Fertilizer applied to a winter cover crop has produced a high yield of corn following a cover crop, then when applied directly to the corn after turning under the crop, report State College specialists.

**New Year's Greetings.... and--**

**"WE'RE ALL IN THE SAME BOAT"**

Pulling toward Victory is our common aim—from the little school child, regularly buying War Stamps, and helping in salvage collection—to the housewife doing her best with rationing, taking on a war job and civilian defense duties, and cooperating with every wartime, government regulation! . . . Backing her up—his hands strongly guiding his oars, is the storekeeper, making the best of manpower and merchandise shortages; firmly observing ceiling prices and rationing; just as the business man does his share by paying taxes in good spirit; running his office with a limited staff, and economizing at every turn of business operation. And right in the same boat is the war worker, whose grimy hands and toil-soiled clothes are as symbolic of "gallantry in action" as the soldier's mud-spattered uniform. He too, with all of us, is riding over the rough waves that war must bring, pulling hard and making straight for Victory—whatever sacrifice may be necessary!

**WE ARE GRATEFUL TO EACH AND EVERY PATRON OF OUR FIRMS....**

for his indulgence during the times when merchandise was short and stocks incomplete, but we have endeavored to maintain as complete a variety as possible under war-time conditions. We appreciate your loyalty and patronage, which has made possible our business expansion during the past years, thus enabling us to sell a greater volume of merchandise and sharing the savings with each patron. In wishing you good luck and good fortune in 1944, may none of us overlook the importance of working even harder for VICTORY and a return of normal conditions, and the return of our boys who are giving their ALL for our liberty and freedom.
