with garden tools, as they put a FARMERS USE FLECTRICE TO INCREASE PRODUCTION

the farm, thousands of North Carolina growers have turned to electric power to help increase production, says David S. Weaver, agricultural extension engineer at N. C. State College.

Great progress has been made in rural electrification in recent According to Weaver, years. three in every ten of North Carolina's 278,000 farms now have Helping with this program of central station electric service, club work is another group of and nine-tenths of the electrified workers on the home-front—the farms have begun to use elec-Years.

Since the passage of the Rural Electrification Act in 1936, thirty-two electric distribution systems have been established and they now supply electricity to 36,276 farms and other rural consumers. The extension of service to these customers was made possible through \$12,820,690 adance 11,519 miles of lines and other facilities.

A new liberalized order of the War Production Board may make it possible to extend electricity to hundreds of additional North Carolina farms engaged in the production of such vital war foods as meats, poultry, eggs and milk, says Weaver. Farms eligible to receive service under the new order are those located near existing rural power lines and those which meet certain minimum was food production requirements.

Eire reports that while queues for automobile licenses are mising this year, the demand for dog licenses is as great as ever.

labor Production Of Food Poultry, 242,627 birds. Livestock, 8,108 dairy calves, 648

beef calves, 491 sheep, 10.829 hogs Garden, 4,230 acres Bees, 151 colonies. Conservation Of Food

Canning, 818,424 quarts canned.

Faced with a labor shortage on Rise In Living Cost

Living costs are slowly rising but still lag far behind the rate of 1914-20, reports of the Labor Department inflicate. /n increas of 22.3 per cent is estimated for the period from Sept. 1, 1939, to January of this year; as compared to more than 40 per cent in the comparable period of the First World War.

Prentiss M. Brown, chief of OPA, has said that "we will be doing well if we hold the rise in the cost of living to one-half of one per cent a month." erace of exactly that proportion occurred from the middle of January to mid-February.

The current price movement has been steadily higher for two years, vanced loans by the Rural Elec- and what point it might have trification Administration to fintrols is conjectural. When Leon Henderson quit the OPA he estimated that consumers had been saved \$6,000,000,000 in living costs and the government \$25,-000,000,000 on munitions and construction.

The sharp advance began in March, 1941, grew much steeper right after Pearl Harbor, and flattened out with the imposition of price controls during April of last year.

Coast To Beat Axis In Producing Planes

Los Angeles.—The Los Angeles area alone in 1943 will double German airplane production, according to Theodore C. Coleman, vice-president of the Northrop Aircraft Co. He states:

"Precise figures are necessarily a secret, but the production is just as assured as is the fact the area last year doubled Japanese production and equalled Germany's.

To the Food Production Assembly Line!

Our Country Needs FIGHTERS!

And our country is getting them . . . by millions! We on the home front are fighters, too, in a different way but important nevertheless. It's our job to see that the food and weapons of war are produced in abundance. even if we have a quantity left when it's all over. Better that than to have wished for just a few more which failed to arrive! We have freedom toda ... so let's protect it for ourselves and the coming a nerations yet to enjoy it.
