When Artists Films first had the idea of a series of 24 shorts featuring the great musicians of our time, Miss Dilling was chosen to represent the harp. Need Of Screening Evident In Report From X-Ray Work

46 Of ,500 Industrial Employes Screened Here May Have T. B.

Need of a mobile X-Ray unit here to screen the local population is shown by the report received from screening of 1,500 local industrial employes for tuberculosis, Dr. J. H. McNeill, chairman of the Wilkes County Committee of the National Tuberculosis Association, said here today.

The report from Dr. Wm. A. Smith, director of the division of tuberculosis control of the State Health Department, disclosed that 46 of the 1,500 screened showed to have some tuberculosis and 19 were shown to have had some which had healed.

This, Dr. McNeill said, is a comparatively high percentage and shows clearly the need of equipment for screening everybody.

The 46 included in the report are being notified to have a full size X-Ray made at the county tuberculosis hospital for further study and definite diagnosis. The Tuberculosis committee

is considering the purchase of a unit to be used in screening, and a unit may possibly be made a part of the new Wilkes General Hospital to be constructed here. Success of the sale of Christ-

mas seals here, Dr. McNeill states, will have much bearing on whether or not a unit can be purchased. The committee has no source of funds other than sale of the decorative stickers to be used in the Christmas holi-
