Kilby Attending Dealers' Meeting

Aggressive Sales Campaign Calls For Breaking Record Set During Past Year

More than 200 Ford automobile dealers of the Carolinas will meet in Charlotte today and Tuesday to hear a discussion of the new Universal Credit corporation finance plan and to consider ways for increasing business in 1936. It was announced Saturday by J. B. Hood of the Charlotte branch of the Ford Motor company.

A. F. Kilby, of the Yadkin Valley Motor company, left this morning to attend the meeting.

Mr. Hood said that 120 dealers will meet for a luncheon at the Charlotte hotel at noon today and 100 will meet for luncheon Tuesday. N. A. Oliver, assistant manager of the Charlotte branch, will be in charge of the meetings and W. C. Patterson, manager of the branch, will be chief speaker. V. E. Doonan, of the sales department of the Ford Motor company, Detroit, will attend.

Programs for the luncheon will cover in detail the aggressive sales program of the company for 1936, a program planned with the purpose of bettering the record of 1935. This record, said Mr. Hood, was the sale of 1,000,000 cars before November 1.

Mr. Hood said that Ford dealers are optimistic over prospects for the new year and are expecting it to go far ahead of last year in business.

FRESH, WARM WATER NEEDED BY LIVESTOCK

One of the most expensive ways a farmer can heat water for his livestock is to let the animals drink it cold and warm it with their bodies.

Giving the animals water at freezing temperature lowers their vitality, and seriously curtails the production of dairy cattle, said Prof. R. H. Ruffner, head of the State College animal husbandry department.

"Can you imagine a beef animal fattening, a calf growing, or a cow producing large quantities of milk after becoming thoroughly chilled and shivering for an hour in overcoming the effects of 10 to 20 gallons of ice cold water?" he asked.

He estimated that a cow producing 25 pounds of milk a day burns up more than a pound of corn in warming the water she drinks when it is taken into the body at freezing temperature.

At the State College dairy barn, where water is supplied at a moderate temperature, there are seven cows producing more than 50 pounds of milk a day.

The food burned to warm the water is needed to maintain the animal's vitality, promote growth, and to produce milk, Prof. Ruffner pointed out.

To attain her full milk-producing capacity, he added, a cow should be given all the fresh water she will drink at a temperature of 70 degrees.

If the water is too cold, she will not drink enough to maintain a full milk flow.

The resulting loss may be far more than the slight cost of providing animals with water from which the chill has been taken.

HALL HOLDS SECOND FELLOWSHIP DINNER

Yadkinville, Jan. 3.—Avalon E. Hall, local attorney, entertained about eighty of his friends and neighbors at his annual "good fellowship" dinner here New Year's Night.

The four-course dinner was attended by the business men of Yadkinville and about a dozen friends from Wilkesboro and two hours of feasting, speaking and merrymaking was enjoyed by those present.

W. E. Rutledge, local publisher, was toastmaster of the evening and talks were made by many present, among them being an address of welcome to all visitors by the Mayor F. D. B. Harding, which was responded to by ex-Sheriff Pressley E. Brown, of Wilkesboro. Other talks were made by Attorneys S. C. Williams and J. T. Reece, Yadkinville, E. C. James and W. M. Allen of Elkin; Kyle Hayes, J. F. Jordan, T. R. Bryan and others of Wilkesboro. Also by George Blevins, well-known farmer of Wilkes county, and J. W. Shore, banker and A. B. Hobson, of Booneville, as well as shorter talks by many others present.

All talks carried the New Year spirit and the theme of good fellowship among men. Mr. Hall, the host, spoke for several minutes at the close of the evening's program in which he stated he intended to make this an annual affair. This was the second of its kind by him.

Plans To Remodel Prison Are Rushed

Raleigh, Jan. 3.—Plans of North Carolina's prison remodeling program probably will be set tomorrow and work on the renovation of central prison here will be rushed in an effort to complete the entire job in 1936.

Rain drops sometime require an hour to reach the earth.

Some Like It Hot—Some Cold

NEW YORK . . . That it takes many likes to make a world is evidenced as news pictures pour in from winter resort-lands. . . . The styles are correct, left, Kitty Barrett wearing the season's newest bathing suit in Florida. Right, Miss Carlie Mayne, a Texas beauty, who prefers the ski runs of the North, at Lake Placid.

Federal Revenue Collected In State Last Year Totaled \$285,156,317

Evidencing an upswing regarded as indicative of generally improved business and at the same time denoting intensively prosecuted collection policies, Collector of Internal Revenue Charles H. Robertson and his associates obtained in North Carolina for the federal government during the year ending December 31, 1935, revenue in the sum of \$285,156,317.35.

The report, compiled by I. T. Newton, chief of the accounting division and made public by Mr. Robertson Thursday, reveals that internal revenue collections for the calendar year just closed constitute an increase of \$6,172,320.74 over the total of \$278,983,996.61 collected in the year which terminated December 31, 1934.

This very substantial gain was achieved in spite of the fact that by reason of litigation the collection of millions of dollars of processing taxes was held up during the calendar year 1935. In other words, had the collector not been restrained from proceeding to collect taxes in such cases—taxes running well into the millions—the increase for 1935 over 1934 would have been very large indeed.

Under the circumstances the record for the year is considered a splendid one. During the year collections reached such proportions as to reflect material improvement in general business conditions, it is believed. Income tax, for example, is regarded as a very trustworthy business barometer and collections in general have been such as to gladden the hearts of economists scanning the horizon for tangible evidence of better business. Developments of the kind indicated also are considered harbingers of increasingly healthy conditions in 1936.

Slated For Cabinet

WASHINGTON . . . John H. Fahey (above), Chairman of the Federal Home Loan Bank Board and a Massachusetts publisher, is reported the choice as Secretary of Commerce to succeed Secretary Daniel Roper who will be moved to Postmaster General when James A. Farley resigns to give attention to Democratic National Committee affairs.

Billings Child Dies

Worth Monroe Billings, infant son of Mr. and Mrs. Banner Billings, died Wednesday at the home near Roaring River, after a brief illness of pneumonia. The funeral service was conducted on Thursday at Pleasant Home Baptist church, by the pastor, Rev. John Burcham. Interment was in the church cemetery. Surviving are the parents, one sister, two brothers and the three grandparents, Mr. and Mrs. George Hemric and William Billings, of Wilkes county.

QUESTION AND ANSWER

Question: My chickens seem to be weak in the legs and stagger when they walk. What is the cause and how can it be remedied? Answer: This trouble is probably caused by improper feeding or a heavy infestation of internal parasites. Open the intestinal tract of two or three birds and examine for round worms or tape worms. If these are not present, the ration should be carefully studied and reinforced. An addition of 7-12 per cent dehydrated alfalfa meal to the laying mash usually helps to correct vitamin deficiency and is a valuable addition to the ration, especially during the winter months.

Finland boasts of being the northernmost republic on the globe; the first country to give absolute equal suffrage to women; the first to adopt prohibition. She also has the greatest forest area of any country in Europe; the greatest number of lakes of any country, and the largest paper mill in Europe.

SAVES ERODED LAND WITH BLACK LOCUST

Sleep, eroded lands may be brought back into production with black locust as a timber crop.

Black locust not only protects the soil but it also provides high quality timber for posts, poles, and fire wood, says R. H. Page, Jr., assistant extension forester at State College.

Page said that an excellent example of reclaiming a badly eroded mountain side in Avery County is located on the farm of J. L. Hartley.

Ten years ago Hartley scattered black locust seed pods on a field that was too steep to produce wheat, corn, or tobacco, and was rapidly eroding while lying idle.

He continued broadcasting seeds each year until at present there are 15 acres of land growing locusts from three to ten years of age. The trees range from six to 25 feet in height.

This winter Hartley is thinning out the timber by removing all deformed and suppressed trees from the older fields. This will provide more room for the trees which will later be used for posts and poles. The wood removed is being used for fuel.

Hartley is also seeding burned-over woodlands near his home with different varieties of tree seed, including poplar, ash, and northern red oak.

Planting trees on these burned-over areas holds the soil in place and starts the work of building its fertility, explained Hartley, who is a fire warden for the Linville Improvement Company.

Page said that black locust plantings are good for utilizing steep, eroded fields, not suitable for cultivation, in the Piedmont area as well as in the western North Carolina Counties.

HANES CONTRIBUTOR TO LIBERTY LEAGUE

Washington, Jan. 3.—Only one North Carolinian, R. M. Hanes, Winston-Salem banker, has helped finance the campaign of the American Liberty League against the new deal administration, according to a report just filed by the league with the clerk of the House of Representatives.

Hanes' contribution, however, was just a drop in the bucket in comparison with those who are really financing the league. Irene de Pont loaned the organization \$79,750, while six other members of this group contributed \$62,500. John J. Raskob, former chairman of the Democratic national committee, was another large contributor.

The corn plant has more than 1,000 possible industrial uses.

Getting Up Nights

If you suffer from Getting Up Nights, Nervousness, Leg Pains, Swollen Joints, Dizziness, Headaches, Loss of Pep, Burning Smelling, Itching, Acidity due to functional Kidney or Bladder troubles, try the Doctor's guaranteed prescription in 48 hours, and satisfy completely in 9 days or money back.
