

The famous John Robinson Elephants—for many years a feature of the old John Robinson Circus in past seasons, are here again, after many years and present their interesting routine of tricks, directed **to Captain George Thompson**, at the fair all this week.

ANNUAL BUDGET ESTIMATE FOR Dr. Dafoe Urges **Health Checkup** For The Children

The most important thing parmts can do to insure a child having a good start in school life is to see that his health is so protected that he misses no school through illness.

Yearly Epidemics

 measles or one of the other com-mon communicable diseases.

 cautions against them.

bis life.

Vaccination Needed

that they are protected as far as possible against diseases. Up to now, these children have been leading a comparatively secluded beginning of school they rub elbows with children from many homes, and sooner or later will come in contact with another child who is carrying the bug that causes some disease.

doctor, if you haven't already done so, and have him toxoided Have him vaccinated for smallpox as soon as possible. The latter is andatory, anyway, and the ear-

MONDAY, SEPT. 215, 1940

lier you have it done the better.

Toxoiding is not a serious discomfort to a child, and the youngor it is the less reaction it gets from it. Vaccination he the same. It doesn't bother children now, for vaccination has come a long. long way in the last few years. Vaccines are much purer and reactions much less severe.

A trip to the dentist is a good idea also. In other words, a child should have a complete check-up to insure he's in the best possible physical shape for school.

Answered By Questions State College

Question: What is tobacco mosaic and how can it be controlled?

Answer: Don E. Ellis, Extension plant pathologist of State College says that tobacco moisaic is a highly infectious disease. sometimes called Walloon or Calico. It is able to live over in practically all types of natural or manufactured leaf tobacco. Sanitary measures, including the avoiding of handling undiseased plants after handling diseased plants, is the best system of control. Ellis says that all plants showing symptoms of mosaic in the field should be destroyed, but care should be taken not to handle healthy plants after pulling the diseased ones. Ellis also says that the plant bed is the first and one of the most important sources of infestation, and he strongly urges that no tobacco trash of any kind be applied to the plant bed, and that seed be used which are free from chaff which might carry the disease.

NINE DAYS WITH GENIUS TOM EDISON, Remarkable never-before-printed diary of the famous inventor-a vitally impertant and human document. Don't miss this illustrated feature in the September 8th issue of The American Weakly, the big statine distributed with the discrete Sandar American, Sold by All Programive Newscalors.
