ENDORSES LESPEDEZA FOR DAIRY FARMERS

Lespedeza is fast becoming one of the leading hay and pasture crops of the state, says John A. Arey, extension dairyman at State college.

It is well adapted to the soil and climate of North Carolina, and is also a nutritious, milk-producing feed of good quality.

Although the plant will grow well in slightly acid soils, he adds, it will do better if such soils are neutralized by a moderate application of limestone.

In total digestible nutrients, lespedeza ranks slightly above alfalfa and in digestible protein it ranks between red clover and alfalfa. Tests made at the North Carolina experiment station have shown little difference between lespedeza and alfalfa hay as milk producers.

Lespedeza is one of the best legumes that can be grown as a grazing crop, Arey states, since it produces large quantities of high quality feed. It affords good grazing in the late fall and summer months when most other pasture plants are short, unpalatable, and low in milk-producing value.

An abundant supply of good hay and pasturage are necessary for economical milk production, Arey declares. Cows fed liberally on this feed live longer and suffer fewer digestive disorders than those fed heavily on grain.

Members of the North Wilkesboro Kiwanis Club were well entertained on Friday noon in a program on the topic of “Boys and Girls Work.” The program was in charge of W. K. Sturdivant.

EARLY SENATE VOTE ON BONUS PROMISED

Washington, March 10.—Anxious to expedite action on the long delayed administration's \$4,880,000,000 relief bill, Democratic leaders today assured the senate of an early vote on the soldiers' bonus.

The measure's backers plan to put the issue of the cash payment directly up to President Roosevelt, who disapproves of the legislation. Whether Congress will sustain a possible veto is a subject of conjecture on Capitol hill.

The house is almost certain to vote favorably on the bonus this week, and senate backers, who had planned to try to tack it onto the relief bill, today were informed they would be given an opportunity for an early vote on the issue.

CONSTIPATION Can be Helped!

(Use what Doctors do)

Why do the bowels usually move regularly and thoroughly, long after a physician has given you treatment for constipation?

Because the doctor gives a liquid laxative that can always be taken in the right amount. You can gradually reduce the dose. Reduced dosage is the secret of real and safe relief from constipation.

Ask your doctor about this. Ask your druggist how popular liquid laxatives have become. The right liquid laxative gives the right kind of help, and the right amount of help. When the dose is repeated, instead of more each time, you take less. Until the bowels are moving regularly and thoroughly without any help at all.

The liquid laxative generally used is Dr. Caldwell's Syrup Pepsin. It contains senna and cascara, and these are natural laxatives that form no habit—even in children. Your druggist has it; ask for—
