While the snow was falling most rapidly Saturday an opossum rambled to the home of Ivey Lovette at Moravian Falls and was caught while it was eating at the cats' feeding pan near the back door of the home.

It sounds like a tall story but the doubting Thomases may see the living evidence at the Lovette home, where the opossum is now being kept.

HERE'S WHY YOU SHOULD USE 15% LESS HEATING OIL THIS WINTER

The heating oil supply situation is critical. Unless you and other users of heating oil burn 15% less than normal the balance of this winter, your home may be cold! Today the industry's production is the greatest in history — BUT — still not enough to meet the record demand. To save your 15%, take these steps now: Set thermostat at 68°... turn down to 60° at night or when away... keep radiators off in all unused rooms... use fireplace whenever possible — keep flues closed when not in use.
