BUY A WARSHIP FOR

FIFTY MILLION DOLLARS?

An eighty thousand ton battleship mounting fifteen 18-inch guns, having a speed of 25 knots an hour and costing \$50,000,000 is the limit for American warcraft, according to a report prepared for congress by the navy department in response to a question as to the size of ships that could use the Panama canal and American harbors.

The report says such a vessel would have a length of 975 feet, beam of 108 feet, a secondary battery of 21 6-inch guns, four 21-inch torpedo tion. Locks on the Panama canal are 110 feet wide so she would have two

"A single such vessel," adds the report, "would not be of great value to the navy, as it would not be suited to act in unison with the other major units of our fleet. It would be necessary to lay down not less than five." The general board, however, is not prepared to recommend so radical a departure as the 80,000-ton ship would present.
