Uncle Natchel's FERTILIZER TALK

"One of our neighbor farmers usually puts about 150 pound of Chilean Soda on his oats for top-dressing. Last spring he hauled it to the field in a wagon. Wherever he stop to fill the distributor, some of the Soda spilled on the ground.

"All season long those spots where the wagon done stood look greener and grewed thicker than the rest of the field. The farmer figured that every place he stop must'a got about 300 pound of Soda an acre and made twice as much oats. He told me, I should'a parked that wagon all over the field!"
