## CONFUSED ABOUT APPLIANCE PRICES?

THIS MESSAGE MAY HELP YOU

In terms of quality and new work-saving conveniences, leading electric appliances like our own Hotpoint Refrigerators, Ranges, Dishwashers and other products are far superior to pre-war models.

But that's only the half of it! In terms of today's cost of living and the price increases of other commodities such as automobiles and houses, our 1949 Hotpoint Appliances, actually cost a lot less than the corresponding models of 10 years ago.

For example, you can buy a new Hotpoint Refrigerator now for just \$189.75—only \$10 more than the comparable 1939 model, which gave you far fewer advantages. When you stop to think that the dollar today is worth only 60 per cent of what it was ten years ago, you can readily see how low appliance prices really are now.

The appliance industry has done a great job of building new and better products, while still maintaining the low prices you want. Hotpoint, for example, has accomplished this

by careful planning—having completed the industry's greatest post-war expansion program to provide far more efficient production facilities.

Because you get record quality at such low cost, we can say sincerely that now is the time to buy an appliance. In making your selection, however, be sure to look them all over, compare values and ask your friends who know from experience.

We think you'll choose Hotpoint, because we honestly believe that these appliances are as fine as technical facilities and human skill can produce—and priced as low as any other make of comparable quality.

We invite you to inspect the latest models and see why we say you can "Look to Hotpoint for the Finest—First"—why you can get the greatest dollar-for-dollar values ever offered—right now!
