

### Extension Class Closes Good Year

Enrollment Reached 83 During Term; Work to Be Resumed in Fall

On Saturday, May 23, the Lehigh-Valley College extension class closed one of its most successful years at Wilkesboro. The enrollment reached 83 in the fall term and 71 in the spring term.

Prof. Patterson said at the last session of the class that the college hopes to resume the work in the fall, though arrangements have yet to be made for the work, and that the courses may be in charge of Prof. Aderholdt.

The college would like to conduct a summer school again in Wilkes county, but the department at Raleigh has made the conditions so hard that no college in the state will be likely to conduct a summer school off its own property.

### Ice Cream Recognized As a Wholesome Food

Ice cream, once considered a delicate luxury, is now generally recognized as a wholesome food.

It supplies all the foods of milk for growth, body sustenance, and health protection, says W. L. Clevenger, extension specialist in dairy manufacturing at State College.

In addition, ice cream affords opportunity for combining with its delightful flavor the blend of luscious fruits, piquant nuts, and tropical flavorings.

Once the exclusive dish of royalty, ice cream is now available to every one—the "pick-up that won't let you down," Clevenger states.

Ice cream usually contains about three times as much butterfat, milk solids other than fat, and sugar as an equal weight of milk.

The milk solids consist of high quality proteins and minerals like calcium, phosphorus, and iron.

Ice cream, which are delicious and refreshing during hot summer months, can be prepared with about 20 per cent suitable fruit juices, 30 per cent sugar, and the remainder pure water or milk, depending upon whether an ice or a sherbet is desired.

Ice cream has another advantage, Clevenger pointed out, in that it satisfies the cravings for sweets and deserts and thus helps eliminate the temptation to eat other such foods that are not so helpful.

The easy digestibility of ice cream, he continued, makes it a good food for children and invalids.

About 500 club members are expected to take part in the cotton festival to be held at Smithfield, Johnston County, during the first week in June.

### Summit News

SUMMIT, May 25.—The Yellow Hill singing choir is planning on attending the 5th Sunday singing at Bowling Green.

Mr. Ralph Bushman and sister, Ruth Bushman, of Boone, spent last week in this community visiting friends and relatives.

Mr. and Mrs. Noah Miller, of Blowing Rock, are now visiting Mr. Miller's aunt, Mrs. H. C. Kight.

Mr. and Mrs. H. C. Kight and Mr. and Mrs. Noah Miller visited in the home of Mr. and Mrs. Arvill Greene, at Stony Fork, Thursday night.

The people of this community have been very busy for the past few days cleaning and sowing grass in the Yellow Hill cemetery.

Mrs. W. A. Beng and Mrs. Sarah Carnett visited Mrs. Beng's daughter, Mrs. Pressley Church, Friday.

Mrs. Ruth Mikel and children, spent Saturday night in the home of Mr. and Mrs. Coy Church.

Mr. and Mrs. Leonard Greene, of Stony Fork, spent Saturday night in the home of Mrs. Greene's parents, Mr. and Mrs. H. C. Kight.

Mr. and Mrs. Lee J. Church and children, Johnson and Helen, and Mr. and Mrs. Coy Church and Mr. Pressley Church attended meeting at the home of Mrs. Margaret Mikel at Stony Fork Sunday afternoon.

Mrs. Lisa Fleenor and daughter, Anna Bell, visited in the home of Mr. and Mrs. Lee J. Church, Sunday.

### SUPERPHOSPHATE MORE EFFECTIVE WITH LIME

Farmers are finding that the triple superphosphate manufactured by the TVA gives better results when mixed with ground dolomite limestone.

The limestone dilutes the highly concentrated superphosphate and thus makes possible a more even distribution over the fields, said L. G. Willis, soil chemist of the N. C. Agricultural Experiment Station.

It also increases the efficiency of the phosphate, neutralizes soil acidity, and supplies the calcium and magnesium needed by many North Carolina soils, he added.

Generally speaking, he said, the mixture should contain three parts of ground dolomite limestone to one part of triple superphosphate, but the proportions may be varied to suit the soil on which it is to be applied.

If a wet grade of limestone is used, a few lumps will be formed in the mixture, but they can be broken easily by shovelling over the pile of limestone and superphosphate occasionally, Willis pointed out.

When the two elements are mixed, he continued, the chemical reaction will take up the water in the lime, leaving a dry product in excellent mechanical condition from which the limestone and phosphate will not separate.

The mixture may be made with dry limestone, Willis observed, but better results will be secured if it is dampened with water.

Although the limestone and phosphate do not separate while waiting to be spread on the fields, he went on, there is no reason to believe that the limestone causes any reaction which would make the phosphate less available to plants.

### QUESTION AND ANSWER

Question: Will landlords or farm owners share in the soil-conserving payments for land taken out of production of soil depleting crops?

Answer: Yes. This payment will be divided among owners, share-tenants, and share-croppers in the same proportion as the principal soil-depleting crop or the proceeds from this crop is divided under the lease or operating agreement. Soil-building payments, however, will be made to the producer who incurred the expense in following out the soil-building practices. If two or more producers incurred this expense then the payment will be divided between all parties.

Ten bushels of Jarvis Golden and three bushels of Weekley's improved seed corn have been distributed among 92 corn club boys of Surry County this season.

### Rubinoff Holds World Record for Broadcasting

Rubinoff and his violin—and Chevrolet—are a combination that few, if any, radio listeners in the United States have not received in their homes via the air. The famous violinist and his Stradivarius, stars of the Chevrolet Musical Moments programs, have the distinction of going on the air from more broadcasting stations than any other program in the history of radio.

### Nancy Hart's HOME NEWS

Limited budgets have caused many thrifty women to turn to the home kitchen for beauty preparations that may be found there. And this does not mean a return to the herbs and simples of grandmother's day which often were difficult to prepare and of uncertain value. There are many economical beauty aids to be found on your own kitchen shelves and their use will make possible the investment of whatever money may be spent in real good cosmetics for which there are no substitutes.

Lemon juice in a weak solution, besides being an effective rinse after shampooing, makes a fine skin bleach for hands and elbows. Ice water, and even ice itself applied directly to the skin, stimulates circulation and helps to tighten and refine the pores.

The mixture may be made with dry limestone, Willis observed, but better results will be secured if it is dampened with water.

### WPA PROJECTS TO BE MADE UP SOON

schools; E. R. Spruill, Mountain View principal; T. E. Story, Wilkesboro principal; R. V. Day, Millers Creek principal; R. T. McNeil, Mayor of North Wilkesboro; Mrs. F. C. Forester and Mrs. C. H. Cowles, presidents of the North Wilkesboro and Wilkesboro Women's clubs; James M. Anderson, North Wilkesboro police chief; Mrs. Dudley Hill, North Wilkesboro P. T. A.; Mrs. Julius Hubbard, Wilkesboro P. T. A.; A. F. Kilby, American Legion; Mrs. W. R. Absher, Legion Auxiliary; Ralph Duncan, Wilkes board of commissioners; R. G. Finley, North Wilkesboro board of aldermen; Rev. Eugene Olive; Miss Frances Cashlon, merchants' association; J. A. Gilliam, of Hays.

Army regiments. These buttons, which are made of nickel silver, are hand-worked with designs cut out with fine jewelers' saws. The filigree and designs are said to be comparable to those worked on precious metals. Some of the saw blades are so fine that they are practically invisible.

The use of poisonous insect sprays by fruit growers has created a problem for food processing establishments. To make the product safe for human consumption and to comply with the United States Food and Drug Act, it is necessary to remove every trace of the poison. For this purpose, weak solutions of hydrochloric acid are employed.

Mae West is one of the few Hollywood players who never has been seen in low-heeled shoes. Although many feminine stars descend to tennis shoes, bedroom slippers, and bare feet in between the shooting of scenes, the buxom blonde remains mounted on high heels at all hours of the day.

A newspaper columnist reports the case of a woman who sent her radio back because the cake she baked from the radio recipe turned out bad!

### MIGHTIEST TEAM HAS NEVER BEEN DEFEATED

The strongest team of horses in the world—that's what witnesses of the pulling feats of Rock and Tom, call this famous pair of Belgians. They are owned by the Statler Farms Co. at Piqua, Ohio, and in the various pulling meets held around the country, they have never met defeat.

Rock and Tom are the featured illustration in the current natural nitrate advertisement, one of a series of educational announcements appearing regularly in this newspaper. Their record is 3,900 lbs. tractive pull, the equivalent of pulling 9 plows cutting furrows 14 inches wide and 6 inches deep.

The natural nitrate folks point out that these magnificent animals are Mother Nature at her best. They are creatures to whom Nature gave the vital spark, a perfect balance of all the elements that combine to make an unbeatable performer. The parallel is pointed out between the mighty Rock and Tom and the natural nitrate of soda which Nature also favored with her vital spark, a natural balance of major and minor elements that are so important in the healthy growth and feeding of crops.

As the agricultural world now realizes, the natural nitrate contains as impurities, many elements other than nitrogen. Magnesium, for instance, calcium, boron, manganese, potassium and iodine are a few of the many elements which nature has blended into the natural nitrogen fertilizer material which is so widely used to improve crops of the South.

### QUESTION AND ANSWER

Question: When should nitrate of soda be applied to vegetable crops?

Answer: The quality of succulent vegetables is dependent upon rapid growth and this can be secured by the application of nitrate of soda or its equivalent in soluble nitrogen, but the time for applying the soda depends also upon the vigor and growth of the crop and upon seasonal conditions. The grower must use his best judgment in determining when to apply the side dressing. Care, however, should be taken when the application is made. The soda should not come in contact with the plants as this will cause severe damage by burning.

### S. S. Convention Be Held Sunday

At Cool Springs Church in Edwards Township; Home Coming is Announced

The Edwards township fifth Sunday school convention will meet on May 24 at Cool Springs church, according to a recent announcement. The church is located five miles northwest of Blain.

The third annual home coming will be observed at Cool Springs on the second Sunday in May, it was also announced.

### AUTO PARTS CO. IN BETTER LOCATION

(Continued from page one)

change in location was not made until Gaddy Motor company moved into newly constructed quarters on Tenth street.

Auto Parts company carries at all times a complete stock of automobile parts for all popular makes of cars and has been of great service to automobile owners and garages in this part of the state in that they have been able to supply parts of almost any description from their large stock. Accessories are also carried for all makes of automobiles and trucks.

The new building has been remodeled on the interior to suit the needs of its new owners and affords ample space for storage of a complete stock and display of parts and accessories. The management of the firm invites a call from the people of Wilkes and adjoining counties.

### Walsh News

WALSH, May 25.—The people of this community would be very glad to see a good shower of rain as their gardens are falling behind and pastures are getting short.

Mr. and Mrs. J. C. Wheeling, of North Wilkesboro, visited in the home of Mr. T. R. Parsons to see Mrs. Wheeling's parents, Mr. and Mrs. John Beng, Sunday afternoon.

Mr. and Mrs. Forest Yates, of Purlear, visited Mrs. Yates' parents, Rev. and Mrs. T. J. Walsh, Sunday.

Mr. and Mrs. Noah Thomas Benton, of Purlear, visited in the home of Martha Walker, Sunday.

Mr. D. F. Beshears visited his brother, H. H. Beshears, Sunday afternoon.

Mr. M. F. Phillips visited in the home of Mr. Tom Parsons, Sunday morning.

Mr. Scott Beshears visited in the home of Dewey Goforth, Sunday afternoon.

Mrs. Martha Walker and daughter, Clara, visited in the home of Lonnie Ashley, Sunday afternoon.

Mr. Darius Welch and family made a quick trip to Wilkesboro Sunday afternoon.

Mr. T. R. Parsons and son, Howard, visited Mr. C. L. Yates, Sunday morning.

Mrs. Cordia Griffen visited in the home of Mr. and Mrs. T. R. Parsons, Sunday evening.

Big Ivy Sunday school is progressing nicely.

### QUESTION AND ANSWER

Question: Is it advisable to force molt pullets to be held over for layers?

Answer: It is well known that late molters are the high producing birds in the flock and these birds are usually in fairly heavy lay during the summer months when egg prices are relatively high. Where the molt is exceptionally late, it is difficult to secure suitable eggs for early hatching the next year. An early forced molt therefore would bring the birds back into lay in early autumn, but would react to the disadvantage of the breeder doing trap nest work.

New Hanover farmers plan to increase the acreage to Iceberg lettuce next season since the old varieties do not sell to advantage.

Tobacco growers of eastern North Carolina report that plant beds are rapidly recovering from recent attacks of blue mold and though the disease has hindered planting there will be a shortage of plants in only a few instances.

### Preparations Under Way For Primary On June 4

(Continued from page one)

registrars of the various precincts and persons interested will obtain them from the registrars. Mr. Anderson said yesterday.

For information officials quote in part, section 144 (a25) North Carolina Election laws as amended, including laws of 1935:

"However, that no marker shall be named for or permitted in primary election, conducted under the provisions of this act, provided further that in any primary election held hereunder, any voter may ask and secure from any election official at his voting precinct aid in the preparation of his ballot or in voting.

"Provided that any voter in primary elections may be accompanied into the voting booth by any member of his or her family for the purpose of aiding in the marking of his or her ballot or by any other person requested by the voter."

### Savings Insurance

Insurance of investors' accounts in institutions of the savings, buildings and loan type now is available in 44 States and the District of Columbia and Hawaii, reports the Federal Home Loan Bank Board.
