

Highway Woes To Go For Labor

Washington, July 12.—Ordering State highway departments to spend their \$400,000,000 of work-aid funds so as to provide a year's employment for 271,400 persons, President Roosevelt today made construction of any substantial projects dependent upon State contributions.

The long-delayed regulations governing methods of spending \$400,000,000 allotted for highway and street construction, and the amount for grade-crossing elimination, required that each \$1,400 of Federal funds provide one year's job.

Officials said the high cost of materials made the cost of main highway and extensive grade-crossing projects about \$2,300 per foot. The regulations provided that work-relief funds could be supplemented from other sources, but that it would be necessary to give assurance the money would be available before the project was approved.

90 Cent Hour Rate

Federal contributions would be limited to the \$1,400 figure, or 90 cents an hour on the basis of a 100-hour month.

One section of the regulations said if Secretary Wallace, in whose department the Bureau of Public Roads is located, decided a State was "without a satisfactory State highway department," as defined by the Federal highway department, the State's quotas for both highway and grade-crossing projects "shall be subject to such special rules and regulations, authorized by law, as may be prescribed by the Secretary of Agriculture."

Officials explained this would permit Wallace to deal with officials of cities and counties, or other political subdivisions. Some members of the Georgia congressional delegation said this was inserted as a result of Wallace's dispute with Governor Talphage of Georgia.

IF YOUR BREATH HAS A SMELL YOU CAN'T FEEL WELL

When we eat too much, our food decays in our bowels. Our friends smell this coming out of our mouths and call it bad breath. We feel the poison of this decay all over our body. It makes us sluggish, grouchy and no good for anything. What makes the food decay in the bowels? Well, when we eat too much, our bile doesn't digest it. What is the bile juice? It is the most vital digestive juice in our body. Unless 2 pints of it are flowing from our liver into our bowels every day, our stomachs get hard and constipated and our food decays in our 25 feet of bowels. This decay sends poison all over our body every six minutes.

When our friends smell our bad breath (and we don't) and we feel like a whipped egg, don't use a mouthwash or take a laxative. Get at the cause. Take Carter's Little Liver Pills which gently start the flow of your bile juice. But if "something" is offered you, don't buy it, for it may be a calomel (mercury) pill, which causes teeth, gripes and scalds the rectum in many people. Ask for Carter's Little Liver Pills by name and get what you want for 25¢. ©1924, C.M.Co.

Nerves NERVES NERVES

Dr. Miles NERVINE
"Did the work" says Miss Glivar
WHY DON'T YOU TRY IT?

After more than three months suffering from a nervous ailment, Miss Glivar used Dr. Miles NERVINE which gave her such splendid results that she wrote an enthusiastic letter.

If you suffer from "Nerves," if you lie awake nights, if you are at sudden noises, are easily, are cranky, blue and fretful, your nerves are probably out of order.

Quiet and relax them with the medicine that "did the work" for this Colorado girl.

Whether your "Nerves" have troubled you for hours or for years you'll find this time-remedy effective.

At Drug Stores 25¢ and \$1.00.

DR. MILES NERVINE

"THE VIRGINIAN" THRILLS AGAIN

"The Virginian" is back again with all its thrills, romance, death, danger, thundering herds and yelling, hard-riding cowboys on the screen of the Liberty Theatre, Thursday and Friday. "The Virginian" has become an American classic and its story of a New England Girl who goes west to teach school, falls in love with a soft-spoken Southerner and is loved, in turn, by the Southerner's best friend, a wayward cowboy, will live on forever with its incidental plots conceived by a notorious bad man with an unbridled hate. Gary Cooper, just from his part in "Lives of a Bengal Lancer" is easily understandable when one sees the soft spoken Southerner who takes all things as they come and is noted for the famous line, "When you call me that—smile."

Control Insects To Prevent Crop Damage

Insect pests usually multiply rapidly during the months of July and August. If unchecked, they may spread rapidly and damage the crops seriously.

C. H. Brannon, extension entomologist at State college, urges all growers to keep a sharp lookout for insects during the summer, and to start dusting or spraying when infestations are discovered.

Tobacco growers can control the horn worm by dusting with arsenate of lead or with the one-in-six flea beetle poison. The dusting should begin as soon as the worms are found in appreciable numbers, he stated.

Immediately after harvest, he continued, it is advisable to kill all the tobacco stalks to prevent the pests from feeding on them and entering the winter season in a flourishing condition.

The Mexican bean beetle must be controlled if the late beans are to mature well and yield a good crop. Derris powder, which contains rotenone, is recommended. It gives excellent results in controlling the beetles and is not poisonous to human beings, Brannon pointed out.

KEEP CUT FLOWERS FRESH AND PRETTY

Cut flowers can be kept for a considerable time when given the proper care, says G. O. Randall, associate professor of horticulture at State college.

Cut the flowers with a sharp knife early in the morning or late in the afternoon, he advises. Then immerse the stems full length in cool water and place them in a cool place for an hour or more.

Keep flowers only in clean containers. Change the water at least once a day, more often in extremely hot weather.

When changing the water, cut off about an inch of the stems so as to provide a fresh surface through which the water may pass. Hold the stems under water while cutting off the end, as this keeps air from getting into the conducting tissue and blocking the flow of the water.

Remove the soft lower leaves from the stems, as they have a tendency to decay quickly. Keep the flowers in a cool place at night to preserve them longer.

Vigorous Assault Made On New Tax Program

Washington, July 11.—Business and industry, as represented by the Chamber of Commerce of the United States, today unleashed a furious and long-forecast assault on the president's tax plan.

It described the plan as destructive, confiscatory, and as a "perversion of the taxing power" of the federal government. Simultaneously, sarcastic debate broke out in the senate for and against the president's idea of bringing a "wider distribution of wealth" by putting stiff taxes on inheritances, increasing those on gifts and "very great" individual incomes, and making big corporations pay proportionately more than smaller ones.

Also there were indications of deep-set differences on whether the bill—not yet drafted, but estimated to raise anywhere from \$118,000,000 to \$209,500,000 a year—should be slapped through the house under a "gag" forbidding amendments.

The South has more people than in any country in Europe, excepting Germany and Russia; more people than in any country in Central and South America and four times as many people as Canada.

PWA Organization For State Formed

J. B. Roach Is Director For Winston-Salem District; Cole Named Assistant

Raleigh, July 12.—Directors and assistants of 330 eight districts of the Works Progress Administration in North Carolina were announced here by State Administrator George W. Coan, Jr., after a conference attended by nearly 100 relief and works progress officials.

"The district directors and their assistants will be expected to select their office staffs, subject to the State WPA administrator," Coan said. The assistant director in each of the districts will be the former district engineer for the division under the ERA program.

J. B. Roach, former head of the prison department of the state highway organization, will be director of the Winston-Salem district, in which Wilkes county is located. E. W. Cole, former district engineer of the ERA, will be assistant. Mr. Roach will select his own office staff.

Driver Is Held Following Fatal Accident Near Elkin

Elkin, July 11.—As a sequel to the wreck near Elkin some days ago in which Mrs. Maggie Cobble, 52, of near Mount Airy, was instantly killed, Jack Puckett, of Mount Airy, driver of the car, is in the Dobson jail in default of bond and under a charge of manslaughter.

Ora Taylor, a passenger in the car at the time of the wreck, who was arrested on a charge of transporting whiskey found hidden in a cornfield adjacent to the wrecked car, is being held for a court hearing under \$300 bond. Puckett was arrested at the time of his dismissal from the local hospital following treatment for minor injuries sustained in the wreck.

Liquor Consumption Off American Liquor Consumption

American liquor consumption (based on tax payments to the treasury) was markedly smaller in the fiscal year 1935 than in the fiscal year 1917. Whiskey consumption was 55 1-2 million gallons this year against 85 million just before prohibition. Wine shows 28 million gallons against 43 million. Beer shows 28 million gallons against 43 million.

This means that whiskey and wine consumption apparently dropped about one-third and beer about one-sixth with a population 26,000,000 greater and with 37 wet states against 20. Still more striking is the tax-paid consumption of grain alcohol—71 million gallons in 1917, and 16 1-2 million in 1935.

WILLIAMS IS NAMED SUCCESSOR OF GRAY

Winston-Salem, July 11.—S. Clay Williams, formerly president, today was elected chairman of the board of directors of the R. J. Reynolds Tobacco company, succeeding Bowman Gray, who died Sunday night at sea.

The first two eggs laid by a pigeon never hatch.

WASHINGTON... A summer night's view of the terrace fountain at the Capitol Plaza where Washingtonians try to find relief from the scorching heat during the summer months.

FARM QUESTION

Q.—My bean vines are being destroyed by beetles. How can I combat them?

A.—Dust with magnesium arsenate. Mexican bean beetles have appeared in large numbers this season and will be very destructive to late snap beans unless control measures are used. The insects may be controlled with a magnesium arsenate dust or spray or by using the new rotenone dust. This latter is being recommended quite generally now because it is non-poisonous to humans but it is more expensive than the magnesium arsenate. If you have only a few rows of beans in the garden, very good results may be secured by picking the adult beetles each day.
