

### Precautions Against Sunburn, Excessive Heat

Raleigh.—Precautions against over-heating and excessive sunburn were urged today by Dr. J. W. R. Norton, North Carolina State Health Officer. "Regardless of what may be the daily weather forecasts," he said, "we have entered the summer season and may expect many excessively hot days from now until fall. Moreover, we have come to the time of the year when many of us engage in pastimes and practices which expose us to the hazards of heat.

"There are a few simple rules the observance of which might spare us much discomfort, perhaps illness and, in some cases, even death," Dr. Norton continued. "At the first sign of becoming overheated, we should stop what we are doing and rest, and if certain symptoms manifest themselves, we should seek not only first aid, but medical assistance, as well. It is even better to avoid reaching the

point of feeling that overheating or overexposure to the sun is being experienced.

"It is also well to remember that overexposure to the sun's rays may cause burns with serious effects. Serious burns may result from overexposure to the sun. The result is the same, regardless of the inflicting agent. There are three degrees of burns: first, which reddens the skin, without blistering; second, which result in blisters, and third degree burns, which seriously injure, and sometimes destroy, the deeper tissues. Overexposure to the sun may result in burns of any of these three degrees. It is, therefore, best to avoid overexposure and let discretion be the better part of valor. While brunettes can stand more hot sunshine than blonds, it is well for both to avoid the causes of severe skin, perhaps tissue, burns."

Dr. Norton also emphasized the importance of patronizing only those artificial swimming pools which meet sanitary requirements. "To conform to these requirements," the State Health Officer said, "pools should receive a constant and uninterrupted application of chlorine, which, unless the flow is constant, is soon gone. The water should also be examined daily for bacterial content, as swimmers invariably get water into their mouths, ears, eyes, and swallow portions of it. The local health departments and the State Board of Health's Division of Sanitary Engineering stand ready to give their cooperation to any swimming pool operator and to advise him not only as to how a pool should be constructed, but also how it should be maintained, to keep it safe for its patrons."

The Department of Conservation and Development's Forestry Division maintains and operates 115 forest fire lookout towers in North Carolina.

### Timber Farmer Posters Offered Free

### THIN YOUR CROWDED TREES

Cash Crops - Improved Woods - Continuing Returns

The above poster in colors suitable for tacking up on fence posts and on school bulletin boards may be had in quantities by writing any Congressman or Senator, it is stated in a bulletin sent here by the Birmingham, Ala. office of the Southern States Forestry Commission, Inc., who are sending some valuable forest material to the local schools of this section. Call for No. "W-11". Size is 13 x 18 inches.

Purpose of the poster here is to encourage cutting out weed and scrub oak trees for fire wood, and defective crooked diseased trees for pupwood, fence posts, and rails, leaving a stand of healthy young trees to grow for lumber and poles and veneer mills.

The Commission office in Birmingham states that additional posters on fire prevention and also booklets and wild life charts may be had by teachers of this section on application to them. There is no charge for the material, the announcement adds.

### One Is Killed, Five Injured In Auto Crash

Elkin, June 26.—Six were brought to Hugh Chatham Memorial Hospital here last night as the result of a wreck about 8 o'clock on Highway 67 three miles east of Boonville.

Roger Matthews, 30, a passenger in the car operated by Billy Miller, 18, of Mocksville, died at 11 a. m. today of a skull fracture and brain concussion.

Billy Miller, who suffered a head injury, a broken pelvis, and other injuries, continues unconscious and in a critical condition. Jack Webb, 18, of East Bend was treated for a broken collarbone and bruises.

Thurmond Davis, 30, of Boonville was treated for lacerations and bruises and dismissed. Allen Wooten, 15, of East Bend was treated for a fractured knee.

Billy Hutchins of East Bend, owner of the car, escaped injury.

The automobile was practically demolished, reportedly turned over several times after Miller lost control on a steep grade.

No charges have been preferred pending the condition of the driver. Matthews, whose body was removed to Yadkinville, was the first 1949 traffic fatality to occur in Yadkin county.

### High Court Sidetracks Eisler Case

Washington, June 27.—The Supreme Court by a 5 to 4 vote today held off ruling on the appeal of Communist Leader Gerhart Eisler from his jail-term for contempt of congress.

Eisler recently jumped his bail and fled to Soviet Germany.

Justice Jackson sharply rebuked the majority. Said he in a dissent:

"I do not think we can run away from a case just because Eisler has." He said the conviction should have been affirmed.

A decision may never come. The majority said in a brief, unsigned opinion that nothing will be done "pending the return of the fugitive." He was under a one-year term for refusing to be sworn as a witness before the House Un-American Activities Committee.
