the one government to the other within twelve months after the final award.

The immense importance of the adjustment of all matters of difference between the United States and Great Britain should not be overlooked. The peaceable solution of this difficult matter is one of the triumphs of the Republican party, and redounds to the credit of the most wise, temperate and consistent administrations this country ever was favored with. Without the settlement of these, and the Alabama claims, all feeling of hostility between the two greatest and most enlightened nations will cease, and the two will vie with each other in advancing the cause of civilization and Christianity. It seems to be reserved to the English speaking people to be foremost in all good works. The missionary work so heroically pushed forward by the people of the two countries, will be advanced by the establishment of a perfectly peaceful feeling and cordial sentiment of unity of aims and objects, and among them, not the least, is the preservation of the peace of the world, which we believe it is the earnest desire of the people of both countries to aid in doing.

(COMMUNICATED.)

DEAR SIR:—It is indeed gratifying to notice the interest taken in organizing Sabbath Schools in the lower section of Craven County. I had the pleasure of visiting the little chapel known as Concord Church, last Sabbath; I found the little Church crowded with teachers and scholars, and there seemed to be the liveliest interest in rehearsing good lessons on the part of the children. Mr. Benj. P. Small, the gentlemanly Superintendent deserves great credit for the part he has taken, not only for the advancement of society, but the religious example he sets, is worthy of imitation. Our old friend S. N. W. Parker, who teaches the day school, acts as Chaplain when there is no regular preacher present. Mr. Parker has labored hard to inculcate religious principles and make this school a permanent arrangement. Mr. Parker and Mr. Small stated that there were numbers of the children who did not know the Alphabet when they started this Sabbath School, and now they can spell and read well. The superintendent states that he has received but few donations from any source, except from a very few of his neighbors, who kindly came to his assistance and helped him, to bear the expenses of procuring papers, books, &c., for the library. Heretofore it has been very difficult to get teachers, but Mr. Small has encouraged many young men and women to engage in instructing the children. The following are the names of the officers and teachers of the Sabbath School of Concord Church at Bay River: Superintendent—Benj. P. Small, Esq. Chaplain—S. N. W. Parker. Treasurer—Richard Cary, Esq. Clerk and Librarian—Francis Gattlin.

J. Uly Cary, Francis D. Cary, Francis Gattlin, Mrs. Harriet Small, Miss Mary E. Small, Miss Lurina Swadlow.

Many of the children deserve mention for their strict attendance and good behavior. Among them are three who merit the praise and encouragement of the whole neighborhood. I will here mention their names, Richard Lewis, Francis Lewis and Susan Jones. These three children have learned to spell and read very well indeed, and have not attended any other school. Some time last year the parents and friends of the children of this Sabbath School made a very nice picnic, and the children had a regular jubilee; their joy was indescribable, and it has had a beneficial effect. They have succeeded in making arrangements for another picnic, about the 10th of October next. It is gratifying as well as amusing to see the preparations for the little picnic making for the expected festival. No set of city children can appreciate the kindness of their friends in making such arrangements for their pleasure, as the little ones of this section do; neither do children who are used to picnics enjoy it so much. The coming will be the second picnic that has ever been given in this section. I believe the people, I am glad to say, are taking unusual interest in erecting school houses and in establishing Sunday Schools, and in many other ways awakening from the old way of doing

things; they see that religion and morality are the greatest virtues ever obtained in this life, and should the present spirit continue, ere long the young farmers will be the most religious, virtuous, honest and intelligent of our people. God speed the good work. I will write to you about the picnic when it comes, and let you know all about the little ones enjoyed themselves. Please publish this in the WEEKLY TIMES, and send six copies to the Superintendent, Concord Sabbath School, Bay River, N. C.

I shall send you a large list of subscribers to the WEEKLY TIMES, as soon as I can see two more persons who want to secure your valuable paper.

Yours truly, JAMES M. CARLISLE.

NEWS.

San Francisco has had a \$1,000,000 fire. There were 83 new cases of small-pox in Wisconsin last week. The lumber Company own six thousand acres of land covered with valuable juniper and cypress timber, commencing five miles from Jameville and running within three miles of Washington, in Beaufort county. The company are putting down a railroad to serve as a means of improving their property and to open a new communication with the North from Washington. The road is laid to within six miles of Washington, and cars will probably go through by the first of January.

Perfection. The nearest approach to perfection, in articles designed for kitchen use, is that of Dooley's Yeast Powder, now generally recognized as the most economical and reliable Baking Powder in the country. No housekeeper should be without it. To accomplish the same results, it requires but one-half or two-thirds the quantity of any other brand. It is guaranteed, and recommended solely on its merits. Dooley & Brothers, Manufacturers, 69 New St., New York. For sale by all Grocers.

Old Things Have Passed Away. This is at least true of the old method of treating the long abused and much abused human body. It is no longer considered wise to put a patient to the torture in order to cure him of a disease in which pain is already undermining the energies of his system. True science ranges itself on the side of nature, and endeavors to assist her in her fight against disease. This is the province of Hostetter's Stomach Bitters, the most approved tonic ever advertised in this country. It may be recommended as a fall medicine, par excellence; for it is in the fall that biliousness, dyspepsia and rheumatic fevers are especially prevalent. The frame, exhausted by the heats of summer, is relaxed and feeble at its close, and requires, we may say, assistance artificial assistance. Afford it that assistance in occasional doses of Hostetter's Stomach Bitters, and the evils referred to may be escaped. Throughout the far west, and on the scaming aluvial of the southern rivers, all the varieties of periodical fever are probably rife to day. Had a course of Hostetter's Bitters been commenced by the sufferers a month ago, &c., before the unhealthy season set in, seven-eighths of them would in all probability be in their usual health by this time. So many are the victims of fornication, &c. such for not keeping in the house, and using daily, the best safeguard against epidemic and endemic fevers.

As stocks of impostors and imitators are trying to follow in the wake of the great American remedy, therefore be sure that the article you buy is genuine and verified by the proper trade marks. The true article can only be obtained in bottles. Beware of the spurious bottles sold by the gallon or in keg.

THE PORTUGUESE Cortes has been pronounced. The steamship Lafayette has been burned at sea. More reinforcements have been sent to the Spanish garrison in Morocco. The French troops in Algeria are putting a quietus on the insurrection of the natives.

The news from Cuba is that the rebellion there is completely crushed. This is the one thousand and fourth time we have heard this. Marshal McMahon is explaining the cause of the defeat of the battle of Sedan, assumes all the blame, and relieves Napoleon from any share in it.

The new treaty between France and Germany has been sent to Berlin for ratification. The German representative at Paris protests against the transportation of German residents at Lyons.

A correspondent says that Pio Nono expresses his gratitude to the various persons who have offered to contribute to the relief of the world, but desires he intends to die in Rome, and that his successors for thousands of years will also be their last in the Eternal City. He intends, and all the Paedina's agents will be in Rome, and will be in the Catholic Church survive the permanent absence from Rome of him who is its political head and Christ's only Viceregent on Earth.

On motion of R. K. Ketchum, Esq., a committee of one from each State was appointed to investigate and report on the organization of the Convention that took place at Lyons.

All questions involved in the recent clerical difficulties as touched upon and decided, upon by the treaty of 1869, and the Supreme Court jurisdiction; hope for a union with the Greek Oriental and Russian Churches, and expect a grand agreement to be made with other creeds, especially the Protestant Episcopal in England and America, and advocates the abolition of the order of Jesuits.

The declarations is signed by Dollinger, Hobbes, and others, and is a very interesting and important document. It is a declaration of the faith of the Catholic Church, and is a very important document.

"Carpet-Baggers." A correspondent of that orthodox Democratic paper, the North-Carolinian, innocently tells how the "carpet-baggers" have arrived at Jamestown, and how they have been treated.

Jamestown, on the Roanoke, will be remembered as a hellish acquaintance with the Roanoke river, about twenty miles from its mouth. "Jamestown," as it was called by the natives, was chiefly remarkable for its beaver trade, and for the fact that it was the only place where the beaver was sold by the two of three stores that the place boasted. The country back was almost a wilderness, the land being chiefly owned by a few wealthy men who had made their money in the West.

During the war the Yankees made a raid on "Jamestown," and in consequence of being beaten they fled to the mountains, leaving a stranger, the town was applied to the town one night, and the next morning's pale light saw no town on "Jamestown Bluff." A few blackened chimneys stood the place where the wisdom, beauty, and charity of the diabolical plot to make a swamp, dip snuff, and indulge in the whiskey, and the pleasing but frustrating game called poker, and an occasional frolic to vary the monotony of the things. The water went up the Roanoke by steamer for the first time since 1865, and when the boat landed at Jameville (as it is now called) he could scarcely believe the evidence of his own senses. There was a railroad depot and train of cars, millions of feet of lumber and a quantity of shingles, steam mills buzzing, planing mills humming, vessels

loading at the wharf, while on the bluff was a bright, new, clean town, with well graded streets, neat gardens, modern cottage houses, some twenty stores all in full blast, and apparently doing a good business, a new school, churches, school-houses, and all the surroundings of a prosperous, energetic, cultivated people, and he said to himself, in the language of the immortal Ariens, "Why is this thus?"

Some after the war a Northern Company came to the place, bought land, went to work, infused their energy into the old business men of the place who had returned after the war to plant, cultivate, agriculture, lands, were cleared, mills erected, the mill-race, and also put in a mill, and very soon a new and more pleasing town took the place of old "Jamestown," and young Jameville took fare to rival New-Bern in size. The place had more elements of prosperity than any other section of country in Eastern North Carolina. The land back of Jameville is high, dry, and fertile; the timber is very fine; the water is very good; the climate is healthy, while the immense forests of cypress and juniper timber give employment to thousands of shinglers and lumber getters. The Jameville and Washington Railroad Lumber Company own six thousand acres of land covered with valuable juniper and cypress timber, commencing five miles from Jameville and running within three miles of Washington, in Beaufort county. The company are putting down a railroad to serve as a means of improving their property and to open a new communication with the North from Washington. The road is laid to within six miles of Washington, and cars will probably go through by the first of January.
