WORLD'S WORST LIARS ARE FOUND

Paris, May 3.—The women of Easter Island are the most accomplished liars in the history of the world, Henri Lavachery, Belgian archaeologist said today. Dr. Lavachery said this was the truth—and that he had discovered it by patient search among hundreds of liars during six months research on that volcanic dot in the South Seas of the Pacific.

The professor, as a member of the Franco-Belgian ethnographic mission, helped to unravel the mysteries of the gigantic statues and cryptic writings of Easter Island. He said that one of the strangest things found was more modern, however, namely that the natives never, never, never would tell the truth if a falsehood would do just as well. "As far as I could find out," he said in an interview, "there was no particular point to the lies circulated by the Easter islanders. They apparently lie for the pleasure of lying and for the sake of being interesting. The women seem to be more adept at this than the men, although the men certainly are no slouches."

Would Scrap NRA

Siberia—In the extreme northern Siberia the ground is frozen permanently to a depth of 660 feet, and only thaws to an extent of three or four feet in the summer. Below 660 feet internal heat begins.

Nuremberg—The first practical watches were made in Nuremberg in the year of 1477.
