Victory Gardens

By J. R. SNIPES, County Agent

Due to the drought over most of the state, early Victory Gardens have been cut short but there is still time to plant late gardens. Since the general rains have changed the outlook for late gardens, every effort possible should be put forth to produce the maximum amount of vegetables during the rest of the garden season. According to reports, the food situation is more critical than most people realize and the interest for continuing gardening should be stimulated. There is still time left to plant snap beans, lima beans, corn, and set tomatoes. Late Irish potatoes and early turnips can also be planted. Let's see that our families and soldiers are well fed by planting late gardens.
