### Steam Is Necessary To Can Pork Safely

It takes three things, says Mrs. Cornelia C. Morris, Extension economist of State College, to have an ample meat supply throughout the year and at the same time prevent waste that so often occurs during the slaughso plentiful. First is foresight. then industry, and third, and Friends are glad to learn that probably the most important, a

> "The only safe way to can pork is with steam under pressure; therefore, a pressure canner is a necessity," Mrs. Morris declared.

Some of the food conservation specialist's suggestions on canning meats follows: Select fresh. clean meat and discard the suras, Va., after spending a week fore canning, but do not allow it

Meat may be canned either raw or partially cooked, and the be done by searing the meat in early advantages had wanted all fulness due to superiors and eldfat, by partially roasting it, or by parboiling. Meat to be canned day on her walk home, moved by tentativeness about your request? should not be cooked more than an impulse which she fortunately Didn't you ask for cooperation in half done.

## Arey Tells Dairymen To Raise Own Calves

On January 1, 1932 there were 181,000 milk cows in North Carcow is only about five years.

On this basis, says John A. Arey, Extension dairyman of State College, it will be necessary for North Carolina farmers and dairymen to raise 76,200 heifer calves annually to even maintain the number of cows now in use, which is not enough to produce a sufficient quantity of dairy products to meet the demands of home consumption.

In the sections of this State from which milk is sold for fluid consumption, some dairymen still depend upon buying cows to replace the discarded ones rather than raise them, Arey stated. 'This method of replenishing a herd is often responsible for heavy losses caused by bringing in communicable diseases through new cows. It also rarely ever results in increasing herd production from year to year," he continued.

"Since the ability of cows for milk production is inherited, the wise dairyman will use a good bull and raise his best heifer calves. He will see in each of these heifer calves the possibility of a cow which will not only re place a discarded member of his herd, but will also help to raise the average production of his

The specialist said that the last Federal census report showed that there were 90,000 farm families in North Carolina without even one family cow.

The shortage of cows in this State, and the great difficulty in ecuring good cows frem other States, even se high prices, makes olina, or approximately one milk it very important that our farm cow for each nine inhabitants, ers and aprivmen give more at-The average productive life of a tention in the future to the raising of good heifer calves," Arey

Junior stood up, thustered and red. "Space," he began, "le when there is nothing. I can't expliit exactly, but I have it in head, all right."
