

Draft Board Wants Addresses of Four

Executive Service Board number two, which has office in the North Wilkesboro town hall, is seeking the present address of four registrants. They are: Charles Fairbank Harrold, Cratie Hampton Holcomb, Linville Holcomb and

Robert Hampton Williams. Anyone knowing the address of either of the four men named will be doing them and the draft board a favor by reporting the address to the board.

Pulpwood Cutting Aids War Effort, So States a Dealer

"This community has a great opportunity to show our boys in the armed forces that we're behind them 100 per cent and that while they are fighting at the front we are working at home to keep pace with our production of war material, Mr. T. J. Frazier of Frazier Pulpwood Company, said today.

"We may not have the huge war plants that you find in large manufacturing cities", he continued, "but we do have an essential war industry that is just as important to the war effort as the production of planes, tanks, and guns. It's the cutting of pulpwood.

"Many of us, because of age or family responsibilities, are unable to join the actual attack on the Axis in Europe or the South Pacific. But that doesn't mean we can't have a hand in winning—and shortening—the war. Our country needs every man, some of them for fighting, but the majority to keep the combat troops supplied with supplies in good condition and on time.

"That's where pulpwood comes in. Without the thousands of military products into which it is made, our boys would be severely handicapped. With an abundance of it, our boys will be able to do their job effectively and quickly. They will lick the Axis and be home sooner if we do not falter."

Reciting the slogan of the newspaper pulpwood drive for November 11 to December 11, Mr. Frazier said:

"Cut a cord of pulpwood for every local boy in the armed service means more than just an appeal to patriotism. It is an opportunity to back up that boy with supplies, equipment, and food. It may even save his life.

"Few people realize how important a part pulpwood products play in the daily life of a fighting man. He gets his food protected from spoilage or contamination in water-proof and weather-proof paperboard boxes or multi-wall bags. He gets his shells, hand grenades, and other ammunition in paperboard cases. And he fires them with smokeless powder made of pulpwood.

"If he is wounded, his life may be saved by the blood plasma transported in and protected by paper boxes. His wounds may be treated from first aid kits that are almost entirely made of pulpwood. His life-sustaining supplies may be dropped in his isolated outpost by parachutes made of paper. Or they may be dumped by a warship or merchant vessel in the sea, to be carried in by the waves or the tide, to him on a remote isle in the South Pacific.

"If our local boy is a flier, he may have a vest made of pulpwood fibre or paper designed to protect him from sharp drops in temperature. The bombs that he is preparing to drop on German war plants or Jap bases is not only fired by powder made of pulpwood, but it is protected in transit by fibre rings made of the same material."

Mr. Frazier recalled that the only apparent attempt made by the Japs to bomb the mainland of the United States in this war was the dropping of a bomb in the vast pulpwood producing areas of Oregon.

"If the Japs want our timber so badly, we ought to oblige", he said. "But let's give it to them in the form of bullets, bombs, and shells. One way we can pay our respects to the Japanese and German warlords is to cut a cord of pulpwood for every boy in the service and thus give them a double-barrelled discharge from America's two battle-lines—the fighting front and the home front."

NIGHT CLOTHES
The nurse was inquiring of the new patient, a husky looking six-footer from the country, whether he had brought any pajamas with him.

"Pajamas? What are pajamas?"
"Night clothes. Didn't you bring any with you?"
"Heck no," answered the patient. "I ain't no social rounder. When night comes I go to bed."

NOTICE OF SALE OF LAND
Under and by virtue of an order of the Superior Court of Wilkes county, entitled Wilkes County versus Richard Love, Mattie Love, Nelson Money, and others, the undersigned commissioner will, on the 11th day of December, 1943, at 12:00 Noon, at the Court-house door in Wilkesboro, N. C., offer for sale to the highest bidder for cash, that certain tract of land lying and being in Antioch township, Wilkes county, and bounded as follows:

Beginning on a sourwood, Rufus Love's corner, and running South 2 1/2 deg. West 52 poles to a stone; thence North 88 deg. East with John Glass' own line 45 poles to a stone; thence North 4 1/2 deg. East with his line 48 1/2 poles to a stone in Rufus Love's line; thence North 87 1/2 deg. West with his line 46 1/2 poles to the beginning, containing 14 59-160 acres.

This 8th day of November, 1943.
F. J. McDUFFIE,
Commissioner

Hog Killing Time Now Here Again

By J. B. SNIPES, County Agent

Due to the fact that there is usually an out-break of cholera about this time of year, and it has been reported that cholera is in all surrounding counties, it seems it would be advisable for all farmers to kill their hogs which are ready for killing as soon as the weather is cool enough. Reports indicate that there has been a number of hogs dying with cholera in some of our nearby counties and this year above all years we should try to save as much meat as possible. It will also save a great deal of feed if the matured hogs are butchered a little early this year.

The hog should be kept off feed twenty-four hours before killing but should have plenty of water. There are several methods used in killing, cutting, and curing pork, but one of the best is where hogs are stuck alive which enables the blood to bleed out from the carcass which is very essential in keeping meat. The water for scalding the hog should be 150 degrees F. This can be tested by a thermometer or by dipping the fingers into the water three times in succession. If the third dipping burns the fingers severely it is about the right temperature. The following tools will be helpful in butchering hogs: One 6 or 8 inch butcher knife, one 6 inch skinning knife, one 7 inch boning knife, one smooth steel for sharpening knives, several hog gambrel sticks, two bell shaped hog scrapers, one 28 inch meat saw. According to experiments it is better to kill the hog one day and allow them to drain and chill over night and cut and cure the meat the following day. This method allows the carcass to not only drain well but all the animal heat will escape over night which is very essential in keeping meat. If the new methods of cutting are followed, the carcass should be separated in half by sawing down the backbone. Then the ham, shoulder, backs, Boston Butt, bacon, fat back, loin and jowls are removed in separate pieces. The pork can be cured by the old method by using plain salt or a new method which many of our farmers prefer is known as the dry cure method. For 100 pounds of meat use 8 pounds of salt, 3 pounds of brown sugar, 3 oz. salt peter. Mix the ingredients and apply half of this mixture and then wait one week to apply the other half. The shoulder and ham are left in cure three days for each pound of meat. For example, if the ham weighs 10 pounds it will be left in cure for 30 days. Bacon and other parts which you wish to cure should only be left in cure two days per pound of meat. After the curing period the meat should be taken out and washed off in luke warm water and hung up. It can be smoked if preferred. A good recipe for making sausage is as follows: For 50 pounds pork (3-4 lean and 1-4 fat) use: 1 pound fine table salt, 2 1-2 oz. finely ground black pepper, and a little red pepper if desired, and 3 oz. sage. Mix this thoroughly and spread evenly over meat. Then stir meat well before chopping.

If there are any of our farmers who would like to hold a meat cutting and curing demonstration on their farm the county agents office will be glad to assist.

Miss Culpepper Is Now a Pilot

Sweetwater, Texas. — Another plane-wise contingent of WASPs (Woman's Airforce Service Pilots) today received their aerial "degrees" in anniversary-day ceremonies on the flight line at Avenger Field, famed 'finishing school' for the modern Molly Pitchers of the skies.

The graduation of Class W-7 marked the first anniversary of the women's pilot training program. Just a year ago Jacqueline Cochran, blonde aviation speed queen, supervised the opening of the first WASP classes at Houston, Texas. Early this year, the school was moved to Avenger Field, trainees flying their own planes cross-country from Houston to Sweetwater.

Members of the "WASP-birth-day" group from North Carolina include: Anne Carolyn Culpepper, 24, daughter of Mrs. Zella Culpepper of North Wilkesboro, and J. I. Culpepper of 1492 Ponce de Leon Ave., Atlanta, Ga. Miss Culpepper has also lived with her aunts, Mrs. MaBelle Granton and Mrs. J. S. Richards in Jacksonville, Fla.

A former student of Florida State College for Women, Miss Culpepper was employed as a secretary before entering the AAFSTD at Avenger Field. She began flying in Atlanta about a year ago. A brother, Cadet Jack C. Culpepper, is serving with the Naval Air Corps at Pensacola, Florida.

The girls of W-7, sun-bronzed and healthy from six months of training in the clear Texas skies and from daily military drill and calisthenics, have completed what is possibly the most rigid training ever offered to women. In addition to their flight and physical training, they have studied many hours in ground school, practiced blind flying and navigation in the land-bound Ling trainer, and mastered the intricate sciences of radio code and other methods of air-ground communication.

Upon completion of Avenger training, WASPs are assigned to ferrying duties or other non-combatant jobs with the Air Forces, relieving highly-trained Air Corps personnel for combat duty.

Because rains have broken the prolonged drought and restored abundant pasturage, Argentina has officially reduced the price of milk, which had been raised during the drought to help dairy farmers.

Dressed for comfort in Arctic seas

IN HIS snug submarine jacket with its protective collar, his heavy woolen trousers and non-skid galoshes, he's dressed for warmth and fighting efficiency.

The clothing our Navy provides for its men is styled for comfort and long wear. Even their underwear. They are issued the right weight for any waters they may cruise.

You can have modern styling and care-free comfort in your underwear, too. For, during the past 40 years, the makers of HANES Underwear have developed the art of converting fluffy cotton into underwear that is both knitted and tailored to correct size.

HANES Union-Suits (shown at right) are one example. A lot of warmth is knitted into their fleecy softness. And they're made to your exact chest width and trunk length—won't pinch when you stretch or bend. Ankle-length legs. Long or short sleeves. You'll like their comfort. P. H. Hanes Knitting Co., Winston-Salem, N. C.

HANES UNDERWEAR FOR MEN AND BOYS FOR EVERY SEASON. If you cannot always get your favorite HANES style, please remember that much of our production is going to our Armed Forces.

Arthur Clary's Mother Is Dead

Statesville.—Mrs. Hettie Rhode Clary, 58, wife of Thomas Frank Clary, died Monday afternoon at the home of her son, Melton Clary on Woodlawn drive. She had been in declining health for several years.

A native of Davie county, Mrs. Clary was a daughter of the late Mr. and Mrs. Joseph Harris. Surviving are her husband, three sons, Thomas Clary, of Mooresville; Neilton Clary, of Statesville; Arthur Clary, of Wilkesboro; two sisters, Mrs. Walter Anderson, of Davie county, Mrs. H. C. Cooke, of Dunbury.

Funeral was held Wednesday afternoon at 2:30 o'clock from Liberty Pilgrim Holiness church in Davie county.

Children of the Transvaal, in Africa, have given \$27,600 to children of bombed areas in Britain, and have suggested that \$8,000 of it be used for a bed in each of six hospitals in England, Scotland, and Wales.

The aqueducts of Rome at the time of the Caesars supplied 320 gallons of water daily and were 249 miles long.

We Now Have the Agency For CHEN-YU Nail Polish and Lipstick Brame Drug Co. Telephone 10 North Wilkesboro, N. C.

WE WANT to salute the people of this community on their fine response to the appeal for more pulpwood. Every boy in the service will be proud of the way the home folks are backing him up.

This present pulpwood drive is bringing results. It has brought in pulpwood from people who never cut any before. It has been a big help toward meeting the dangerous shortage that threatens our war effort.

The danger is far from over. It will take millions and millions of cords to win the war. There will never be enough to go around — not as long as the shooting lasts.
