Michigan Man Confesses He Drowned Step-Daughters To Get Them Out of His Hands

St. Louis, Oct. 9.—Ferrin Rowland, a Michigan woodsman, confessed today, according to Chief of Police John J. McCarthy, that he drowned his two small step-daughters in a Michigan lake because he wanted to be "rid" of them.

The girls, Kathrin Woodin, 6, and Virginia, 2, daughters of his wife by a former marriage, disappeared from Harrison, Mich., September 17 with their step-father. Their mother is in custody in Harrison.

Howland, traced to St. Louis by correspondence with friends in Michigan, was arrested by local and Michigan officers in a hotel here today. They said he attempted to shoot himself when they approached him.

Describes Drowning

According to the statement made to the chief of police, Rowland took his step-daughters from their home the morning of September 17, and drove to Slag lake, near Flint, Mich.

There, he placed the children in a row boat, rowed to deep water and wired them to a pole which had been used as an anchor. Then he rocked the boat until they tumbled overboard.

Gives Figures On Number of Jobless

Asheville, October 8.—Sixteen and two-thirds per cent of the total population of the State of North Carolina have been registered with the N. C. State Employment Service as being unemployed since the beginning of the Employment Service in 1933, Mrs. Hay Thompson Evans, State Director, announced here today, in making the annual report of the Service.

Over forty-five per cent of these registrants have been given employment during this period. The complete report for the period shows 526,662 registrations and 212,213 placements. The records of the Employment Service for the fiscal year July 1, 1934-June 30, 1935, show that a total of 75,744 placements were made as against a total of 79,505 registrations. The greater majority of these placements covering practically every walk in life were made in private business. These figures show through the fiscal report, monthly and weekly statements of the Employment Service, that placements are now being made in fifty and sixty per cent of all registrations.

This report is very encouraging as indicative of the unemployment situation in North Carolina, and especially so in view of the fact that the greater portion of all placements are in private industry. Placements in this State are increasing each week, according to the reports of the various District Offices, due to the general expansion in private business.
