## Ann Harding and Maureen O'Sullivan in "The Flame Within"

Hollywood has discovered the perfect romantic team in Ann Harding and Herbert Marshall. No two players heretofore co-starred in a modern drama have been so well matched in talent, in charm, in distinction. No "gush" or cheap claptrap mar their flawless performance in the new "Flame Within" which comes to the Liberty Theatre Thursday for one day only. Miss Harding is seen to good advantage as the woman psychiatrist who devotes her life to untangling the mental disturbances of others. Herbert Marshall as the solid, reliable doctor of great charm, gives warmth and reality that few other artists could portray successfully. Louis Haywood, the recent winner of the Vanity Fair prizes for the best acting on the American stage makes his debut in "Flame Within" to a mighty fine achievement. Others of notable mention are Maureen O'Sullivan and Henry Stephenson, all of whom give an A-1 performance.

## Dairy Specialist Kiwanis Speaker

J. A. Arey, dairy specialist of State College and the extension service, was a visitor to North Wilkesboro Friday and delivered a most interesting and instructive address before the North Wilkesboro Kiwanis Club Friday noon in a program under the direction of B. R. Underwood, of the Scott Cheese and Butter company.

Mr. Arey spoke on a subject on which he is a recognized authority in North Carolina—dairying.

He stressed the importance of good breeding and adequate care and attention to dairy cows. In commenting on that phase of dairying known as "the family cow" he paused to mention that there are not enough cows for family milk production in the state and pointed out that one eastern county has an average of only one cow for each 26 families. His address was listened to with rapt interest.

Our KELVINATOR campaign for 1935 has just come to an end—the greatest campaign in the entire history of the North Wilkesboro branch—thanks to the co-operation of our patrons and friends—those who have been enjoying KELVINATOR service for a number of years and those who felt that they could not do without electric refrigeration any longer.
