FRIDAY, May 3, 1895.

One of the best bills offered during the last Legislature, was offered by Hon. J. F. Reinhardt, Representative from Lincoln county.

But Mr. Reinhardt's bill met with no favor with the Pops. He told the writer the other day that the Pop members instead of favoring this change wanted to meet every year.

It would not be necessary to make a gap of four years to show that the Mercury had modified its views on a dozen questions as it charges the ENTERPRISE of doing on the silver question since 1891.

Several of our contemporaries, however, have asked us, and strange enough all these queries have come from the South, where there is to be found a Southern man big enough, strong enough, broad enough to meet the expectations of the party and the requirements of the position.

'A BAD DAY'S WORK.'

Under the above head the following editorial appears in the columns of the Charlotte Observer: The making of a bond of \$91,000 in the city yesterday in the case of an embezzling bank cashier for whom a bond of only \$15,000 was needed, was a regrettable occurrence.

own purposes will find great encouragement in this incident of yesterday in Charlotte. This sentiment fits our taste exactly. The leaveny with which the law and friends deal with such men are the cause of its frequent occurrence.

The Post Names a Candidate.

Not long ago the Washington Post created almost a political sensation—it at least startled the politicians of the country—by proposing that a Southern man be named as the leader of the next fight for the presidency of the United States.

Strange to say the Post was applauded by the Northern press for its position, while at the South it found hardly the least sympathy.

Several of our contemporaries, however, have asked us, and strange enough all these queries have come from the South, where there is to be found a Southern man big enough, strong enough, broad enough to meet the expectations of the party and the requirements of the position.

There is some talk, it was suggested, "that you may be the candidate for the presidency next year."

CRISP IS FOR FREE SILVER.

It is the Great Political Issue.

ATLANTA, Ga., April 21.—Speaker Charles F. Crisp, in an interview at his home in America declared himself in favor of a staff correspondent of the Constitution in favor of the free coinage of silver.

"The platform," said Mr. Crisp, "should declare for the free coinage of silver direct, and with a set of principles responding to the demands of the people; we should select some man with a military record, identified with the dominant sentiment that now controls the party, and go forth with confidence to the victory which the people always give those who are brave enough to fight for it."

"Such a contest as I have outlined would cause many people to make new party alignments. There are Democrats strongly wedded to the gold theory, and as many Republicans just as strongly wedded to free silver.

"Of course," said Mr. Crisp, "there is a contingency in which the people might not be called upon to settle the question—that is, the possible action of an inter-national conference. That would be the best and easiest method of re-establishing silver, and with less of the element of experiment, etc. If such a conference should be called and it took action restoring silver, so that the people would be satisfied then we would have the final issue for 1896.

The Sweep of the Silver Sentiment.

Charlotte Observer.

"The sweep of the silver sentiment" out West appears to be gaining in momentum. Illinois appears to be the pivot State in this movement. The papers here, of late, contained almost daily reports of the formation of sound money clubs in that State, and the hopes of the gold standard sympathizers all over the country had been raised to a high pitch, and they have begun to believe that a successful resistance might be offered to the free silver tidal wave in Illinois.

"The sentiment in favor of the free and unlimited coinage of silver at the ratio of 16 to 1, without international conference or agreement, seems to have taken complete possession of the Democracy of Illinois outside of Cook county. I conferred with men of all shades of opinion on this subject—with Republicans as well as Democrats. I talked with Republicans because sometimes the lookers-on see more of the game than the players.

"I met old friends with whom I could talk confidentially and get the impression that while there is a very strong and respectable sentiment throughout the State in opposition to this currency theory, yet the opponents of 16 to 1 are without organization, apparently without any ambition to succeed and are singularly silent, while the silver men are vigorous, active and aggressive.
