Increased Soil Fertility

made possible with
RED BRAND FENCE

With good fences, you can raise more livestock . . . turn pasture into profits . . . make use of grain and roughage left in the fields after harvest . . . and add soil-building legume pastures to your crop rotations. All this builds up the soil. Many farmers have doubled their crop yields in 5 years under this plan. You can too! So start fencing . . . and profit!

RED BRAND Fence Lasts Longer
Actual weather tests have proved that Red Brand fence lasts years longer—saves money in the long run. Only Red Brand fence has the "Galvannealed" zinc coating over copper-bearing steel wire . . . double protection against rust.
