Philenthropic.

Several gentlemen of our acquaintance drop ped in during yesterday to say that they had invested in the Vue de l'eau concert tickets and while allusion was made to the disagreeable condition of our streets freely canvassed their intention to have our pumpless wells all thoroughly pumped, and all sluice holes filled up, in case they drew the capital prize of \$5,000 in greenbacks, to be drawn at said o neert

A Wis Suggestion. That distinguised young druggist, Redding, ilias Reuben, alias Moses, alias Joshua Mason is of the deliberate opinion that those somers who could not see our pint in Dr. L hg's caving operation, or the difference between a presentation and the local application of the article had be'tor have their heads opened and a little brain injected therein, or be employed by our city fathers in covering those two sluce-holes on the corner of South Front and Craven streets.

We notice that Cheap John who had been for ometime past inteffering with the boot and shoe dealers, as well as with the ready made clothing merchants, by selling at very low fig ures, has made an improvement upon the sidewalks surrounding his bremises on the corner of Middle and South Streets. Cheap John, as we understand, is detidedly opposed to pumpass wells and coverless sluice-holes. We know from observation that Mr. John has become disgusted with mud, and that he shows a desir keep everything in order, in aud around his premises. . He motors! D to thousantA

We dot expect that the world-renowned CHIRISKI will have much to say about our New Berne since holes and pumpless wells when he makes his appearance at the New Berne Theetre to-morrow evening, but we are informed that himself and his essistants will do I that is possible lowards entertaining our citizens and presenting them with elegant presents du: ing their stay here,

I take this occasion to inform the patrons of of New Berns Academy and my friends of this city that I have resigned my professorship in that Institution on account of my health, and in consecut hes of my interests which demand my pr sence elsewisers. I have been pleasantly engaged here for a part of two scho astic years, and the teachers and students whom I leave be hind will have a place in my memory and my

Long may this Institution of bright promise live, with its earnest, energetic Board of Trustes, its accomplished principal thorough scholar and faithful assistants, to carry forward the great and excellent work which it is now so fully and honorably sustaining.

By nepate of Proceedings.

The Grand Lodge of the Knights of Pythias of North Car- line convention in annual session. in this city, on Tuesday morning last, at 10 o'c ock. Every Lodge in the State was represented and every officer, except the G. C. (who was detained at home), at his post. Much work was done for the good of the order, which was reported in a flourishing condition. BELONGING TO MOBE THAN ONE LODGE. A resolution was adopted allowing a Knight to connect himself with more than one Lodge This resolution was adopted by almost a unanimous vote, the object being to build up weak Lodges. Luckily for the sick, the idea that it is necessary to reduce their bodily strength in order to cure them, is fast dying out. Modern science recognizes the fact that disease is of itself more than sufficiently depressing to body and mind; and does not pressing to body and mind; and cost not need to be assisted in its involds upon the vital energy of the avatem by violent purgations and other debilitating mixtures. Prostration is, in short, "play d cut," and practitioners who still cling to it are so few and far between that they cannot, like their predecessors of the same fatal school who flourished half a century ago, fill the grave-yard with their victims. The introduction of Hostetter's Stomach litters in 1853 was the heaviest blow that the old depletion had ever received, and from that time to the present, as the colebrity of the grest vegetable invigorant has increased, the purging, blistering, bleeding, water-greel practice has declined. The effect of this famous preventive and remedy is to strengthen, build up, regulate and tranquilize, not to weaken, break down and violently disturb the system. It is tonic; alterative and nervine, with a pure atimulant as its propelling and distributing agent. This stimulant diffuses the curative and life-metaining demonsts of the medicine illrough the whole organization, and brings that into contact with the sources of disease. Hence its curse of indigestion, constipation, billious complaints, nervousners, languor, debility, low spirits, malarious disorders, &c., are complete and the meaning and as a projection against the need to be assisted in its inroads upon the
