116 Die In Crashes In State For Month

September Highway Deaths Only One Less Than All-Time Record Set Last December

Raleigh, Oct. 18.—Automobile accidents claimed 116 lives in North Carolina in September, only one less than the record highway death toll for one month which was set in December, 1934, at 117.

In nine months this year automobile accidents claimed 757 lives in the state, 110 more than the 647 killed in the similar period of 1934.

Compilation of the September statistics was not complete, R. R. McLaughlin, director of the motor vehicle bureau said, but it was shown that drunken drivers figured in 82 non-fatal accidents.

The death list of 116 for September this year was 10 names longer than in September, 1934, and 711 injured last month exceeded the 646 hurt in the similar month last year.

Longer Lines in Ford V-8 for 1936

THE LONGER and more graceful lines of the Ford V-8 for 1936 are well illustrated in this view of the popular De Luxe Tudor Sedan. The new longer hood extends gracefully over the attractive new radiator grille. Wide streamlined front fenders, with an imposing flare, shroud the tires and house the

horns behind chromium grilles. New design steel wheels with 12 1/2-inch hub caps are handsome and easy to clean. Bucket-type front seats are exceptionally comfortable. This body type, of welded steel like all Ford V-8 bodies, is also available without de luxe appointments at lower cost.

And then there was the little girl who signed her arithmetic paper "Mae West" because she done 'em wrong.

By cooperative action, ten Clay county farmers filled their ten silos at a cost of \$8 each by buying a silage cutter for \$60 and an automobile engine for \$10. The man said it was the cheapest feed they had ever stored.

IF YOUR BREATH HAS A SMELL YOU CAN'T FEEL WELL

When we eat too much, our food decays in our bowels. Our friends smell this decay coming out of our mouths and call it bad breath. We feel the poison of this decay all over our body. It makes us gloomy, grouchy and no good for anything. What makes the food decay in the bowels? Well, when we eat too much, our bile juice can't digest it. What is the bile juice? It is the most vital digestive juice in our body. Unless 2 pints of it are flowing from our liver into our bowels every day, our movements get hard and constipated and 1/2 of our food decays in our 28 feet of bowels. This decay sends poison all over our body every six minutes. When our friends smell our bad breath (but we don't) and we feel like a whipped tomato, don't use a mouthwash or take a laxative. Get at the cause. Take Carter's Little Liver Pills which gently start the flow of your bile juice. But if "something better" is offered you, don't buy it, for it may be a colored (sugar) pill, which loosens teeth, gives bad taste, by reason of many people. Ask for Carter's Little Liver Pills by name and get what you ask for—57¢. C1934, C.B.C.
