Orpheus Music Club Met Wednesday Afternoon

The members of the Orpheus Music club met with Elizabeth Neil and Rosalie Osborne for their regular monthly meeting Wednesday afternoon. Marjorie Blevins presided for the business period. One new member, Dorothy Lenderman, was received into the club.

The program consisted mainly of the study of two American composers Edward McDowell and Ethelbert Nevin. A special study was made of McDowell's piano-suite "Woodland Sketches" and Nevin's suite "A Day in Venice." During this part of the program several selections were played by Miss Ursula Blevins, teacher of club, from the two suites. A variety of piano solos from a number of the pupils completed the program.

Two invited guests of the club were Misses Virginia Miller and Jessie Byrd. A delightful social hour followed the program at which time the hostesses were assisted by Mrs. J. W. Neel in serving dainty refreshments.

PROBE TREATMENT OF TWO NEGROES

Charlotte, March 8.—Some salves on their feet and "about a quart of salt" was the medical treatment two convicts whose feet were rotting off with gangrene received at a prison camp, a fellow prisoner said today.

W. Z. Ezzell, representing the state board of public welfare, began inquiry today regarding treatment at a Mecklenburg county camp, of two young Negro convicts whose feet were amputated Wednesday at the central state prison hospital, in Raleigh.

John Knott, white ex-convict, who was in the camp with W. W. Shropshire, 19, and Robert Barnes, 20, when the Negroes were placed in solitary confinement in January, declared Barnes became delirious after leaving the tiny cell and shouted all night.

MOST SMALL GRAIN NEEDS TOP DRESSING

Seven out of every ten of the 800,000 acres of small grain now growing in North Carolina will benefit from a top-dressing of quickly available nitrogen fertilizer.

"On this basis, there are at least 560,000 acres of small grain that should be top-dressed this spring," says W. H. Rankin, agronomist in soil fertility at the North Carolina experiment station. "Our studies show that the average yield of wheat per acre in North Carolina for 1934 was only 10 bushels. The average yield of oats was 17 bushels; of rye, 7.5 bushels, and of barley, 17 bushels. These are low acre yields and should be improved. They may be increased by the application of such quick-acting nitrogen fertilizer as nitrate of soda or sulphate of ammonia. The usual application is 75 to 100 pounds an acre.

Rankin points out that the addition of 20 pounds of nitrogen in the form of a top-dresser will cost about \$1.50 per acre. It will require one and a half bushels of wheat to pay for this nitrogen and it is not unusual for an application of 100 pounds of nitrate of soda, or its equivalent, to increase the acre yield from 25 to 50 per cent.

Apply the top dressing materials after freezing weather is over and the grain begins to make spring growth. While too early an application may hurt the grain should growth be stimulated and late frosts occur, still most nitrogen top-dressings are applied too late to be of most benefit.

The most desirable time is from March 10 to 25 in the mountains, and March 1 to 15 in the Piedmont section, Rankin says.

Dawes Thinks Depression Will End In Two Months

Tucson, Ariz., March 10.—Charles G. Dawes, former vice president, believes the depression will end in another two months and that the nation will realize it not later than July.

Voicing this conviction in an interview, Dawes said the depressions beginning in 1873 and 1893 lasted five and one-half years each as measured by the stock market, and that the one that began in 1929 should wind up in about the same length of time.
