

Days Of Token Payments Are Gone, Johnson Says

Senators Agree U. S. Can Accept No More Token Installments

Washington, May 7. — The doom of the token payment boys of Europe, who got by for a while by paying a little and owing a lot, appeared to have been sounded tonight with declaration of Senator Hiram Johnson (R., California), and other senators that the United States could not and would not accept any more token installments on war debts.

At the same time the State Department warned the public against buying old Russian imperial bonds in the hope they may be redeemed by the Soviet government.

Johnson is author of the recent law forbidding financial transactions with nations in default on debts to this government.

Accepts Cummings' Ruling
Voicing to the Senate his acceptance of the ruling by Attorney-General Homer S. Cummings that war debtors which have made past token payments were not in default under the Johnson act, Johnson said any further token payments "would come within the plain provisions of the law and if that nation sold securities in the United States it would be guilty of violating the law."

"I am looking forward to see whether there will be another token payment to escape the stigma of default," the Californian said. "I don't think there will be one or that there will be acceptance of any token by this government."

Senator J. Hamilton Lewis (D), Illinois, supported Johnson's views in a Senate speech. Democratic Leader Joseph T. Robinson told newsmen he too agreed with the Californian's interpretation.

News From Ronda Route 2 Section

RONDA, Route 2, May 7. — Mrs. Chap Pardue, who has been very sick, is able to be up, her many friends are glad to learn.

Miss Emma Pardue is recovering from an attack of measles. Her niece, Miss Polly Pardue nursed her through her illness.

Mr. Doughton Eller and family, of Roaring River, visited Mrs. Eller's aunt, Mrs. Gertrude Gray, at Clingman, Wednesday.

Dr. and Mrs. Wellborn, of Elkin, were the guests of Mr. and Mrs. Worth Sale Thursday.

The numerous friends of Mrs. Lois Jarvis Roberts regret exceedingly that she must be confined to bed another week, and wish her a speedy recovery.

Mr. Walter Walker has been very sick for several days his many friends regret to know. He seems to be slowly improving at present.

Brier Creek Sunday school has a program, "Information About North Carolina Baptist Hospital for Mother's Day" to be rendered next Sunday, 2:30. The occasion is also a memorial service for Dr. Lumpkin, Rev. N. T. Jarvis will deliver an address on "Our Hospital." Rev. Roy Crater will talk on "Our Mother." Everybody is cordially invited to help the occasion by being present. The speakers will interest you on these most interesting subjects.

Miss Mary Kate Sale returned yesterday from a visit at Elkin with her aunt, Mrs. W. G. Church.

In this community the sun was partially eclipsed with dense clouds of smoke from the fire said to be on the Blue Ridge. The citizens have no recollection of a similar occurrence.

Much corn has been planted in this section during the past week.

Mrs. Geo. Harvey Sale expects to spend this week with her mother, Mrs. Robert Key.

Master Billy Pardue, son of Mr. J. C. Pardue, is very ill with pleurisy.

QUESTION AND ANSWER

Question: How much feed should be planned for a dairy cow for one year?

Answer: This depends upon the individual animal but as a general rule each cow will require two tons of legume hay, two acres of pasture, 18 bushels of corn, 16 bushels of oats, and 400 pounds of cottonseed meal. Where wheat bran is available this may be substituted for a part of the oats, pound for pound. Good producing animals are necessary for profit and the herd should average between 250 and 300 pounds of butterfat to the cow. If this average is not maintained then the animal is not paying for her feed and should be taken from the herd.

Five varieties of wheat are being tested in Mecklenburg county this season through arrangement with the North Carolina Crop Improvement Association.

Boopy-Doops in Court

NEW YORK . . . Helen Kane (above), claiming to be the original Boopy-Doop girl, brought suit for \$250,000 against movie people who featured Boopy-Doop cartoon movie.

PLANT CORN CROP TO AVOID INSECTS

Insect pests are liable to infest corn at all times during the season, but by ascertaining the periods when pests are worst in each community, farmers may avert much damage, according to Dr. B. E. Fulton, research entomologist at State College.

In regions where the corn stalk borer, root worms, and corn bill bugs attack early planted corn in great numbers, farmers can avoid them by planting about the middle of May.

But if the corn is damaged more by ear worms and fall army worms on late maturing crops, then best results can be obtained by planting early so that the corn will harden in the ear before these insects reach their greatest activity.

The adult moth of the ear worm prefers corn in which the silks are fresh at egg-laying time, as the worms can then develop before the grain becomes hard. In some areas corn maturing in August is particularly susceptible to ear worm infestation.

The black weevil, angoumois moth, and pink corn worm, on the other hand, thrive best on corn that matures early. It provides them with food for a longer period during the warmer months. However, much of the damage by these insects can be avoided by harvesting the corn as soon as the ears harden.

It is also important to keep the new crop from being infested with insects from the previous year's harvest. Old corn should be removed from storage rooms and the floor swept clean before the new crop goes in. All new ears that are noticeably infested should also be thrown out, Fulton says.

Chevrolet Foundry Set All-Time Record

Saginaw, Mich., May 9. — The Chevrolet gray iron foundry, largest in America, has set a new all-time record by pouring in a single day 2,152 tons of molten metal in the making of castings for Chevrolet passenger cars and trucks, it was announced here today.

During the last month, the average daily tonnage poured has been 1,787, and the hourly tonnage is being further stepped up to meet the increasing demands of car and truck production, which totaled over 110,000 in April.

Shipments of castings for cylinder blocks, pistons, clutch and transmission housings, carburetors, and other foundry products, in March alone, totaled 32,722 tons. The castings are shipped from Saginaw to be machined into finished units at the Chevrolet axle plant at Detroit, the motor plant at Flint, the transmission plant at Toledo, and the Bay City (Mich.) plant, where castings for carburetors and other small units are finished.

The foundry is now working day and night, with two batteries of 12 cupolas in action. The heavy duty machinery, such as the conveyor lines on which the moulds progress from start to pouring and on through the cooling period, is installed in duplicate to provide for continuous pouring; this arrangement permits full production to be kept going constantly, since the maintenance and care of each set of machinery can be carried out while the duplicate equipment is in use.

TIRE PERFORMANCE SHOWS LEADERSHIP

According to Dick Cashlon, local Firestone dealer, the new Firestone High Speed Tire for 1934 is the last word in tire construction—it is the greatest tire Firestone ever built.

"In no product today is there wider performance difference than in the various makes of tires at high speeds," Mr. Cashlon said. "No other product is more vital for safety of motorists. The 500-Mile Race of past years at the Indianapolis Speedway was recognized as a race of tires. To keep the tread on the body of the tire was the greatest problem due to the terrific strain and the heat generated by internal friction at high speeds. Gum-Dipping was the answer of Firestone engineers.

"In the recent series of stock car and road races in California, Firestone Tires have always been on the winning cars. They are the same kind of tires the motorist purchases from his local dealer. All the great racing drivers are familiar with occasions when a driver using another make of tires had to slow up or stop at the pits for a tire change on account of tread separation. The thicker the tread the more heat it holds in the tire—unless the body construction guards against internal friction heat.

"Gum-Dipping the high stretch cords gives the adhesion which welds the tire into one strong unit. This made it possible for Firestone to develop the first successful balloon tire in 1923, and has made possible other developments which have brought leadership based on performance. With the amazing advancement of tire safety and mileage, Firestone has always sought efficient production so that the motorist would pay no premium."

QUESTION AND ANSWER

Question: Should my entire poultry flock be vaccinated against chicken pox?

Answer: As a general rule only the young birds from 10 to 15 weeks old are vaccinated as the adult birds are apparently highly resistant to the disease. If the disease has been present in the flock at any time in the past several years or is now present in neighboring flocks the birds should be vaccinated as soon as possible. Material for vaccinating can be secured from any reliable firm and detailed instructions for applying the vaccine will be furnished upon request by the Poultry Department of State College.

The 4-H club achievement day was held recently in Hertford county at the Winton school. The program commemorated the 25th anniversary of the establishing of 4-H clubs in North Carolina by Dean I. O. Schaub, of State College, at the initial meeting in Hertford county.

NOTICE OF SALE OF LAND

Under and by virtue of power of sale contained in mortgage deed executed on the 1st day of August, 1928, by J. L. Mastin and Lora Mastin, to the undersigned mortgagee to secure the payment of a note which is past due and unpaid, the undersigned mortgagee will on Thursday, June 7, 1934, at the hour of 12 o'clock noon offer for sale at the courthouse door in Wilkesboro, N. C., at public auction, to the highest bidder, for cash, the following described real estate:

Adjoining the lands of L. J. Salmons, A. Mathis and M. M. Mathis, L. B. Mathis, Milas Sales, known Mastin heirs, containing 80 acres more or less. This mortgage covers 1-3 of the Mastin heirs. For full description see mortgage deed in office of Register of Deeds of Wilkes county in Book 149, page 256. This 7th day of May, 1934.

SAM PARDUE, Mortgagee.

NOTICE OF SALE OF LAND

Under and by virtue of power of sale contained in mortgage deed executed by R. H. Harris and Ethel Harris on the 13th day of June 1929 to S. L. Pardue to secure the payment of a note which is past due and unpaid, and the said note being assigned to Luther Pardue and demand having been made for the payment thereof, the undersigned will offer for sale the land hereinafter described at the courthouse door in Wilkesboro, N. C. on Thursday, June 7th, 1934 at the hour of Twelve o'clock noon to the highest bidder for cash:

First Tract: For boundary see on record of deeds office on Book 114, page 262, containing 30 acres more or less. Deed made by A. M. Harris and wife Sarah Ann Harris to R. H. Harris.

Second Tract: Adjoining the land of Garfield Blewins, R. H. Harris and T. A. Billings, lots 4 and 5 of Division of A. M. Harris, being the lands purchased from George Cottrhan and Ada Cottrhan his wife, containing 21 acres more or less. For full description see office of Register of Deeds for Wilkes county in Book 149, page 255. This 7th day of May, 1934.

S. L. PARDUE, Mortgagee.
LUTHER PARDUE, Assignee.
