### Consideration lu Spraying Trees

County Agents Giro Timely Advice To Orchardists Relative to Spray

Dan Holler, Wilken county agent, and J. P. Loggans, county agent of Alexander, have release ed the following statement relative to spraying orchards:

During times of sconomi stress, fruit growers attempt to reduce costs whenever pos and, as may be expected, those operations that require the hear viest outlay of cash, such as spraying, come in for the most drastic revisions. Some experiment with new materials, others reduce the number of sprays, while still others try to economise by reducing the concentration of the materials, or by skimping on the coverage.

The four main considerations

in successful spraying are: Proper Timing.—An apple scab spray applied after the fungus has entered the tissues of the leaves or fruit is effort wasted. Prevention should be the watch word in the case of fungous diseases. Plant diseases are rarely cured but they can be prevented.

He Prompt.-To put on a cover spray of arsenate of lead after the worms have gone into the fruit will be of no avail. The most thorough coverage with the best materials will not control insects and diseases if the spray is applied at the wrong time. Proper timing requires not only that the spray be started at the proper time, but that the application be completed within a certain time limit. This cannot be accomplished without proper equipment and sufficient pump capac-

Thorough Coverage.-No matter how correctly the sprays are may be, if the fruit and foliage are only partly covered with spray, satisfactory results cannot be expected. A heavy application made to the lower and outside parts of the tree, with little or no spray reaching the top and inside of the tree, will not give satisfactory control of either insects or diseases. Adequate equipment in proper operating condition and with sufficient pressure at all tative Bryant of Durham, foltimes to carry the spray into the lows: tops and inside of the trees, is necessary for getting the sprays on at the right time and to se

cure complete coverage. The Right Kind of Spray Ma terial. — The materials recommended in the various schedules are those which have been thoroughly tested under varying conditions and have been found safe and effective. An adequate water supply is another essential factor.

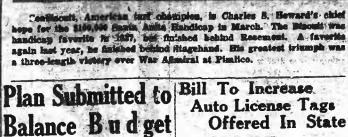

Some manufacturers of new spray materials claim better control at less cost for their products. Growers are warned not to take chances with spray materials that are not recommended in the schedules. When new materials have been properly tested and found superior, they will be recommended by the county a-

#### Natural Impurities Needed In Fertilizer sub-divisions.)

Because of their deficiency in some doubt has developed as to the new, highly concentrated fertilizers. Until about 25 or 30 years ago, it was generally believed that nitrogen, potash and acid satisfied the crop's total need for plant food. At that time, however, nitrogen mat-rials of high purity began to be used instead of the old style, natural fertilizers like blood, bone, scrap stable manure and meal, which had gotten scarce and expensive Since then, experience has revealed the value of many of the plant food elements contained in natural fertilizers as impurities and "It is a common complaint a

mong farmers," says Professor L. G. Willis of the North Carolina Experiment Station, "that the quality of fertilizers has been lowered. It would seem that it should take less of the concentrated fertilizers to make a crop and that farmers would profit by using them. Actually, the reverse has been true. Farmers have had to use more of these newer fertilizers, but there is no evidence that crop yields have been correspondingly increased. As the analyses of fertilizers have increased, the rate of application also has increased, resulting in

higher fertilizer costs." Purity in fertilisers can only be attained by eliminating the impurities. Many of the impurities in natural fertilizers, however, are just as necessary to plants as nitrogen, potash or county March I and & the firephosphate. They cannot make a of its kind ever to be scheduled crop without them. In view of the in the county. rather unsatisfactory results thus far obtained with the new high-purity materials and highly con-ments contained in them as imcentrated fertilizers, it seems car purities, and to the co

Raleigh, Feb. 21.-A sub-committee of the General Assembly's joint finance committee today recommended & nine-point program to 'balance the state's budget," including previously rejected proposals to increase liquor taxes and to extend the sales tax to "basic" building materials.

Almost immediately after hearing from the subcommittee, which had labored since last Friday on its recommendations, Senator Umstead of Orange countered by offering an amendment providing for an increase of approximately timed or how good the materials 16 2-3 per cent in the income

tax. No action was taken.

Despite a motion by Senator Boyette of Moore that the subcommittee's report be adopted immediately, the committee decided to defer action and to hold hearings Thursday on all new taxation proposals. The Program

The program, as presented to the full committee by Represen-

1. Increasing the estimate of returns from the inheritance tax by \$75,000 a year (without actually raising inheritance taxes).

2. Increasing the levy on machines vending soft drinks from \$15 to \$30 a year to net \$45,000 | 3. Increasing tax on chain

stores either by increasing rate or by adopting the Louisiana plan of taxing chains on a basis of to-tal stores, regardless of where they are located 450,000 per year.

4. Raising an additional \$35,-000 a year from Alling station operators chief by country the levy per paint from \$4 4 46 or by a gallonage tax.

5. Boosting the estimate of the state's share in the intangibles levy by \$50,000 a year (without changing tax or 25-75 division of receipts between state and

6. Removing the sales tax exemption on basic building materials-\$400.000 a year

7. Increasing the tax on liquor from 7 to 10 per cent of gross sales-\$200,000 a year.

Increasing the levy on installment papers from one-fourth to one-half a cent on the \$100-\$90,000 a year. 9. Reducing the levy on beer

from 1 1-2 cents to 1 1-4 cents

per bottle with the revenue estimate the same. Bryant said the proposals had een made after the finance subcommittee had conferred with an

appropriations subcommittee and that the two groups had gone to work on the theory the budget was \$1,038,000 a year out of balance.

#### Lions, Rumblers To Clash Here Again

North Wilkesboro and Wilkesboro boys are expected to put on another good basketball game Friday night when they meet on the local high school gymnasium

With a "Dick Merriwell finish" the North Wilkesboro boys came from behind to snatch last Friday's game out of the fire by a score of 22 to 21 with the last shot being scored as the last 30 seconds of play were ticking at

Friday night's game will be equally hard fought and should attract a big attendance of cage

Champ Gets Rub-Down

Raleigh, Feb. 20 .- A bill to in crease the cost of automobile license tags by 50 cents, and to use the receipts to establish a hospital insurance fund for victims of highway accidents, was introduced in the General Assembly tonight by Senator Long of Halifax.

Representative Woodhouse of Yadkin sent forward a measure to abolish all county alcoholic beverage control boards and to transfor their duties to the boards of county commissioners. The bill was understood to be an economy proposal.

The hospital insurance meas ure, said to be backed by the State Association of Hospitals, was referred to the Senate finance committee. The bill provides that the insurance would become effective as soon as a \$100,000 fund is setup from receipts of the additional 50-cent levy on auto license tags.

Under the proposal, the fund would pay \$3 a day, for 21 days, toward the hospital expenses any North Carolinian injured in a motor vehicle accident.

The Arch-Bishop of Canterbury may be heaping coals of fire on Edward's head now, but he may be singed later.
