Another Industry

The joint meeting of the merchants association and city board of commissioners Thursday evening and the enthusiastic interest shown in preliminary efforts to induce another industry to North Wilkesboro is perhaps one of the most encouraging signs of the year for North Wilkesboro and Wilkes county.

A fine spirit of cooperation was shown in the meeting and all were of one acord that every reasonable inducement should be given to any industry that will invest and locate in North Wilkesboro. It is such cooperative efforts that gets results. Industrialists have been for the past fifteen years locating mills and factories of various kinds in many southern cities. Some of these have become great assets in towns more unfavorable as a location than North Wilkesboro.

The merchants' association is substituting in an admiral manner for a chamber of commerce and as such should be given wholehearted cooperation.

It was pointed out by some of the public spirited business men in the meeting Friday night that this section has something to offer that cannot be found anywhere else-that is pure Anglo-Saxon labor of the very best type -contented with any reasonable and fair treatment. Labor troubles are practically unknown here because the people are native, free from foreign agitators, communists, fascists, or any other "ists" or troublesome cliques. No one here believes in cheap labor, that is wages below the point where one could earn a decent livlihood, and no industry coming here expects to promote sweatshop methods.

Any fair dealing industry will find that this section has a great natural resource-a bountiful supply of labor. Local industrial men tell of the constant number of applicants for jobs that they must necessarily turn down. These people-generally speaking-desire jobs because they want to earn a better living than they have in the past.

The Research Station

Apple growing being one of our leading branches of agriculture in Wilkes county, the research station to be erected on the Brushies has rightfully attracted wide interest.

The state made an appropriation for a two-year period of research and the orchardists are collecting funds with which to erect a building to house the station. The funds appropriated will do much in research work but are not sufficient to erect the building in addi-

Those who are interested in the fruit growing industry should help this movement as much as possible.

No doubt, the fruit growers will take advantage of the opportunities afforded by the research work and will show such improvement that the appropriation will be continued at the end of the

The project can and will prove of much benefit to the fruit growing industry, a big income producer, and deserves widespread support.

Rules of The Road

1. Make everyone that you meet smile every time you meet them.

- 2. Make everyone feel more comfortable, happier, or better for having met
- 3. Be constantly looking for pleasant experiences and enjoy them.
- 4. Multiply your enjoyment in them by telling of your pleasure to others.

5. Persist in following these four rules until they become fixed habits and are followed without effort.

Liquor and Education

While many differ as to whether or not liquor should be legalized, "controlled" or prohibited, very few people are willing to try to defend liquor or its use. They can point out not one benefit from the use of liquor as a drink.

People will watch with much interest the results of teaching the evil effects of alcohol in schools. The course was instituted for the first time during the past school term and was given in the sixth grade, it being the theory that sixth grade children were of the proper age and development to begin to understnd some of the things about the human mind and body. The children are being taught in the schools that liquor will wreck bodies and minds. If parents will follow up this course and also provide a background by even earlier teaching and training in the home there should be some noticeble results in the next few years and a drop in the consumption of strong drink.

It is deplorable that some liquor advertising is apparently directed to secure more consumers of liquor in general. If the government is to "control" liquor it should be able to curb this type of advertising which is in conflict with the teachings in the schools.

Sugar For Needy

Vigilant officers hereafter will be aided and unfortunate poor in Wilkes county when they destroy stills and confiscate materials.

Gone are the days when grain was used to make moonshine. The moonshiners have been working for volume production at low cost and their chief materil is sugar.

By a special arrangement the sugar found at the still by county officers will be turned over to the welfare department to dispense to the poor. In this manner an evil will be converted into a blessing for the underprivileged.

What is your hobby-? If you haven't one, you're cheating yourself, your family, and your neighbors. Success is not measured by the work of a few years but rather the consistent, conscientious efforts of a lifetime. It's the long, constant pull that counts—and it takes a hobby to keep you from breaking under the strain and make you enjoy life as you go along.

The Spinster Who Turned Down the Marriage Proposals of a Thousand Men

have ever known has had a thousand men propose to her. She has turned down offers from mil lionaires and from fishermen and farmers and penniless men on the Bowery. A prince from one of Europe's most prominent royal families followed her for months and begged her to marry him. And now, although she has already reached her three-score years and ten, she is still getting her secretary doesn't even bother to show them to her.

Her name is Evangeline Booth and she is the head of the grandest army that ever attacked an enemy—the Salvation Army—an army with thirty thousand officers, feeding the hungry in eighspreading love in eighty different languages.

"I got something of a shock when I met Evangeline Booth. I knew she was old enough to be a grandmother, yet her dark red hair was just beginning to show a few streaks of gray. And she was sparkling with vivacity and blazing with enthusiasm.

Every summer when she is in America, she goes to Lake George and does fancy diving-jackknives and turtle-backs and swandives; and when she was sixty three, she swam clear across Lake George in four hours.

It takes her an hour to motor from her house to the office; and ity and forgiveness. she dictates all that time in her automobile.

Evangeline Booth says that one of the most thrilling experiences of her life occurred during the gold rush to the Yukon. You may recall that just before the turn of the century, gold was discovered in Alaska, and the news set the nation seething with excitement. Hordes of men began hurrying to the far North and Evangeline Booth knew that the Salvation Army would be needed there; so with a couple of trained nurses and three or four assistants, she headed for the Yukon. When she landed in Skagway, eggs were worth twenty-five dollars and butter three hundred dollars a pound. Some men were hungry and all of them carried guns. And everywhere she heard men talking about "Soapy" Smith, the killer of the Klandike, the linger of the Yukon. "Soapy" Smith and his geng laid in wait for miners returning from the gold fields and shot them down without warning and robbed them of their gold dust. The United States Government sent an armed posse to kill him; but "Soapy" Smith shet all of them and es-

This vast crowd of men sang until one o'clock in the morning; and then Evangeline Booth and her helpers went out in the forest to sleep on the ground under the plne trees. They had started a fire and were making a little cocoa when they saw five men approaching them with guns. When they got within speaking distance, the head man took off his hat and said. "I'm 'Soapy' smitth; and I've come to tell you how much I enjoyed your singing." And he added, "I was the man that sont you the blanket while you were singing. You can while you were singing. State College Holds Older Youth Meeting

State College this week is the first organized attempt ever made in North Carolina to help farm youth through one of the most significant yet unsettled periods

The conference is designed to give guidance and special training to rural boys and girls between 18 and 25 years of age, of the U. S. biological survey; said L. R. Harrill, 4-H club spec ialist at the college.

These young people are a litthe too old for regular 4-H club work, yet are not served adequately by adult organizations, Harrill pointed out.

After the conference, he continued, an effort will be made to form older youth's organisations in the different countles which will be patterned somewhat on the nature of advanced 4-H clubs.

Besides the studies in agricultural engineering, dairy cattle, wine, work stock, plant pathology, poultry, home beautification. foods, clothing, and bome man agement at the conference, the boys and girls are being given wholesome recreation and are hearing helpful talks by agricultural and educational leaders, Harrill stated.

Among the speakers are: Dr. O. E. Baker, senior agricultural economist of the U.S. Depart-
